IFA Manual 2022 Update Summary

HOME Affordability Period

Page 7

- Added a new helpful chart.

VAWA 2022

Pages 26-29

- Details regarding the 2022 reauthorization of VAWA are listed.

Utility Allowances

Pages 40 & 41

- HUD-regulated buildings include HOME projects (thus HOME UAs will apply to all LIHTC units).
- Further details about the HUSM UA are included.
- How to access IFA's HUSM training (developed with Costello University) is listed.

Defining Wear and Tear

Page 47

- A note has been added to the discussion defining normal wear and tear. "Periodic or routine updates to the property i.e., flooring, etc. may not be charged to any tenant."

File Organization

Page 52

- The file order recommendations have been rearranged for simplicity and clarity.

Excluded Household Members

Page 54

- Added incarcerated individuals and spouses who reside outside the country as examples.

Verification

Page 56

- For employment, collection of either pay stubs or Verification of Employment (VOE) is allowed. Collecting BOTH is no longer required.
- HOME 2-month pay stub requirement is clarified.

Student Exceptions

Page 60

- Added examples of JTPA-similar programs: General Education Diploma (GED) or High School Equivalency Test (HiSET).

Zero or Sporadic Income

Page 69

- Added bold emphasis on the statement *“Pay very close attention to this section of the form. If it is not filled out in its entirety, the form will be considered incomplete, and the unit considered out of compliance. Please note that the answer “rental assistance” explains how rent will be paid, but not how other necessities will be paid and is not a complete answer.”*

Student Financial Assistance

Page 80

- Added bold emphasis **that full- or part-time students** are subject to the student financial assistance rules.

Recertification – HOME Projects

Pages 99-104

- Added clarification: *“In other words, in the 1st, 6th, 12th, and 18th year of the HOME affordability period everyone who has lived in the project that is due for a recertification must be fully recertified using third-party verification. For other years, self-certification or PHA verification (for voucher holders) is sufficient.”*
- Clarification that an owner/manager must determine if HOME units with state covenants are fixed or floating.
- Added information about Fair Market Rents and how to address ‘over-rent’ FMR situations.

Page 115

- Added clarification for HOME-only mixed-income projects: *“At a minimum, lower set-aside unit that meets state covenants will need to be fully recertified annually to determine compliance with state covenants.”*

Casualty Loss

Pages 118 & 119

- The time limit to report a casualty loss has been **extended from 10 to 30 days**.
- Added the following instruction in cases of casualty loss, *“Owners/Managers are responsible for updating IFA monthly until the project is fully restored and then complete the required Casualty Loss Completion Form.”*
- Clarifies that *“non-Presidentially declared disaster casualty losses allows restoration to be completed within two years following the end of the tax year in which the casualty loss occurs. In most cases, this is a greater time period than the 25 months allowed for a Presidentially declared major disasters. For reference see IRC §42(h) (5) (B). Unlike major disaster losses, tax credits cannot be claimed during the restoration period during non-major disaster-related casualty losses.”*

Quarterly Compliance Reporting Requirements

Page 130

- Clarification is provided on documents that are needed for quarterly reporting. *“If a project also contains HOME funds or has an IFA program loan/grant, additional reporting requirements are also in place which may include submitting annual audits, quarterly financials, operating budgets, owner tax returns or insurance certificates using the Asset Management Portal. All LIHTC projects awarded in 1999 or later are required to submit annual audits using the Asset Management Portal.”*

Owners' Response to Initial Owners Report

Pages 139 & 140

- Bolded emphasis is provided in the following section, with “for physical deficiencies only” added and “Asset Management Director” replacing “Compliance Director.” *“IFA may, at our discretion, grant up to an additional 90-day extension (for physical deficiencies only). A formal request must be submitted in writing and received within 60 days of the date the initial report was issued. After the 60-day period, no extension will be granted without approval of the IFA Asset Management Director.”*

In the written request the owner/manager must provide details on why an extension is necessary including estimates on when repairs/file corrections will be made.”

Notification to the IRS of Noncompliance

Page 139

- Clarification is provided that extensions will only be granted for physical deficiencies.

Post-Year-15 Adjustments

Page 145

Clarification is provided that, generally, special needs and other covenant set-asides do not change after year 15. Possible adjustments are explained.

Pages 146 & 147

- Instruction added that qualified contract requests can be submitted in March and October.
- The “Asset Management Director” has replaced the “Compliance Director” in the instructions relating to who to contact at IFA about foreclosure or deed-in-lieu.

Compliance Updates and Training

Pages 149 & 153

- Training will be provided at the *HousingIowa* Conference annually in September. Other training requirements have been removed.
- Training may be provided at other times, at IFA’s discretion.

Administration and Notification

Page 149

- Reference to the “Asset Management Portal (AM)” was added, and “Director of Compliance” was changed to “Asset Management Director.”

Reporting and Certification Requirements

Page 152

- Added owner annual certification requirement that *“certifications will include the notification of the Local Lead Agency of all vacancies and the use of Iowa’s free rental housing locator at www.iowaHousingSearch.org if required by the project’s QAP at time of award.”*

Added that *“the owner must submit financials (audits preferred) for all LIHTC projects awarded in 1999 or later and any project with HOME or Multifamily loans. The owner must submit insurance certificates and other required submissions as shown in the IFA AM based on the IFA funding source.”*

Chapter 1 - Introduction & Program Fundamentals

Introduction

The Iowa Finance Authority (IFA) was established in 1975 to undertake programs to assist in the production of housing for low- and moderate-income residents in the state of Iowa. This manual addresses the requirements for two of those programs, the Low Income Housing Tax Credit (LIHTC) and HOME programs. It is designed to answer questions regarding procedures, rules and regulations that govern housing properties in Iowa. This manual should be a useful resource for owners, developers, management agents and on-site management personnel. Particular attention is paid to the needs of those doing the work at a site level. Since they carry out much of the owner's work, these vital personnel are referred to throughout this manual as owner/managers.

While setting out IFA's requirements under these programs, nothing in this manual should be construed as legal or accounting advice. This manual is to be used only as a supplement to compliance with the laws, regulations and other guidance from HUD and the IRS. This manual should also not be considered a complete guide to compliance for the programs covered. The responsibility for compliance with these federal programs lies with the owner of the building for which the funding applies. Because of the complexity of federal programs and the need to consider how they apply to specific circumstances; owners are strongly encouraged to seek competent professional legal and accounting advice regarding compliance issues. IFA's obligation to monitor for program compliance with the requirements of a program does not make IFA or its subcontractors liable for an owner's noncompliance. Additionally, this guide does not address the tax consequences of noncompliance. Taxpayers are responsible for evaluating the tax consequences of noncompliance with IRC §42.

Program Backgrounds

LIHTC

The Low Income Housing Tax Credit program was created by Congress as part of the Tax Reform Act of 1986. It is often referred to in abbreviated form as the LIHTC or "tax credit" program. Through the LIHTC program, owners receive a reduction in tax liability in exchange for providing affordable housing. This tax credit is based on how much is invested in the property. The tax credit program is governed by Section 42 of the Internal Revenue Code (§42). The Internal Revenue Service (IRS) administers the program nationwide in conjunction with state housing finance agencies.

The IRS does not directly allocate tax credits to owners or routinely monitor compliance with the LIHTC program. Those tasks are handled on the IRS' behalf by the state housing agencies. The Iowa Finance Authority (IFA) is recognized as the housing finance agency authorized to monitor compliance for various affordable housing programs, including the LIHTC in the state of Iowa.

Section 42 requires that designated state tax credit agencies provide a procedure for monitoring adherence to compliance with the requirements of the LIHTC program. Guidelines and rules outlined in this manual reflect these requirements.

Tax credits can be involved in new construction of a property, rehabilitation of a property and acquisition of an existing property if it also will undergo rehabilitation after acquisition.

In order to retain the tax credits awarded, a development must do the following: rent to qualified households and prove that they qualify through supporting documentation, keep rents affordable and maintain the property in good repair (often referred to as “decent, safe and sanitary”).

HOME

HOME Investment Partnership Program funds are provided by the Housing and Urban Development (HUD) agency under the HOME Investment Partnership Act, which is found in Title II of the Cranston-Gonzalez National Affordable Housing Act of 1990.

The HOME program is designed to provide affordable housing to lower-income households, expand the capacity of nonprofit housing providers, and strengthen the ability of state and local governments to develop and implement affordable housing strategies to meet local needs.

A primary use of HOME funds is for the acquisition, construction and rehabilitation of rental housing. All rental housing units funded using HOME must meet affordability and income-targeting requirements as outlined in the HOME Final Rule (24 CFR Part 92). The HOME program designates specific units that are HOME units based on the amount of HOME funding proportionate to the total cost of the project.

Properties that have been developed with HOME funds are required to adhere to specific rules designed to ensure affordability for low and very-low income households throughout a required affordability period.

Each project will have a specific number of units that will have HOME requirements. Non-HOME units are not affected by HOME rules.

EXAMPLE

Number of HOME units at a property

A project has 50 units. If half of a project’s costs are paid for with HOME funds, at least 25 of the units will be designated HOME units.

Similar to the IRS with tax credits, HUD does not directly commit HOME funds to a property. These funds are committed and monitored by Participating Jurisdictions (PJs). PJs may be local or state agencies. States often have several local PJs working in the state in addition to a state PJ. IFA is the PJ for the HOME funds committed to the State of Iowa and is responsible for HOME program monitoring and compliance enforcement.

Important: Prior to 2010, state HOME funds were committed and monitored by the agency formerly known as the *Iowa Department of Economic Development (IDED)*. IFA now monitors their past portfolio and commits new HOME funds allocated to the State of Iowa.

HOME guidance found in this manual only applies to projects monitored by IFA. An owner/manager will need to look for guidance from the applicable city or local PJ for HOME funds not committed by IFA or IDED.

LIHTC and HOME Together

Many of the rules are the same for the LIHTC and HOME programs. When that is the case, it is easy to apply the rules if you have both programs. However, when there are differences between the programs, we at times must apply a different approach to properties with LIHTC or HOME alone as compared to those with both programs. In order to assist the reader in determining which approach applies, you can complete the checklist on the inside front cover. Check the boxes appropriate to your property. If you have more than one project, you may want to create a checklist for each and add it to your manual.

When key issues arise relating to LIHTC/HOME units in this manual, we will address them with callouts. The box you checked for your property will help you to identify which approach to take.

<p>My property is: Check which applies:</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"><input checked="" type="checkbox"/> LIHTC only</div> <div style="text-align: center;"><input type="checkbox"/> HOME only</div> <div style="text-align: center;"><input type="checkbox"/> LIHTC & HOME</div> </div>	<p>My property is: Check which applies:</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"><input type="checkbox"/> LIHTC only</div> <div style="text-align: center;"><input checked="" type="checkbox"/> HOME only</div> <div style="text-align: center;"><input type="checkbox"/> LIHTC & HOME</div> </div>	<p>My property is: Check which applies:</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"><input type="checkbox"/> LIHTC only</div> <div style="text-align: center;"><input type="checkbox"/> HOME only</div> <div style="text-align: center;"><input checked="" type="checkbox"/> LIHTC & HOME</div> </div>

MEMORY AID:

Can you remember the basic compliance requirements for affordable housing?

If you can remember "IRS", you can!

<p>To comply with affordable housing programs we must:</p>	<p>This involves:</p>
<p>1. RENT TO QUALIFIED HOUSEHOLDS 2. KEEP RENTS AFFORDABLE 3. KEEP THE PROPERTY DECENT SAFE AND SANITARY</p>	<p>1. INCOME LIMITS 2. RENT LIMITS 3. SAFE & SANITARY</p>

Regulatory Agreements

A regulatory agreement is a contract between an owner of multifamily real estate and a LIHTC or HOME agency. The owner agrees to “give up” some of their land use rights in exchange for participating in a federal program. The restrictions are documented in this contract and recorded in the public record. If the property is sold during the term of the agreement, generally the restrictions continue with the land and apply to the new owner.

The purpose of a regulatory agreement is to require that the property provide affordable housing to low income households by limiting the maximum rent that can be charged for a unit and by requiring that some or all of the units are made available only to households with incomes below designated income limits. Physical condition standards are imposed as well as other covenants with IFA.

LIHTC Agreements

In the State of Iowa, the LIHTC Regulatory Agreement is called the *Land Use Restriction Agreement* (LURA). IFA prepares the LURA prior to the issuance of IRS form 8609 which signals the official allocation of credits. The LURA must be recorded before the end of the year in which tax credits are claimed.

In order to successfully manage a tax credit property, the LURA should be used as reference for important compliance information.

HOME Agreements

Like the LIHTC LURA, the HOME Regulatory Agreement in Iowa is titled *IFA HOME Investment Partnerships (HOME) Program Contract*. This manual will abbreviate this as *HOME Contract*. New HOME projects committed funds by IFA will have covenants and restrictions recorded. These covenants are also part of the *HOME Contract*.

Home Affordability Period Chart	
Rental Housing Activity Amount per-unit	Minimum Period of Affordability in Years
Under \$15,000 (Rehab)	5
\$15,000 to \$40,000 (Rehab)	10
Over \$40,000 or rehab involving refinancing	15
New construction or acquisition of newly constructed housing	20

Supplemental Information: Tax Credit Calculations

Most tax credit managers never actually calculate the amount of tax credits that are claimed for their property, so we will not spend a great deal of time in this manual discussing that topic. In case you are curious, however, we will provide an overview.

The Tax Credit Formula:
Eligible Basis x Applicable Fraction = Qualified Basis
Qualified Basis x Applicable Credit Percentage = Annual Tax Credit

Credits are claimed for each building based on how much money is spent on the building. The term used by the tax credit program to describe this amount of money is the **eligible basis**.

The allowable expenses that were spent on the building at Shady Oaks Apartments totaled \$1,000,000

Now that we know how much was spent on the construction of the building, we need to determine how much of this money went to provide housing for low income households. This is done by calculating the percentage of the units in the building that are tax credit qualified units. The term used to describe this percentage is the **applicable fraction**. If the units are different sizes, the percentage of units will be calculated based on the number of units and the square footage of those units. The lower resulting percentage will be used when claiming tax credits.

The building has 10 units of differing sizes with a total of 8,000 square feet. 6 of the units are LIHTC and represent 4,000 square feet. The 4 non-LIHTC units thus also represent 4,000. Calculations: the unit fraction is 6/10 (60%). The square footage fraction is 4,000/8,000 (50%). The lower 50% is the applicable fraction.

Now that we know how much was spent on the construction of the building and how much of the building is housing low income households, we can calculate how much money is represented by the low income units. This is the **qualified basis**.

Calculation: \$1,000,000 X 50% = \$500,000 qualified basis

Finally, the qualified basis is multiplied by a rate that the project locks into during development. This rate is called the **applicable credit percentage**. The two categories of credit percentage are 4% or 9%, and the actual rates used will be close to or at 4 or 9%. Multiplying the amount of money spent on low income units (the qualified basis) by the applicable credit percentage results in the maximum amount of annual tax credits that can be claimed for the building for a ten year Credit Period.

*Calculation: \$500,000 X 9% = \$45,000 annual tax credits
 X 10 years = \$450,000 credits claimed total*

Note: The applicable fraction calculation will be different for the first year of the Credit Period and will be based on a prorated monthly average fraction. An owner/manager should work closely with investors to meet financial expectations and to maximize first year credits.

What does the tax credit calculation mean for non-accountants?

The most important factor in the credit calculation relating to a site manager’s daily routine is the *applicable fraction*. Keeping units in the applicable fraction is accomplished by keeping them in compliance with LIHTC rules. This includes renting to qualified households, keeping rents affordable and maintaining the property in a decent safe and sanitary manner. These are major parts of the job of site staff and those who support them. The *eligible basis* is also important. Parts of the building included in eligible basis are subject to rules prohibiting the charging of fees beyond rent (see the Chapter 2 section on *Fees*). Also, removing features included in eligible basis in effect lowers the value of the property and has a negative impact on the tax credit calculation. This should be avoided.

Employee Units

LIHTC

Properties with a unit occupied by a full-time employee who is not income qualified may treat the unit as having the same status as a “common area” if the property requires the manager to live on-site. For the unit to meet the requirements of being designated a common area, the unit must benefit all rental units in the property and the employee occupying the unit must be full-time at the property. In addition to full-time managers, this can also apply to full-time maintenance and security staff. Charging rent to an employee does not disqualify a unit as an employee unit.

Please note that, for this rule, the term “full-time” is not necessarily related to the number of hours worked. For instance, an employee does not have to work 40 hours per week to be considered full-time. Full-time is defined as a substantial amount of time and will be based on the specific needs of the property. Factors to consider include the number of units managed and the duties the full-time employee performs—such as being on call during non-business hours and weekends for emergencies.

EXAMPLE

Employee units and the applicable fraction

In a building consisting of 100 units, 99 units are occupied by low income tenants and one unit is occupied by a full-time staff member. The applicable fraction would be:

99/99 or 100%

(Not 99/100 or 99%)

IFA SUGGESTS

When requesting that an existing LIHTC unit be converted to an employee unit, create a job description for the employees in employee units that will delineate their responsibilities and the number of hours expected to be worked. Clarify if they are a program-qualified household or not and the rents they pay. This will help demonstrate a need for the employee unit at the project.

In most cases, an employee unit designation will occur when a property is established. In situations where an employee unit was not designated initially, the owner/manager must contact their IFA Compliance Officer in order to ensure that the implementation of an employee unit will not create compliance conflicts. If there is a need to change the currently assigned employee unit to another unit, the owner/manager must contact their IFA Compliance Officer to ensure that compliance is maintained.

To prevent the loss of credits, the employee unit is excluded from the applicable fraction.

In some cases, an owner might wish to convert an existing employee unit into a rental unit. Because the unit was previously considered “common area” it must be converted into an LIHTC unit and occupied by an income qualified household. IFA must be notified in the event this situation occurs so we can update the number of LIHTC units in our records.

HOME

HOME units are not employee units, unless they are housing HOME-eligible site employees and the rents charged are HOME appropriate.

Per the 2013 HOME regulation, for 100% HOME projects one HOME unit may be subsequently converted to an on-site manager’s unit after project completion if the PJ determines that the conversion will contribute to the stability or effectiveness of the housing. The costs of the unit, however, will not be eligible for HOME funding. IFA must be consulted before implementing any employee unit at existing HOME properties as any change in the number of HOME-assisted units could result in a re-evaluation of the initial cost allocation and HOME funds might need to be repaid to IFA.

Model Units

Model units are generally utilized during a project’s lease-up period to show prospective tenants the amenities of the project’s units. A fixed model unit must be included in the eligible basis and included in the denominator of the building’s applicable fraction; however, it cannot be included in the numerator of the applicable fraction unless rented to a low income household.

Property Milestones

LIHTC Placed In-Service

When a building is ready for its intended purpose, the IRS considers it to be placed in-service, and leasing can begin. For new construction and adaptive reuse projects, this generally happens when certificates of occupancy are issued that allow an owner to legally rent units. For credits based on the acquisition of a building that is already inhabitable, the placed in-service date is the date that the building is purchased. Rehabilitation credits are placed in-service when enough money is spent to get the eligible basis on which the credits will be claimed. In many cases, tax credits can be claimed for units occupied by LIHTC-qualified households starting the first full month after the building is placed in-service (see Chapter 5 for further details on acquisition/rehab credits).

LIHTC Credit Deferral

Once a building is placed in-service, the owner may choose to start claiming credits that year, or they may choose to claim credits the next year. Claiming the later year is called *deferring* credits. The decision to defer credits is generally made when a building is not LIHTC-occupied to the level needed to support the planned tax credits by the end of the year a building is placed in-service.

When credits are deferred, households that were LIHTC qualified, moved in, and are in place at the start of the Credit Period can be used to claim credits. However, if they moved in more than 120 days prior to the start of credits and the project has non-LIHTC units (*mixed-use*), then a test (*See the Safe Harbor Rule in Chapter 6*) must be run to determine if the Available Unit Rule is triggered because any of the households have since had increases of income to over the 140% level (see Chapter 4 for further details on the AUR). The “test” consists of confirming with the household that sources and amounts of

anticipated income included on the *Tenant Income Certification* (TIC) form are still current. The TIC is a required IFA form. If additional sources or amounts of income are identified, a copy of the TIC will be updated based on documentation the household supplies, such as paystubs. In this situation, it is not necessary to complete third-party verifications. If the household is over-income based on current income limits, the Available Unit Rule is applied to the next available unit. As with all households that were qualified at move-in but have future increases in income, their housing is not in jeopardy. The income test does not establish a new recertification cycle. Future recertifications will continue to be based on the initial qualification date for the household.

EXAMPLE

When an owner may choose to defer

A building has a target goal of 100% LIHTC units. It is placed in service on October 2nd, 2016. By the end of the year, 53 of the 100 units (all the same size) have been qualified. The owner must choose either to claim credits in 2016 (settling for 53%) or deferring to 2017, hoping to get to the 100% by the end of that year. Whatever the case, by the end of the second year, credits will have to begin.

When an owner is not likely to defer

A 75 unit building has a target goal of 100% LIHTC units. The building is placed in service on April 5, 2016. By December 31st, 2016, all 75 units have been qualified. Since the target has been met by the end of the first year that the building was placed in service there is no need to defer credits to the following year; all credits would most likely be claimed in 2016.

EXAMPLE

When income testing is required

A LIHTC building with non-LIHTC units is placed in-service on **03/13/2019**.

Credits are deferred to start on **01/01/2020**. The following facts apply to the LIHTC move-ins.

Unit 101 MI date 03/15/2019

Unit 102 MI date 08/01/2019

Unit 103 MI date 10/10/2019

Unit 104 MI date 11/01/2019

Unit 105 MI date 12/08/2019

In December 2019, an income test needs to be conducted for households in units with certifications older than 120 days.

Units 101 and 102 will need to be tested. Units 103, 104 and 105 moved in within 120 days of the start of credits and will not need to be tested. If the tested units exceed 140% of the income limit, the next non-LIHTC unit to be available after 01/01/2020 will need to be rented to a LIHTC household until the AUR is satisfied. All units will be fully recertified by the anniversaries of their move-in.

Owner/managers of projects that are 100% LIHTC always intend to rent the next available unit to LIHTC households and so income testing is not required for these projects unless they also chose the Deep Rent Skew election on Form 8609.

LIHTC Periods

Once the lease-up of a building is complete and credits are claimed, three LIHTC time periods begin concurrently. These three periods are called the:

1. Credit Period
2. Compliance Period
3. Extended Use Period

Credit Period

The LIHTC provides a tax credit that is generally claimed for 10 years. This is the time frame in which a tax credit is generally claimed against a taxpayer’s federal income tax. It starts the first taxable year that credits are claimed and continues nine additional years for a total of 10 years.

Compliance Period

The Compliance Period continues an additional five years after the end of the Credit Period. Therefore, it also starts with the first year of the Credit Period, but it goes to the end of the fourteenth year, for a total of 15 years. During this time, the IRS monitors the property through the 8823 forms submitted by IFA and expects compliance with all federal LIHTC requirements (see Chapter 6 of this manual for more information on compliance monitoring).

Extended Use Period

For properties allocated credits after January 1, 1990, after the Compliance Period there must be AT LEAST an additional 15-year commitment to housing low income persons with affordable rents. The total 30 (or more) years is called the Extended Use Period. As with the other periods, the Extended Use Period begins with the first year credits are claimed. It then continues at least 29 additional years. After the Compliance Period, the IRS will no longer monitor for compliance. Credits will also not be recaptured for noncompliance that occurs after the Compliance Period. IFA, however, will ensure that the compliance criteria agreed to by the owner in the LURA are met during the entire Extended Use Period and will impose penalties as necessary.

The LURA, as mentioned earlier in this chapter, is a deed that reflects the Extended Use Agreement with the state.

CAUTION!

120 days is not 4 months!

The 120 day timeframe applies to several LIHTC rules. Be sure to count the days, as 120 days is rarely 4 months.

120 day timeframes apply to:

- Income testing when credits are deferred (see Chapter 1).
- The lifespan of verifications (Chapter 3).
- Timeframe to certify in-place households at an LIHTC acquisition/rehab (Chapter 6).

EXAMPLE

Determining the end of LIHTC periods

First year of the Credit Period	2016
End of the Credit Period	2025 (2016 + 9 years for a total of 10 years)
End of Compliance Period	2030 (2016 + 14 years for a total of 15 years)
End of Extended Use Period (min.)	2045 (2016 + 29 years for a minimum total of 30 years)

HOME Affordability Period

The Affordability Period is the length of time that a HOME-assisted project must meet the requirements of the HOME program. The affordability period is like the LIHTC Compliance Period in that the owner must comply with HOME Program requirements including rent limits, tenant income limits, tenant lease protections, affirmative marketing, and property standards. Depending on the type of HOME project and the amount of the HOME investment, the affordability period can be different lengths of time. Most IFA projects have a 20-year HOME Affordability Period. The HOME Contract or your IFA Compliance Officer can clarify the Affordability Period commitment for a specific HOME project.

Note: For LIHTC projects with HOME funds, the first year of the Affordability Period may not be the same as the first year of the Credit Period (see example below).

EXAMPLE

Overlapping time periods at an LIHTC/HOME project

LIHTC Minimum Set-Aside

Every LIHTC property has a minimum set-aside (MSA). There are three options available in Iowa: the 20-50 test, the 40-60 test and the Average Income test. The minimum set-aside that must be met is elected by the owner on the IRS form 8609, line 10(c). The 8609 is a key compliance form issued by IFA and then completed by the owners and submitted to the IRS when credits start to be claimed.

HOW THE MINIMUM SET-ASIDE WORKS

The diagram illustrates the process of selecting a minimum set-aside (MSA) on IRS Form 8609. It shows three options: 20-50, 40-60, and Average Income. Each option is linked to a specific requirement box:

- 20-50:** 20% of units, minimum, must be LIHTC. 50% is the income and rent limit for ALL LIHTC units.
- 40-60:** 40% of units, minimum, must be LIHTC. 60% is the income and rent limit for ALL LIHTC units.
- Average Income:** 40% of units, minimum, must meet the owner-assigned designation for each unit. 60% is the average income and rent limit designation for ALL LIHTC units, which may be 20-80% (in even 10% increments).

The background shows the relevant section of Form 8609, 'Part I Allocation of Credit', specifically line 10(c) 'Elect minimum set-aside requirement (section 42(g)) (see instructions):'. The form also includes a 'Caution' box stating that these elections are irrevocable once made.

Once the project has been allocated an LIHTC award, the minimum set-aside election cannot be changed as this election is reflected in both the project’s Carry-Over Agreement and the recorded LURA. Please note that, as the name indicates, the MSA requirements are *minimums* only. Most projects have more than the minimum number of required LIHTC units and may have more restrictive income limits on some units. The LURA for the property may require that you meet additional income and rent limits restrictions and/or an additional number of low income units.

In order to determine how the minimum set-aside is met for your project, you must understand how the minimum set-aside is to be calculated. Each building in a project will receive its own Form 8609. Unless otherwise elected on Form 8609, each building in a project will be treated as its own entity/project. Line 8b reads, “Are you treating this building as part of a multiple building project for purposes of section 42?” The owner can choose to group buildings that are within the same allocation into one entity/project or divide them into separate entities/projects by selecting “yes” on line 8b by attaching a separate document that identifies which buildings should be included as part of the multiple building election.

A project that has multiple buildings can be divided in the following ways:

- All buildings in the project are treated as one entry/project for LIHTC compliance and calculation purposes (See example A below).
- All buildings in the project are treated as separate entities/projects for LIHTC compliance and calculation purposes.
- Buildings can be any combination of the above options, where some of the buildings are treated as one entity/project and some buildings are treated as separate entities/projects.

Answering “no” on line 8b on Form 8609 in a multiple building project indicates that even though each building was part of the same tax credit allocation, they are viewed by the IRS as being at least two separate entities/projects for purposes of LIHTC compliance and allocation purposes (See Example B below).

There are several compliance issues that are affected by this election including how the minimum set-aside is met, unit transfers between buildings and calculating income limits that will be discussed throughout the manual.

EXAMPLE A:
The MSA at a multi-building project

b Are you treating this building as part of a multiple building project for purposes of section 42 (see instructions)? Yes No

3 BINs, 33 Units Each
Total 99 Units
40/60 MSA

$99 \times .40 = 39.6$
40 Units must be LIHTC

BLDG A

BLDG B

BLDG C

EXAMPLE B:
The MSA at single-building projects

b Are you treating this building as part of a multiple building project for purposes of section 42 (see instructions)? Yes No

3 BINs, 33 Units Each
Total 99 Units
40/60 MSA

$33 \times .40 = 13.2$

14 LIHTC per BIN
TOTAL OF 42

BLDG A

BLDG B

BLDG C

EXAMPLE C:
The MSA at a multi-building Average Income project that is 100% LIHTC

b Are you treating this building as part of a multiple building project for purposes of section 42 (see instructions)? Yes No

2 BINs, 15 Units Each
Total 30 Units
Average Income MSA

All LIHTC unit designations must average 60% or less

$[4 \times 30\%] + [4 \times 40\%] + [2 \times 50\%] + [10 \times 60\%] + [4 \times 70\%] + [6 \times 80\%] \div 30 = 58\%$

$30 \times .40 = 12$
12 units must meet their designation for the project to meet the MSA

BLDG A

30%	60%
30%	60%
40%	70%
40%	70%
50%	80%
60%	80%
60%	80%
60%	80%

BLDG B

30%	60%
30%	60%
40%	70%
40%	70%
50%	80%
60%	80%
60%	80%
60%	80%

If the entity/project does not meet the minimum set-aside requirement during the first year of the Credit Period, the IRS states that the entity/project (as defined by the 8b election) is prohibited from ever claiming the tax credits for that entity/project. Subsequent violations of the MSA result in the loss of credits for the year that the MSA is not met as well as recapture penalties.

Note: A three-building development may be: 1) one project 2) a two-building project and a single building project, or 3) three single-building projects, depending on the multi-building elections on form 8609 8(b). This election is important and relates to the selection of income limits (see Chapter 2), unit transfers (Chapter 4) and other compliance rules.

Deep Rent Skewed Properties

In addition to the MSA, an owner may choose to commit to even lower limits for some units for the project. This is referred to as a Deep Rent Skewed project. If a project is Deep Rent Skewed, this will be indicated on the 8609, line 10(d).

The following three things are true of a Deep Rent Skewed project:

1. 15% of the low income units in the property are occupied by households whose income is at or below 40% tax credit income limits.
2. The gross rent for the 40% units will be calculated based on the 40% income limit.
3. The gross rent for the 40% units must not exceed one-half of the gross rent for any non-LIHTC units in the project.

There are further and potentially severe implications that come with the decision to select the Deep Rent Skewed election. Chapter 2 will further discuss the rent requirements and Chapter 4 will cover unique recertification and Available Unit Rule requirements for these projects.

The image shows Form 8609, 'Low-Income Housing Credit Allocation and Certification'. It is a form used to allocate credit for low-income housing. The form includes sections for Allocation of Credit, Maximum Housing Credit, and Minimum Set-Aside Requirement. A red circle highlights the '15-40' option under the 'Elect deep rent skewed project' section.

EXAMPLE

Number of Deep Rent Skewed units at a 100% LIHTC property

Total # of Units:	100	
Minimum Set-Aside:	40-60	
Applicable Fraction:	100%	
# of LIHTC Units:	100	(100% x 100 total units)

If the Deep Rent Skewed election is made on this property, the election must be applied to the LIHTC units.

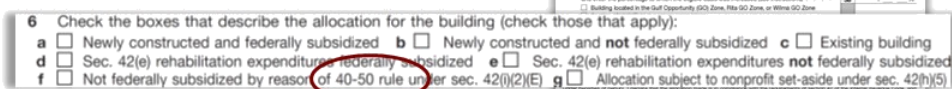

Deep Rent Skewed Election:	15-40	
Minimum # of 40% Skewed Units:	15	(15% x 100 LIHTC units)
LIHTC units above 40% & below 60%:	85	(100 total LIHTC units -15 Deep Rent Skewed units)

40-50 Set-Aside

For projects that received their 8609s between 2003 and 2008, HOME and NAHASDA (a HUD Native American Housing program) projects were types of funding that resulted in 4% credits when combined with the LIHTC. There was a special set-aside created that allowed some of these projects to claim 9% tax credits. The set-aside required that 40% of the units in EACH BUILDING be rented to households below the 50% limit. **NOTE:** Rents are not necessarily based on 50% limits and can be charged based on the minimum set-aside limit (See the project’s LURA for further clarification).

It can be determined if this rule applies to a project by checking a building’s 8609, line 6(f), which indicates that the building is subject to the “40-50 rule.”

A change to the law in 2008 eliminated the need for this rule for projects placed in-service from then on. Only tax-exempt bond-funded projects and acquisition credits now trigger 4% credits. However, older HOME and NAHASDA properties that are 9% by virtue of this exception will still need to maintain it.

Vital Note: This is a LIHTC rule, not a HOME rule. Because of some similarities to HOME rules (such as having 50% set-aside units), some managers have allowed the number of very-low units to decrease below 40% in some buildings. HOME units may float and may require fewer very-low units. If the 40-50 rule is violated, over half of the credits may be disallowed by adjusting the 9% to 4% credits, and the IRS indicates that there may be no way to correct the noncompliance.

EXAMPLE

40-50 Rule

In two 10-unit buildings, 4 must be rented in each building to people below the 50% limit to satisfy the 40-50 rule and continue to support full 9% credits.

Agency Covenants

LIHTC

In addition to the minimum set-aside elected for a property, there may also be additional state set-asides made during the allocation process. It is very important to determine if a property has any additional state income limit and/or rent restrictions, known in Iowa as *agency covenants*.

IFA has numerous agency covenants that may apply in terms of income and/or rent restrictions above and beyond the minimum set aside election made on Form 8609. If there are additional agency covenants for a property, they are noted in Section 5 of the LURA. In newer projects, there may be further definitions applicable to the agency covenants, such as indicating a certain number of bedrooms at a certain AMI limit (for example two 2-bedrooms at 30%, two 2-bedrooms at 40%).

If additional agency covenants are applicable, they must be maintained throughout the Extended Use

EXAMPLE

Income Averaging with Agency Covenant Units

In two 20-unit buildings, the owner selected the Average Income election on Form 8609. During allocation the owner agreed to restrict 6 units to 30% AMI income and rents. The 8b election on Form 8609 states that each of the two buildings is treated as a separate project. While the 30% units are not required to be split between the two buildings, for purposes of meeting each projects' minimum set-aside, care must be taken when filling the other units to ensure that the average in each building is at 60% or less to avoid violating the federal MSA rule.

Period according to the details outlined in the LURA. These additional agency covenants will be monitored by IFA in a manner much like the federal LIHTC requirements (See Chapter 4 -Other Rules for further details). Noncompliance with these provisions will not be reported to the IRS or put tax credits at risk. However, IFA will issue a *State Notice of Noncompliance* in the case of violations of state covenants (see Chapter 6 for further details).

HOME

The HOME program distinguishes between units that have been assisted with HOME funds and units that are not assisted with HOME funds. When HOME funds are committed to a project, the PJ

determines the total number and the type of units by bedroom size that will receive HOME funds. Sometimes these restrictions differ from the minimum requirements of the HOME rules. IFA considers these units to be governed by “project rules” not unlike the Agency Covenants found in LIHTC projects. The project rules will include the number of units that are High or Low HOME and will also note if the HOME units are Fixed or Floating units. This information is normally found in Exhibit A of the HOME Regulatory Agreement.

High and Low HOME Units

Home projects may have High and Low HOME units. During the Affordability Period, owner/managers are required to determine that all residents that will be residing in a HOME unit have a combined household income that does not exceed the applicable HOME limit prior to occupancy. Changes of income may also require changing HOME designations. Owner/managers must also ensure that the rents charged for HOME units do not exceed the applicable HOME rent limit for the unit.

The HOME program uses two specific income limits, very-low Income limits and low Income limits. Both types of limits are published by HUD on their website. As a service to its HOME properties, IFA also publishes the HOME income and rent limits.

- **Very-low income limits (VLI)** are 50% of the Area Median Income (AMI). Very-low Income households must not exceed the very-low income limits of 50% AMI. These households qualify as Low HOME units.
- **Low income limits (LI)** are 80% of the AMI. Low Income households must not exceed the low Income limits of 80% AMI. These households qualify as High HOME units.

Low HOME units that house *very-low income* households are subject to Low HOME rent limits. High HOME units that house *low income* households are subject to High HOME rent limits.

If a HOME property has at least five HOME units, at least 20% of the HOME units must be Low HOME. The remainder can be High HOME. The HOME Contract may require a certain number of units of a specific bedroom size at a certain limit or that a higher number of units be designated as Low HOME units for the entire affordability period. The required HOME High/Low mix information can generally be found in the HOME Contract (See Exhibit A). If this designation is not clearly indicated in the HOME Contract, consult your IFA Compliance Officer for further assistance.

Fixed or Floating HOME Units

Every HOME project is either designated as having fixed or floating HOME units.

- **Fixed HOME:** HOME properties with fixed HOME units will have specific HOME units that will never have to change their designation to a non-HOME unit. They may, however, change from High to Low HOME status. Non-HOME units in these projects are never subject to HOME restrictions.
- **Floating HOME:** A property with floating HOME units must maintain a mandated mix of HOME units throughout the property, but specific units may switch status. HOME units may change from High to Low HOME and HOME units and non-HOME units may be exchanged as necessary to maintain compliance.

EXAMPLE**Floating HOME Property**

During initial occupancy of a project, unit 201 is assigned as a HOME unit. If circumstances require, in the future comparable unit #202 can be designated HOME and #201 can become non-HOME.

EXAMPLE**Fixed HOME Property**

During initial occupancy of a project, Unit 101 is assigned as a HOME unit. Unit 102 is designated non-HOME. Unit 101 will keep its designation as a HOME unit for all of the affordability period. Unit 102 will remain non-HOME.

HOME program rules relating to steps to take when household income increases after move-in are particularly sensitive to whether the property is fixed or floating HOME (see Chapter 4 for further details).

As with the mix of High and Low HOME units, the floating/fixed designation can generally be found in the HOME Contract for a project. If this designation is not clearly indicated in the HOME Contract (See Exhibit A) or if you have any questions about your project's fixed or floating HOME status, consult with your IFA Compliance Officer.

Leases

LIHTC Non-Transience

LIHTC housing is not to be "transitory," or temporary. For this reason, tax credit properties are required to have an initial lease of at least six months for all new move-ins. Of course, the initial term can be more than six months, with a year term being the most common in Iowa. After the initial term, owner/managers are free to apply terms of their choice if no provision of the lease violates LIHTC requirements or Fair Housing law. Other funding programs at LIHTC projects, such as project-based Section 8, often dictate that a specific lease must be used. These leases do not conflict with LIHTC requirements and can be used.

There are exceptions to the six-month lease rule for qualified Single Room Occupancy (SRO) units or if the project was developed for transitional housing. The minimum initial lease term in these special cases is one month. If you have an SRO or transitional housing project, check your LURA or contact your IFA Compliance Officer to ensure that your project is designated in such a way that it can meet one of these exceptions and apply the lesser lease term.

LIHTC Lease Termination

The LIHTC rules prohibit "the eviction or the termination of tenancy (other than for good cause)" of LIHTC residents during the entire Extended Use Period and three years after. This clearly prohibits eviction or termination of tenancy mid-lease without good cause. What about when a lease is up for renewal? Is simply not renewing a lease that has expired "eviction" or "termination of tenancy"? The IRS has clarified that "neither the owner nor the tenant is obligated to renew a lease once it expires" and

that nonrenewal of leases does not necessarily equate to “termination of tenancy.” [8823 Guide 26-4] If an owner intends to non-renew a lease, they will have to ensure that doing so is acceptable under state law. Iowa Code *Chapter 562A Uniform Residential Landlord and Tenant Law Part II Landlord Remedies* provides guidance to landlords as to what circumstances they are, by Iowa law, able to lawfully terminate a lease. Feel free to check with your IFA Compliance Officer if you have questions relating to your LIHTC leases. Please be aware, however, that IFA will not be able to give legal advice on federal or state law. Competent counsel should be sought on most questions relating to leasing specifics.

HOME Leases

A written lease agreement must be provided for tenants of HOME-assisted units. Please note that program service agreements and personal responsibility agreements are not leases. The terms of the lease must be for a minimum of one year unless the tenant and owner agree to a lesser term. However, the terms of the lease can never be less than 30 days.

During the development period of a HOME project, the property’s initial HOME lease is approved by IFA. Any changes made to the lease during the Affordability Period must be submitted to your IFA Compliance Officer for review to ensure compliance with HOME lease requirements listed below. IFA will also review the HOME lease for a property when an owner/manager submits it for review during your compliance audit to ensure continuing compliance with HOME lease rules.

HOME has required lease clauses and also prohibits other provisions. In order to ensure HOME units meet the leasing provisions, IFA has developed a lease addendum to accompany the owner-developed lease. This is a required form. The IFA *HOME Lease Addendum* must be signed by all tenants and management of HOME-assisted units and accompany the lease. The only exception to the requirement to use the IFA HOME lease addendum is for HUD projects using HUD model leases. These may use the HUD-approved leases without the IFA HOME addendum.

Required HOME Lease Clauses

- 1. Required Term:** Leases must be executed for at least one year unless the owner/manager and the tenant agree to a shorter period. If the tenant has agreed to a different lease term, that agreement should be noted in writing in the tenant’s file. A lease may *not* be for a period of less than 30 days.
- 2. HOME Rents:** The lease must specify the initial allowable HOME rents.
- 3. Rent Changes:** The lease must clearly state that the owner/manager reserves the right to adjust rents, based on changes in the HOME limits, or in the event a tenant’s income increases above the applicable HOME income limit.
- 4. Income Eligibility/Annual Recertification:** The lease must state that the tenant’s failure to cooperate in the income recertification process is a violation of the lease.
- 5. Annual Unit Inspections:** The lease must state that the owner retains the right to inspect, and to permit the PJ and HUD to inspect, HOME-assisted units.
- 6. Lead Warning:** For projects that were built prior to 1978, the lease must include a Lead Warning Statement.

Prohibited HOME Lease Clauses

1. **Agreement to Be Sued:** Agreement by the tenant to be sued, to admit guilt, or to a judgment in favor of the owner in a lawsuit brought in connection with the lease.
2. **Treatment of Property:** Agreement by the tenant that the owner may seize or sell personal property of household members without notice to the tenant and a court decision on the rights of the parties. This provision does not apply to disposition of personal property left by a tenant who has vacated a property. The owner may dispose of personal property in accordance with state law.
3. **Excusing Owner from Responsibility:** Agreement by the tenant not to hold the owner or the owner's agents legally responsible for any action or failure to act, whether intentional or negligent.
4. **Waiver of Notice:** Agreement of the tenant that the owner may institute a lawsuit without notice to the tenant.
5. **Waiver of Legal Proceedings:** Agreement of the tenant that the owner may evict the tenant or household members without instituting a civil court proceeding in which the tenant can present a defense, or before a court decision on the rights of the parties.
6. **Waiver of a Jury Trial:** Agreement by the tenant to waive any right to a trial by jury.
7. **Waiver of Right to Appeal Court Decision:** Agreement by the tenant to waive the tenant's right to appeal or to otherwise challenge in court a court decision in connection with the lease.
8. **Tenant Chargeable with the Cost of Legal Actions Regardless of the Outcome:** Agreement by the tenant to pay attorney's fees or other legal costs, even if the tenant wins in a court proceeding by the owner against the tenant. The tenant may be obligated to pay costs if the tenant loses.
9. **Require Tenants to Accept Supportive Services:** (with an exception for transitional housing residents).

Non-Renewal/Eviction

An owner cannot terminate the tenancy or refuse to renew the lease of a tenant except for serious or repeated violation of the terms and conditions of the lease, for violation of applicable Federal, State, or local law, or for other good cause. Any termination or refusal to renew must be preceded by not less than 30 days by the owner's service upon the tenant of a written notice specifying the grounds for the action.

The 30-day waiting period is not required if the grounds for the termination or refusal to renew involve a direct threat to the safety of the tenants or employees of the housing, or an imminent and serious threat to the property (and the termination or refusal to renew is in accordance with the requirements of State or local law).

Leases

The image shows three identical checklists for property types. Each checklist is titled "My property is:" and has a sub-header "Check which applies:". Below the sub-header are three boxes, each with a blue checkmark. The first box is checked in the first checklist, the second in the second, and the third in the third. Below each box is a label: "LIHTC only", "HOME only", and "LIHTC & HOME".

For LIHTC-only properties:

Term: The initial lease term for new move-ins must be no less than 6 months.

Notice of termination:

Follow state law when giving notice of termination of tenancy.

For HOME-only properties:

Term: The initial lease term for new move-ins must be a year unless a lesser term is negotiated. In no case can the initial term be less than 30 days.

Notice of termination:

Notice of termination must never be less than 30 days without good cause.

For LIHTC/HOME units:

Term: The initial lease term for new move-ins must be a year unless a lesser term is negotiated. In no case can the initial term be less than 6 months.

Notice of termination:

Notice of termination must never be less than 30 days without good cause.

Fair Housing

LIHTC and HOME properties must follow fair housing laws, and violation of the Fair Housing Act can result in the loss of tax credits. Credit loss does not occur with an accusation of discrimination under the Fair Housing Act, but rather when there is a final adverse determination by an authoritative agency including HUD, a state or local Fair Housing agency substantially equivalent to HUD or a Federal Court.

If an owner/manager or a resident of Iowa affordable housing suspects a violation of the Fair Housing Act, they should report it to HUD or Iowa’s Civil Rights Commission. IFA cannot handle these legal issues. Below are several links to various organizations’ websites that may be of assistance.

- *The HUD-Fair Housing/Equal Opportunity Office* investigates complaints and helps individuals obtain agreements to resolve complaints and acts as needed to enforce the law. Their website is https://www.hud.gov/program_offices/fair_housing_equal_opp/complaint-process.
- *The Iowa Civil Rights Commission* provides information on filing a housing complaint. Their website is <https://icrc.iowa.gov>, keyword search “housing discrimination complaint process.”
- *HOME, Inc.* a non-profit agency located in Des Moines, also provides free tenant-landlord mediation services. See their website www.homeincdsm.org for further details.

Occupancy Restrictions

Fair housing does not prohibit restrictions or preferences being applied to new residents, as long as these criteria do not violate federally protected classes. General Public Use provisions under the LIHTC program, however, are more restrictive than Fair Housing. LIHTC properties must be available to all. Occupancy restrictions or even preferences cannot be applied for specific groups (for example an employer or trade group such as teachers or police) unless the group fits into one of the three following categories.

1. Persons with special needs.
2. Persons who meet federal or state program requirements.
3. Persons involved in artistic and literary pursuits.

Affirmative Fair Housing Marketing Plan (AFHMP)

The purpose of affirmative marketing is to reach those least likely to apply and meet fair housing requirements. The practice of affirmative marketing includes the development of marketing procedures to attract applicants from all protected classes.

While affirmative marketing is not a requirement of the LIHTC program, an approved AFHMP is required for all HOME properties and for LIHTC properties allocated credits in 2009 or later. Properties older than 2009 may develop a plan, but do not need to submit the AFHMP to IFA for approval.

The most recent version of the HUD Form 935.2a *Affirmative Fair Housing Marketing Plan (AFHMP) – Multifamily Housing* must be used. This form is designed to help the owner/manager use Census Bureau data to determine percentages of persons who live in your community who may be in a protected class. The Plan then helps examine the makeup of residents of the property based on the same classes. This helps identify and develop a plan to reach out to those unlikely to apply. For IFA properties subject to the AFHMP requirement, this form must be submitted to IFA for approval during the process of developing the property. Updates are required every five years and must be submitted to your IFA Compliance Officer for approval.

IFA NOTE:

All properties are required to market to Persons with Disabilities in addition to other populations that exist in the housing area.

VAWA 2022

The Violence Against Women Act of 1994 (VAWA) is a United States federal law that provides funding and rules designed to investigate and prosecute violent crimes and to protect victims of such crimes.

VAWA was reauthorized in 2000, 2005, 2013 and 2022. The 2005 version first introduced provisions that applied to housing. Specifically affected were the Section 8 programs and public housing.

The 2013 reauthorization greatly expanded the housing programs covered by the Act to include LIHTC and HOME-funded housing. Final guidance was released by HUD in the Federal Register (Vol. 81, No. 221) on November 16, 2016. This guidance has been incorporated in the following pages.

With the 2022 reauthorization, HUD was instructed to set up a Violence Prevention Office with a Violence Against Women Act Director. The law also requires HUD and the Department of Justice to

enforce VAWA consistent with, and in a manner that provides the same rights and remedies as those provided for the Fair Housing Act.

Despite its name, VAWA protects both male and female victims.

The VAWA established two specific provisions for victims of domestic violence. The first provision requires that “an applicant for or tenant of assisted housing under a covered housing program may not be denied admission to, be denied assistance under, terminated from participation in, or evicted from housing on the basis that the applicant or tenant is or has been a victim of domestic violence, dating violence, sexual assault, or stalking if the applicant or tenant otherwise qualifies for admission, assistance, participation, or occupancy.”

The second provision requires that leases be bifurcated, allowing eviction or termination of assistance for the perpetrator of the violent crime while retaining the victim. Remaining members of the household are given a chance to qualify for the housing they reside in. If they do not qualify without the perpetrator, then they must be given a reasonable time to find other housing or to establish eligibility under another covered housing program.

A victim is not protected from eviction or termination based on their own lease violations or good cause unrelated to the violence of which they were a victim.

HUD Guidance Effective December 16, 2016

Four new forms were created to implement the new VAWA requirements.

Appendix A: HUD 5380 Notice of Occupancy Rights under the Violence Against Women Act

The HUD 5380 provides information to the applicant or tenant of their rights under the VAWA. This form replaces the HUD-91066 form that has been required by IFA since 2015. It is initially to be provided to applicants and households as follows:

- At move-in, if their move-in date was after 12/16/2016 *or*
- During the household’s annual recertification or lease renewal process *or*
- With the execution of the Student Status certification for 100% LIHTC projects with no agency covenants and when no recertification is required.

NOTE: When the owner/manager is considering taking a negative action against a household, the household must be given the HUD 5380 Notice of Occupancy Rights under the Violence Against Women Act. For example, a negative action might include instances when an application is denied, or if assistance is denied for properties with rental assistance, if rental assistance is terminated or when notifying of eviction. This allows victims to disclose that the reasons for the negative action may be related to the applicant or resident being a victim of violence.

Appendix C: HUD 5382 Certification of Domestic Violence, Dating Violence, Sexual Assault or Stalking and Alternate Documentation

The HUD 5382 form must be provided to the applicant or tenant at the time that you distribute the HUD-5380.

- The form may be completed by the applicant or tenant seeking to invoke their VAWA rights or someone doing so on their behalf.
- The form states that the household member may be asked (*but not required*) to provide third-party documentation if doing so potentially puts them at risk of further violence.
- This form must be used “as is” and care must be taken that the most current version is being used.

Appendix D: HUD-5383 Emergency Transfer Request for Certain Victims of Domestic Violence, Dating Violence, Sexual Assault or Stalking

The HUD-5383 form is to be distributed to and completed by any household member who is seeking an emergency transfer while residing in your project.

HUD advised that the owner/agent MAY require tenants to provide a written emergency transfer request. You may also accept other written or oral requests for a transfer. IFA suggests that this policy be made clear in your tenant selection plan and applied consistently.

You MAY ask for, but MAY NOT require third-party documentation if they refuse or do not have the documentation; the form lists a variety of acceptable documentation. The form advises the tenant that they only need to provide documentation if it is safe for them to do so.

Appendix B: HUD 5381 Model Emergency Transfer Plan for Victims of Domestic Violence, Dating Violence, Sexual Assault or Stalking

All properties were to have developed and implemented a model Emergency Transfer Plan by Jun 14, 2017, using the HUD 5381 as a model. The plan allows victims to transfer to another available and safe unit assisted under a covered program. The tenant must expressly request the transfer and reasonable confidentiality measures must be incorporated to prevent the perpetrator from discovering the location of the new unit. Situations where a transfer would be allowed might include:

- Tenant reasonably believes that they are threatened with imminent harm of further violence if they remain in their current unit.
- A sexual assault occurred on the premises within 90 days prior to the request for transfer.

The plan must establish recordkeeping and reporting requirements. Documentation relating to a victim must be maintained in confidence and may not be entered into any shared database or disclosed to any other entity. Exceptions are applicable if:

- The victim requests or consents to disclosure
- The documentation is required in the bifurcation eviction proceedings, or
- Otherwise, as required by applicable law.

CAUTION!

VAWA and Tax Credit Loss

Lack of compliance with VAWA is **not** grounds for loss of tax credits. However, there have been violations of victims’ rights under VAWA that HUD has determined to **also** be discrimination under the Fair Housing Act as gender, race, or national origin discrimination. If HUD finds a VAWA violation to also violate Fair Housing, then credits are at risk.

HUD 91067 Lease Addendum

The existing HUD 91067 is to be utilized until an updated document is released by HUD.

- The lease addendum must be signed by all adult household members that are required to sign the lease agreement according to your management policy.
- The lease addendum must also be signed with the same frequency as your other lease addendum. It is a good practice to review this policy with your tenants annually during the lease renewal process.

Acknowledgment of Receipt of HUD Forms 5380 and 8382

Each adult household member must be given IFA Form Acknowledgement of Receipt of HUD Forms 5380 and 8382 at move-in. An attempt must be made to obtain the signature of the appropriate household members and the management representative to indicate their receipt of the VAWA forms.

When Combining Programs

This manual addresses issues that an owner/manager will meet when combining LIHTC with HOME funds. However, properties in Iowa commonly have additional programs or funding sources such as HUD or Rural Development. When there are two or more programs combined, ensuring that the pieces fit can seem like a puzzle. It is important to understand all the rules for each program at a property in order to start seeing the pattern and to complete the puzzle. There are several possible ways that rules from different programs will relate to one another at a property. These include:

1. There is no corresponding rule.

EXAMPLE

One program has a rule that the other does not

Example 1: HUD housing programs (like Section 8) have citizenship requirements: The LIHTC and HOME programs do not have explicit citizenship requirements and do not object to the application of citizenship standards if they are required by your HUD program.

2. Programs adjust by design.

EXAMPLE

One program has a rule that adjusts to another program rule

The LIHTC rules require that tax credit properties with RD or HUD funding use the utility allowances from HUD or RD for LIHTC purposes (see this Manual Chapter 2).

Response: Use the rules as adjusted.

3. There are corresponding rules:
 - A. There are corresponding rules between the programs, and one is simply more restrictive than the other.

EXAMPLE

One program has a more restrictive rule

Some program income limits are higher than others (see Chapter 2).

(A household that moves in under the 50% income limit imposed by one program is also below the 60% limit that may apply to another program.)

HUD Section 8, Section 811 and the Housing Trust Fund (HTF) - Use of 30% Income and Rent limits:

Although HUD publishes both 30% and 80% (*low-income*) limits, these are rounded in a way that may be inconsistent with LIHTC use. It is also important to know that, by statute, HUD's *extremely low-income* limit (ELI), although often referred to as 30% limits, can be as low as the 30% area median income but could be higher based on the poverty level in the area. There is a cap at 50% area median income (also known as *very low-income*). HUD Section 8 has income targeting requirements that require forty percent (40%) of all anticipated new move-ins each year to be at ELI limits. The HTF and Section 811 limits are also ELI. As these limits are flexible, but capped at 50%, they should only be assigned as 50% designated LIHTC limits and not 30% or 40%.

Additionally, the RD program uses the 80% *low income* HUD limits as well as "moderate income" to units by adding \$5,500 to the 80% AMI. Care should be taken when combining RD with an Average Income LIHTC project as using the 80% or *moderate income* RD designations in LIHTC 80% units would trigger noncompliance with the LIHTC program.

Response: The most restrictive rule that satisfies both programs is applied.

B. There are corresponding rules that are different, each is applied independently.**EXAMPLE****Both programs have different, but not conflicting, rules**

Example 1: HUD, RD and HOME all have student rules that are completely different from the LIHTC student rules (see Chapter 3).

Example 2: In Iowa, tax exempt bonds have the same minimum set-aside options as pre-2018 tax credit projects did; 20-50 and 40-60. Unlike the LIHTC MSA election, which interacts with the applicable fraction to determine the level of credits to be claimed, bond properties only must house the requisite percentage of units (20-50 or 40-60) to retain their tax-exempt status.

Bond projects do not have the Average Income MSA option added in 2018 which means that the bond MSA may not coincide with the tax credit MSA. If a bond project selects the Average Income option on Form 8609, the owner/manager will have to watch carefully to ensure that, *at a minimum, at least* the minimum number of units will be below the 60% MTSP limits.

To illustrate: Sarasota Villa's, a tax-exempt bond project, elected the 40-60 MSA at allocation. The project consists of 10 units in one building. However, the owner determines that they will elect the Average Income Test at the property to take advantage of the higher rents the project would be able to achieve with the higher 70-80% households.

To meet their Bond requirements, at least 4 of the 10 units must be rented to households at 60% or less in order to meet their minimum set-aside requirement.

If the project designates 2 units at 80%, 1 unit at 70%, 2 units at 60%, 1 unit at 40% and 1 unit at 30%, and the remaining 3 units as market rate, 7 of the 10 units are designated as LIHTC and their average income percentage is 60% thus satisfying both the bond and the LIHTC requirements.

Response: BOTH sets of rules must be applied independently for households that want to move into a project with tax credits and any of these other funding sources.

4. **The rules conflict.** In a situation where the rules conflict, it is imperative to talk to all the important players (the owner, investors, IFA, other regulators) to establish if an approach can satisfy all parties. Ultimately, it is the owner who chose to integrate the different programs; they will have to decide which program violation represents the greatest risk and therefore which action to take.

It is generally beyond the scope of this guide to discuss any programs other than the LIHTC and HOME. However, to assist in putting the pieces together for owner/managers with other programs, we have included a "Combined Programs" research tool as an attachment to this manual. This provides a summary of several important rules that are applicable to HUD Multifamily, Rural Development, tax exempt-bond, LIHTC and HOME programs. It also provides references to federal guidance for further understanding of each rule. This will go a long way in helping an owner/manager to decide how the program rules should interact.

Chapter 2- Income Limits & Rents

A very important aspect of determining if households are eligible for affordable housing is ensuring that they have household income that is at or below income limits. These limits differ by program.

Source of Limit Data

HUD publishes median income information for each Iowa county or metropolitan statistical area in the state annually. HUD metropolitan statistical areas are metropolitan areas that may include multiple counties in one "area". HUD's metropolitan statistical area is abbreviated *MSA* but is not to be confused, based on context, with the Minimum Set-Aside for a project, which is also abbreviated *MSA* at times by the IRS (see Chapter 1 for a discussion of Minimum Set-Asides). To avoid confusion in this chapter, we will spell out *minimum set aside* in all cases.

LIHTC (along with tax-exempt bond) program income limits are referred to as Multifamily Tax Subsidy Program (MTSP) limits.

EXAMPLE

An IFA printout with features to assist with selecting LIHTC limits

County

If HERA Special limits apply, they will be listed (for projects placed in service in 2008 or earlier).

MTSP Limits
When HERA special limits do not apply.

LIHTC income and rent limit options

140% limits for the Available Unit Rule
Apply:
140% of the 50% limit for 20-50 projects.
140% of the 60% for 40-60 properties and Average Income 20% - 60% designations as well as 140% of 70% or 80%, respectively.

Income Limits and Maximum Rents Effective April 24, 2019

ADAIR	MEDIAN INCOME (AMI)							65,400
MTSP - Income Limits by Household Size---Placed in Service AFTER 12/31/2008

140% of Income Limit (To be used during recertification only)*								
	1 Person	2 Person	3 Person	4 Person	5 Person	6 Person	7 Person	8 Person
50%	34,020	38,920	43,750	48,580	52,500	56,420	60,270	64,190
60%	40,824	46,704	52,500	58,296	63,000	67,704	72,324	77,028
70%	47,628	54,488	61,250	68,012	73,500	78,988	84,378	89,866
80%	54,432	62,272	70,000	77,728	84,000	90,272	96,432	102,704

*Please note that the 50% limits are to be used only on projects that elected the 20/50 minimum set-aside on Form 8609

HOME limits are also published by HUD but are calculated slightly differently and are referred to as Area Median Income (AMI) limits. HUD publishes separate tables for income and rent limits for the HOME program. These tables provide High and Low HOME income and rent limits.

Both sets of limits can be found on HUD websites. As a service to our partners, IFA also publishes program limits on our website. These include federal and agency covenant income and rent set-asides as well as 140% limits for the LIHTC Available Unit Rule.

LIHTC: Calculating Limits

HUD datasets contain income limits separated into two categories for each MSA or county:

1. **50% (very-low) and 60% Income Limits**
 - Select the 50% or 60% limits based on the property’s minimum set-aside (20-50 properties use the 50% limits and 40-60 properties use the 60%).
2. **HERA Special Income Limits 50% and 60% (if applicable)**
 - These limits can only be applied to projects that had at least one building in the project placed in-service prior to 01/01/09.
 - Not all MSAs or counties in Iowa have projects that are eligible to use the HERA special limits. If the HERA limits are not listed in the datasets for the project’s MSA or county income limits, the project is not eligible. Also, counties with HERA special limits may change from year to year so it is best not to assume that if you had HERA special limits one year that you will automatically have them the next (or vise-versa).

NOTE: Average Income (20% through 80% Income Limits) As of August 2019, HUD has not published a separate set of income limits for projects who elect the Average Income Test. IRS guidance on how to calculate income and rent limits can be extrapolated from Revenue Ruling 89-24 and there are no reasons to believe that the 20, 30, 70 and 80% limits should be calculated any differently.

LIHTC Code allows for some rural counties with exceptionally low income limits to use a higher *national nonmetropolitan* average limit for LIHTC properties that are not funded with tax-exempt bonds. This option has not historically applied to Iowa. If this ever changes, IFA will publish instructional notices on how to apply this special limit.

Since 2008, LIHTC limits are subject to a process called “*hold harmless*”. This process is beneficial to projects where income limits might fluctuate from year to year and helps the project to achieve

EXAMPLE

Holding harmless LIHTC limits

2016

A property, Sunny Acres, places in-service in 2016 and uses the 2016 income limits.

2017

The published limits for the area go down. Sunny Acres continues to use the 2016 limits.

A property next to Sunny Acres, Shady Lawns, places in-service in 2017. They must use the 2017 limits, which are lower than the limits allowable to the older Sunny Acres.

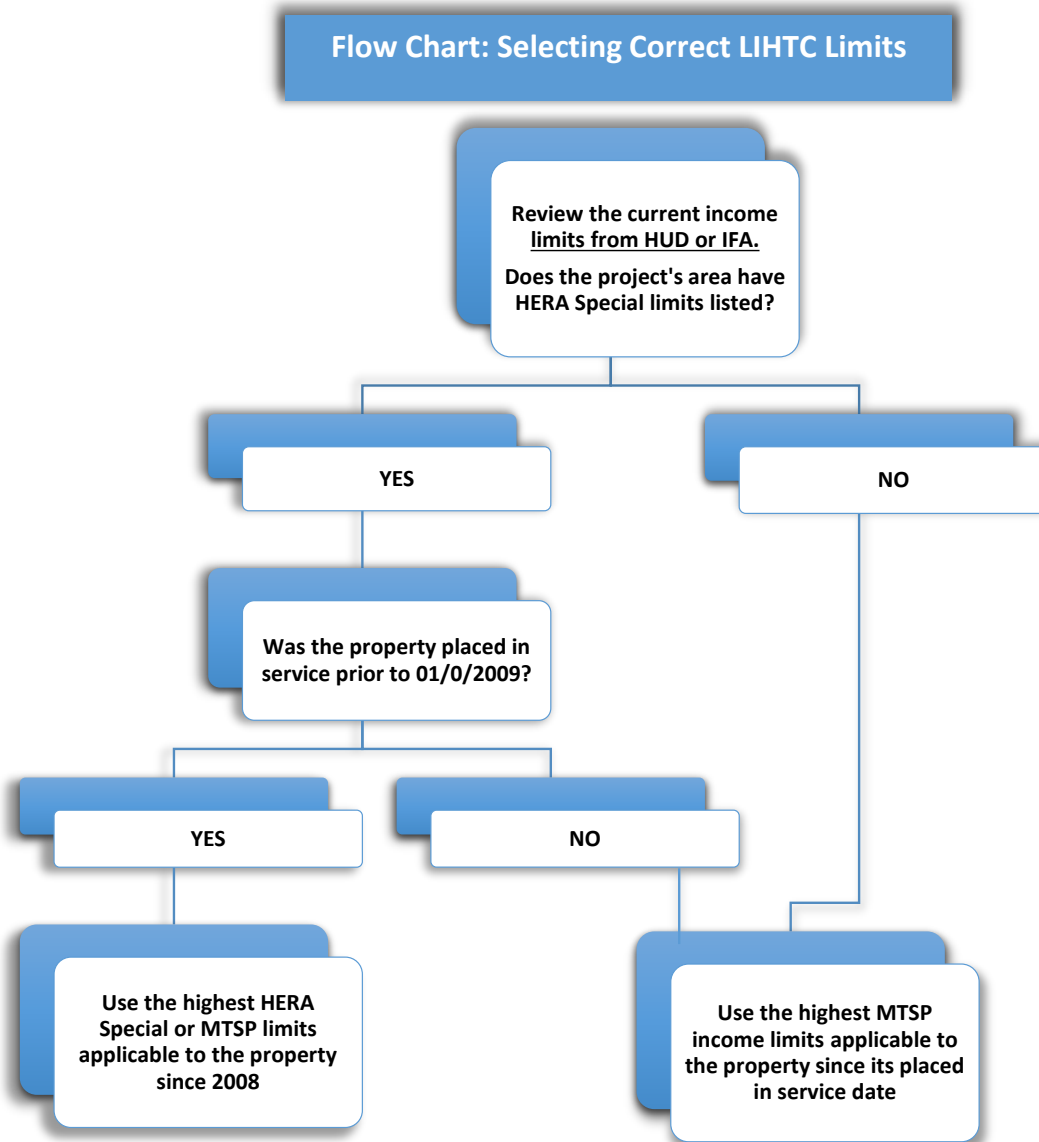

2018

In 2018, limits continue to decrease. Sunny Acres will hold harmless at 2016 levels and Shady Lawns will hold harmless at the 2017 limits.

2019

In 2019, the income limits go up and exceed the 2016 limits. Both projects will now use the 2019 limits and hold harmless to those limits.

economic stability. Hold harmless is a term that HUD uses to describe a situation where, once a project places in-service, it never has to decrease the limits that it uses from year to year. For purposes of this rule, a project “places in-service” when the first building in the project places in-service. “Project” is defined by the 8609 8(b) multi-building election (see Chapter 1, *Minimum Set-Aside* for further information on the 8(b) election).

Rent Limit Calculations

The total of tenant rent and applicable utility allowance is compared to the LIHTC rent limits. Most LIHTC personnel do not need to calculate the rent limits. For the few that have this job, we are including information on how these are calculated here.

Rent limits are based on bedroom size. They are 30% of the income limit figured as if there are 1.5 people per bedroom.

EXAMPLE:

Calculating Rent Limits

Sample 60% MTSP Limits (for examples below)

1 person – \$21,180, 2 person – \$24,180, 3 person – \$27,240, 4 person - \$30,240

Annual Rent Limits for Units with an Even Number of Bedrooms	Annual Rent Limits for Units with an Odd Number of Bedrooms
2 bedroom	1 bedroom
3 person income limit X 30%	1.5 person income limit X 30%
$\$27,240 \times 30\% = \$8,172$	Since $1 + 2 \div 2 = 1.5$, the 1 person income limit + the 2 person income limit $\div 2 =$ the 1.5 person limit $\$21,180 + \$24,180 \div 2 = \$22,680$ $\times 30\% = \$ 6,804$
Annual rent limits are finally converted to monthly amounts by dividing by 12 (if cents are rounded, round DOWN, not up).	
$\$8,172 \div 12 = \681 2 BR rent	$\$6,804 \div 12 = \567 1 BR rent

EXAMPLE

Deep Rent Skewed Maximum Rents

Non-LIHTC rent for units of comparable size	\$800
Scenario #1	
Deep-rent skewed units gross rent	\$425
Maximum allowable rent	\$400 (max rent is less than ½ non-LIHTC rent)
Scenario #2	
Deep-rent skewed units gross rent	\$325
Maximum allowable rent	\$325 (max rent is less than ½ non-LIHTC rent)

Deep Skewed Rents

As discussed in Chapter 1, Deep Rent Skewed projects have at least 15% of the LIHTC units set aside at 40% income limits. The skewed units must also have gross rent based on the 40% limits. For skewed projects with non-LIHTC units, the gross rent amounts for each 40% unit cannot exceed one-half of the

gross rent for the non-LIHTC units of comparable size in the development. Projects that are 100% LIHTC do not have non-LIHTC units, so the limits are effectively always based on the 40% set aside for these projects.

HOME: High and Low

The total of tenant rent, applicable utility allowance and tenant-based subsidy are compared to the HOME rent limits. This is unlike the LIHTC program, which *excludes* the subsidy. Only *project-based* federal or state subsidy IS NOT included in rents for very-low income, Low-HOME households who pay 30% of their adjusted income.

HOME Set-Aside Overview

Low HOME	Tenant rent + Rental assistance + <u>Utility allowance</u> = HOME Rent	High Home
<ul style="list-style-type: none"> Income Limit = 50% AMI (very-low) Rent limit = Low HOME limit 		<ul style="list-style-type: none"> Income Limit = 80% AMI (low)* Rent limit = High HOME limit
<p>Properties with 5 or more HOME units must have at least 20% of the HOME unit designated as Low HOME.</p>		

EXAMPLE

Special Rent Rule for Low HOME Project-based Subsidy

In the following scenario the difference between a tenant in a Low HOME unit and one in a unit designated as High HOME makes a big difference in how their subsidy could affect a project’s income stream.

A property with Section 8 assistance has the following applicable 1-bedroom apartment rents:

Low HOME rent	\$688
High HOME rent is	\$733
Section 8 Contract Rent	\$840

Vera moved into a HOME unit in a project where the units are fixed HOME. She pays \$300, based on 30% of her income. Her Section 8 assistance pays the rest of the contract rent (\$540). Because she is below the very-low income limits and pays rent based on 30% of adjusted income, the owner is allowed by the HOME rules to collect the \$840 full tenant rent and the Section 8 subsidy.

Four years later...

The HOME limits and Section 8 contract rents continue the same. At her fourth year’s recertification, Vera’s income increases to above the very-low (50%) limits. Her portion of the rent is now \$700. The owner is now only allowed to collect \$33 in subsidy (to meet the \$733 High HOME rent), not \$140 up to the contract rent that they would collect for a very-low income resident. The Owner must work with whoever issues the subsidy (the local PHA or HUD) as the tenant rent and subsidy are now capped at the High HOME limit.

Note: The above rule is met by units with residents below the very-low limits which are designated Low HOME per the HOME Contract. Once the Low HOME units required in the HOME Contract are designated, the remaining are High HOME units even if the households in the High HOME units are below the very-low income limits. These units are not eligible for the special rule and must not pay full contract rent. For this reason, owners of project-based subsidized properties may want to consider requesting Low-HOME designations for all HOME units when the property set-asides are being established during initial project development.

Rents charged to tenants that receive tenant-based subsidy must be the same as the rents charged to other tenants for comparable units. This means that if the owner charges less than the maximum HOME rent for HOME units not occupied by voucher holders, it can only charge that rent to voucher holders.

HOME Rent Approval Process

HOME regulations require that the PJ review and approve rents each year. IFA is responsible for approving rents in all HOME-assisted units funded through the program currently being administered by IFA. This is done to ensure that the rents comply with the HOME rent limits and do not result in undue increases from the previous year that would be difficult for low income households. Decreases in HOME limits may also necessitate a change in HOME rents; therefore, a review of rents by IFA of all HOME projects is required annually.

General Guidelines:

- All properties must report on the IFA required form *HOME Rent Approval Worksheet* anticipated rents for their project and indicate whether they are requesting an increase, reporting rent decreases or are making no changes to their current rent schedules.
- If, in addition to HOME, the project is also either a Section 8 Project-Based project or an RD project, anticipated rents must still be reported to IFA. The most recent rent approval documentation from RD or HUD must be submitted with the worksheet.
- Decreases resulting from lower HOME rent limits or increases in utility allowances must be processed immediately and no later than the effective date listed on the HOME Rent Limit documentation from HUD. Any delay in implementing a rent decrease will require repayment to the tenant of the amounts overcharged and the project will be out of compliance until such time as the rents are repaid.
- The *HOME Rent Approval Worksheet* will be due to IFA ***within 45 days*** after the release of the HOME income and rent limits to minimize the number of projects having to make mid-year adjustments when limits decrease. An email notice will be sent to all owner/management contacts when the limits have been released and all related documents posted on the IFA compliance web page.
- The effective date of a proposed rent increase must be at least one year from the effective date of the property's last approved rent increase. IFA's Certification Portal will track rent increase effective dates so that we can confirm that rent increases were approved.
- A notice to residents of management's *intention* to submit a rent increase to IFA for approval must be made available to all households in HOME units at least 15 days prior to submitting the rent increase to IFA for approval. This notice does not need to include your proposed rent amounts; it may serve as a heads-up to your residents that you are intending to request an increase which allows them a chance to talk with management prior to submission of your request for an increase.

Note: Any requests for rental increases received after the 45-day period will be automatically denied. Additionally, any project that does not submit the HOME Rent Approval Worksheet will be issued a State Notice of Noncompliance which will remain uncorrected until IFA receives the required form.

EXAMPLE

The 2017 High/Low Rent & Income Limits were released June 5, 2019 with a June 28, 2019 effective date. The new limits can be implemented immediately, but no later than June 28th.

On June 5, 2019, IFA sends a notice to all owners/managers of the release of the new limit and advises that the HOME Rent Approval Worksheet is due no later than August 12, 2018.

Shady Oaks has budgeted for a rent increase of \$10 for their 1-bedroom units. The proposed rent falls within the allowable limit. The manager sends all tenants a notice on June 30th that a rent increase is being proposed and then submits their HOME Rent Approval Worksheet to IFA on July 15th. IFA approves their rent increase on July 20th.

EXAMPLE

Rents and UAs

If the maximum gross rent on a unit is \$450 and the tenant pays utilities with a utility allowance of \$66 per month, the maximum rent chargeable to the tenant is:

\$384
(\$450 - \$66)

Gross Rent Limits

My property is:			My property is:			My property is:		
Check which applies:			Check which applies:			Check which applies:		
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
LIHTC only	HOME only	LIHTC & HOME	LIHTC only	HOME only	LIHTC & HOME	LIHTC only	HOME only	LIHTC & HOME

For LIHTC-only properties:

LIHTC limits apply.

Rent subsidy payments are not included in the rent calculation.

For HOME-only properties:

HOME High and Low limits apply.

Rent subsidy payments are included in the rent calculation.

For LIHTC/HOME units:

The lower of HOME or LIHTC limits apply. Generally, the HOME limits will be lower.

Rent subsidy payments are included in the rent calculation.

Utility Allowances

In theory, what households pay for rent and utilities must be kept at or below the maximum rent limits. In actual practice, it is impossible to know what utility usage will be for most situations, and the amounts change from month to month. To deal with this, LIHTC and HOME units where residents pay any utilities out of their pockets must have utility cost estimates assigned to units. These are called *utility allowances* (UAs). Utilities paid by residents commonly include electricity, water, sewer, oil, gas, and trash. Telephone, cable TV and internet costs which are not required as part of tenancy are considered optional items and are therefore excluded from the utility allowance. The rent that a tenant pays plus the utility allowance must not exceed the rent limits. For HOME units, tenant-based subsidy payments and project-based subsidy for High HOME units are also included when calculating gross rent (see *HOME: High and Low* section).

When all utilities are included in the household's gross rent payment and the project pays utilities, the utility allowance is zero.

IRS UA Methodologies

The IRS has offered several alternatives for calculating UAs for the Low-Income Housing Tax Credit program, as the following will discuss. The IRS and IFA do not recognize Ratio Utility Billing System ("*RUBS*") as an acceptable method for determining utility allowance. *RUBS* cannot be used when determining how a project arrives at the UAs for a HOME or LIHTC project in Iowa.

1. Projects or households with other funding that provide UAs

a. RD regulated buildings

If any unit in a project is regulated by Rural Development (RD), the UA that is part of the RD annual budget will be used for all units.

b. HUD regulated buildings

If a building does not have RD funding (see above) and is regulated by HUD and a UA is calculated each year as part of the HUD budget, the HUD project-based UA will apply. **This also includes HOME projects.**

c. PHA estimate

Residents who have a Housing Choice Voucher have a UA that is calculated by a Public Housing Authority (PHA) as part of the Voucher rent calculation. This UA must be used for Voucher holders. Additionally, the utility allowance estimates from any local PHA that provides Vouchers to the property can be used for all units at a property without RD or HUD funding. If used, these estimates must be updated within 90 days of their release by the PHA.

IFA SUGGESTS

A PHA is under no obligation to inform an owner of changes to the UA. If using PHA UA estimates, be sure to ask the PHA if there have been any changes in the UA at least every 60 days. This allows you to change rents if necessary, before the 90-day deadline.

If a project is not RD or HUD regulated, and the owner does not use a PHA estimate, then the following options are available in Iowa.

If any of the following are gathered when determining UAs for any given year, the new UAs must be used at the project for the entire year.

2. Estimate from a local utility company

An estimate may be obtained by an interested party which includes the owner/manager or a tenant. The interested party will receive a cost estimate in writing from a utility company in the same geographic area for a unit of similar size and construction. If the property is in an area that is served by multiple utility providers, the interested party can obtain a written estimate from just one utility company that offers services to the project even if multiple utility companies can provide the same utility service to the property. The initiating party must retain the original documentation used to obtain the estimate and make copies available to IFA, tenants and other interested parties.

3. HUD Utility Schedule Model (HUSM)

The HUD Utility Schedule Model (HUSM) UA is designed by engineers and HUD for use by LIHTC and HOME properties. The HUSM produces a UA that is accurate but doesn't involve getting a ton of resident utility bills or crunching endless numbers. The HUSM has been an option for tax credit properties since 2009 and one of the few allowed options for properties with HOME commitments after August of 2013. This model can be found at the HUDuser.org website, keyword search "Utility Schedule Model". When completing the Model, the property's utility rate information and the Model's zip code function must be entered to access the location and heating degree data to calculate the estimate. Rates inputted must not be older than the rates in place 60 days prior to the date the utility allowance will change. A training provided by the Iowa Finance Authority and Costello University for IFA HOME properties will provide the framework that you need to accurately enter data into the HUSM and get results acceptable to IFA. For more information, contact your IFA Compliance Officer.

4. Energy Consumption Model

The final alternative option is to retain the services of a qualified professional to calculate the allowances based on an energy consumption model. This model must take into consideration specific factors, including but not limited to, unit size, building orientation, design and materials, mechanical systems, appliances, and characteristics of the building location. The professional retained must be a properly licensed engineer or a qualified professional approved by IFA and may not be related to the building owner within the meaning of Section 267(b) or 707(b) of the Internal Revenue Code.

The use of the energy consumption model is limited to the building's consumption data for the 12-month period ending no earlier than 60 days prior to the date the utility allowance will change. For newly constructed or rehabbed buildings with less than 12 months of consumption data, consumption data for the 12-month period for similarly sized and constructed units in the geographical area in which the building is located will be used. Utility rates must be the rates in place 60 days prior to the date the allowance will change.

Additional UA Considerations

If the utility allowances increase, it may change the out-of-pocket rent owner/managers can charge their households, especially if the maximum allowable rent did not keep pace. If it turns out that the actual out-of-pocket rent must be decreased to remain in compliance, owner/managers must be sure affected households begin paying the new rent no later than the end of the 90-day period applicable to the UA method being used. When consideration is being given to which UA to use, the following should be kept in mind.

- Utility allowance Information is to be provided annually along with other IFA-required annual reporting information by March 1 of each year for existing projects. Newly placed in-service projects must submit their information by April 1st of the first year.
- Projects that are using methods 2-4 above must submit to IFA and their tenants their proposed UAs 90 days prior to the UA being implemented. IFA will acknowledge receipt of your documentation and review it for compliance with IRS regulations. You will be contacted if IFA requires further information within the 90-day period allowed by IRS regulation. An owner must entertain tenant comments during this same period. If you are not informed of any issues by IFA, the new UA may be implemented at the end of the 90 days.
- IFA requires that one UA methodology be used per property. This means that different methods may not be used for different utilities at the same property.
- Owner/managers can change the estimate options used for calculating utility allowances from one review to the next with IFA's approval.
- Any costs associated with obtaining utility allowance estimates are the responsibility of the owner unless the utility company estimate is chosen. Then, unless otherwise agreed upon by the parties involved, the costs are the responsibility of the party requesting the estimate.
- Utility allowances must be reviewed annually to ensure the estimates approximate what the households are paying. However, if the property has just been placed in-service, owner/managers are not required to review the utility allowances until the building has achieved 90% occupancy for a period of 90 consecutive days or the end of the first year, whichever is earlier. Except for the PHA-provided estimates, review of calculations need only take place one time per year even if known rate fluctuations occur (for concerns with updates on the PHA estimate, see above). However, if the owner/manager chooses to review them more frequently, they may if they follow the proper procedures.
- Owner/managers must retain any supporting determination data. Failure to retain adequate data that will allow IFA to conclude accurate allowances were used in the rent computation will result in noncompliance.

HOME UAs

HUD believes that as more projects are constructed or rehabilitated to higher energy-efficiency standards, the use of a standard utility allowance (like the PHA estimates) may not fairly represent actual utility costs for a property.

Historically, PJs were required to adopt utility allowances either by developing their own utility allowances, adopting the utility allowance of local PHA, or establishing project-specific allowances.

The HOME rules (which were revised in 2013) contain a provision that will apply to new projects committed HOME funds on or after August 23, 2013. IFA, as the PJ, will offer a UA HUSM Model training, for free, for one person per management company. Otherwise, the management company can create their own HUSM model by visiting <http://www.huduser.gov/portal/resources/utilallowance.html>.

HOME projects allocated prior to August 23, 2013, may continue to utilize the local PHA utility allowance schedules or may develop UAs based on the specific utilities used at the project. Please contact your IFA Compliance Officer if you would like assistance.

Fees

Non-Optional Fees

Any non-optional fees charged to tenants as a condition of their occupancy must be included in the gross rent amount and detailed in the lease.

Charging application/screening fees is acceptable if the fees are reasonable and comply with state and local laws. The fees assessed are for the purpose of reimbursing owners for the actual average out-of-pocket costs incurred when screening reports, not to make a profit, nor to discourage applicants or tenants from applying to a project or requesting a service or reasonable accommodation.

For instance, the average costs to run credit and criminal background checks are an allowable basis for an application fee but charging an excessive fee to discourage households from requesting a unit transfer is not allowed.

Optional Fees

Optional fees may be charged for services available at a property, provided that the service is not a condition of occupancy and reasonable alternatives to the service(s) are provided free of charge.

It is not required to include one-time refundable security deposits or pet deposits in the gross rent. These deposits are allowable provided they are reasonable and comply with state and local laws.

(See table below for additional details.)

Fees Not Permitted

When owner/managers charge residents fees that are not permitted under Section 42, the resulting rents are likely to be above the allowable rent limit. Examples of fees that are not permitted may include:

- Fees for the use of resident facilities (such as swimming pools, parking areas or recreational facilities) when the cost of the facilities was included in the project's tax credit eligible basis.
- Fees charged to tenants as a condition of their occupancy, when the fees are in addition to the gross rents (such as fees for month-to-month tenancy, or one-time washer/dryer hookup fees).
- Fees for the standard "turnover" of a unit to make it rent-ready or decorating fees. See discussion on Normal Wear and Tear on page 42 for more information.

If it is determined that a LIHTC resident has been overcharged rent or inappropriate fees at any point within a calendar year, the following will occur:

1. The owner will be required to refund the excess rent amount to the resident for all months affected, and
2. The IRS may disallow tax credits on the affected unit for the taxable year that rent was overcharged.
3. The earliest a LIHTC unit that was overcharged rent will be considered back into compliance is the start of the following tax year provided the unit is rent restricted under the applicable program rent requirements.

Fee Type	Acceptable	Not Acceptable	Notes
Application fees	X		Must not exceed the average out-of-pocket costs to run background checks.
Unit transfer fees	X		Must not exceed the average out-of-pocket costs to process a unit transfer and may not include expenses to make a unit “rent ready.”
Month-to-month tenancy fee		X	The IRS considers this a non-optional fee even if the tenant is given the option to sign a long term lease.
Security deposits	X		Security deposits must be fully refundable if the unit is left clean and does not have damage beyond normal wear and tear.
Renter’s Insurance	X		Only acceptable if made optional and not a condition of tenancy. If required, then must be deducted from maximum rent.
Pet deposits	X		Assistance animals that help a person with a disability do not qualify as pets and are not legally subject to deposits. However, actual costs to repair damage caused by assistance animals beyond wear and tear may be charged.
Fee to pay for third-party verification		X	If there is a cost for verification, the owner may use source documentation supplied by the household. If they choose to require verification that costs money, the owner must bear the cost. NOTE: This is not to be confused with fees for recouping actual costs for processing applications (see application fees).
Coin-operated laundry machines	X		If the room is accessible to all residents and the machines are not in eligible basis.
Community room usage fee		X	A deposit may be charged if it is fully refundable if the room is left clean and undamaged.

Fee Type	Acceptable	Not Acceptable	Notes
Parking fees	X		Only acceptable for LIHTC projects if the parking lot is not in eligible basis. Assigned parking is not acceptable to IFA.
Late rent fees	X		Per Iowa statute: <ul style="list-style-type: none"> • When rent is \$700 or less a month the fee may be no more than \$12 per day (up to \$60 per month). • When rent exceeds \$700 a month the fee may be no more than \$20 per day (up to \$100 per month). Note: This may be subject to adjustment. Confirm current levels at Iowa Code Chapter 562A.
Penalty fees (for example lockout or key loss)	X		May be charged if the rates are explicitly spelled out in writing (in-house rules, or lease).
Maintenance completed by the owner that is normally required to be completed by the household (such as removing furniture).	X		May be charged if the rates are explicitly spelled out in writing (in-house rules, or lease).
Make-ready fees (cleaning, turnaround, preparation, decorating, mandatory carpet cleaning)		X	Only costs beyond normal wear-and-tear may be charged. Helpful hint: pictures are very effective in documenting the state a unit was left in and demonstrating damage beyond normal wear and tear. (See the next page for further information.)
Lease breakage fee	X		Charging a lease breakage fee as a contingency does not make a lease transient. This is true even if the tenant breaks the lease less than six months after move-in, as long as the initial term of the lease was at least six months.
Reservation Fee (Holding Fee)		X	Charging an applicant a reservation (or holding fee) to reserve a unit for an applicant until they move in is not allowed under any circumstances.

HUD has provided the below guidance on what is normal wear and tear, and what is not. Although not all-inclusive, the list is helpful in establishing housing policy. This guidance is found in the HUD 4350.3 Appendix 5-C.

Normal Wear and Tear

Normal costs of turning over an apartment after a tenant vacates cannot be charged to the former tenant or the next tenant. The costs an owner incurs for the basic cleaning and repairing of such items necessary to make a unit ready for occupancy by the next tenant are part of the costs of doing business. The following is a list of items typically attributable to routine use or “normal wear and tear”.

- Fading, peeling, or cracked paint
- Slightly torn or faded wallpaper
- Small chips in plaster
- Nail holes, pinholes, or cracks in wall
- Door sticking from humidity
- Cracked windowpane from faulty foundation or building settling
- Floors needing a coat of varnish
- Carpet faded or worn thin from walking
- Loose grouting and bathroom tiles
- Worn or scratched enamel in old bathtubs, sinks, or toilets
- Rusty shower rod
- Partially clogged sinks caused by aging pipes
- Dirty or faded lamps or window shades

Note: Periodic or routine updates to the property i.e., flooring, etc. may not be charged to any tenant.

Tenant Damage

Tenant damages usually require more extensive repair, and at greater cost than, “normal wear and tear” and are often the results of a tenant’s abuse or negligence that is above and beyond normal wear and tear.

- Gaping holes in walls or plaster
- Drawings, crayon markings, or wallpaper that the owner did not approve
- Seriously damaged or ruined wallpaper
- Chipped or gouged wood floors
- Doors ripped off hinges
- Broken windows
- Missing fixtures
- Holes in the ceiling from removed fixtures
- Holes, stains, or burns in the carpet
- Missing or cracked bathroom tiles
- Chipped and broken enamel in bathtubs and sinks
- Clogged or damaged toilet from improper use
- Missing or bent shower rods
- Torn, stained, or missing lamp and window shades

HOME Fees

Owner/managers must receive written approval of their fee schedules from IFA prior to charging any mandatory fee or surcharge to tenants in HOME-assisted units. Generally, all mandatory periodic fees must be deducted from the HOME rent limit to determine the maximum rent that can be charged.

IFA is required to ensure that fees do not create an undue burden on low income households and that the charges are reasonable and customary for the area in which the project is located.

If it is determined that a HOME resident has been overcharged rent or inappropriate fees at any point within a calendar year, the owner will be required to refund the excess rent amount to the resident for all months affected and the unit will remain out of compliance until this has been corrected.

Chapter 3 - Qualifying Households

For units to remain compliant, they must be occupied by eligible households. If the vacant unit rule is followed (see Chapter 4) and each household is LIHTC qualified at move-in and throughout tenancy, benefits will continue to flow through vacancies and subsequent residents.

After initial certification, a household's income may increase without implication to their tenancy. The Available Unit Rule obligates the owner/manager to take certain actions if the household income exceeds 140% of the maximum income limit in the future (80% for HOME), but this does not ever include evicting the over-income household (see Chapter 4 for more details on increases of income). The only eligibility issue that will continually put the household at risk for continued tenancy is their LIHTC and/or HOME student status.

Application Processing and Tenant Selection Policies

In general, there are certain steps that are taken to ensure that a household qualifies for an affordable housing program. Owner/managers may take the steps in a slightly different order (per their well-documented policies), but each must be done prior to completion of the certification process. Below are the basic steps to qualify a household to occupy a program unit.

1. Take a completed application and/or an *IFA Compliance Questionnaire*.
2. Determine student status and verify as necessary.
3. Verify income.
4. Calculate household income.
5. Compare household income to the applicable income limits.
6. Complete a *Tenant Income Certification (TIC)*.
7. Execute lease and other management-specific paperwork.
8. Move the household in.

Upon starting the certification process, all adult (age 18+ or emancipated minor) household members should be interviewed. The basics of the housing programs at the property should be explained. Some suggested topics are:

- For low income, rent-restricted units there are maximum income limits that apply.
- The anticipated income of all adult persons occupying the unit must be verified and this information must be included on the application and/or the *IFA Compliance Questionnaire*.
- Eligibility will continue to be reviewed on an annual basis through recertification. This includes income and student status recertification, as applicable to the project (see Chapter 4).

It is important to ask only questions relative to eligibility and screening criteria. Reasonable and fair-housing-compliant screening criteria are allowed. Common examples of screening criteria include credit checks, criminal background and income minimums.

A well-designed application will address each of the income and asset sources detailed in this chapter. A “yes” or “no” checklist format best establishes that a household is providing a definite answer to each question. IFA does not require a specific application packet. We recognize that owner/managers are in the best position to design application forms that meet the needs of their properties and the programs

that they work with. However, in order to ensure that compliance issues are covered thoroughly and consistently across our portfolio, IFA has designed a required Questionnaire to supplement an owner/manager's application package.

A separate *IFA Compliance Questionnaire* must be completed by each adult household member. This applies to married couples as well as other adults living in the unit. These household members must complete their individual *IFA Compliance Questionnaire* in its entirety, leaving no blank spaces. Adults with minor dependents in the unit must include their children when answering the questions. The *IFA Compliance Questionnaire* must be signed and dated.

In order to accommodate owners/managers who do not have to use their own or a program-specific application, IFA has developed an *IFA Application for Housing* which is available under "Sample Forms" on our website.

IFA SUGGESTS

When a manager completes an Application and/or Questionnaire for a household member as a reasonable accommodation, the manager should read every question (providing explanation as necessary) and record the response. The individual should also sign an affidavit that the form is complete and accurate.

NOTE If a property chooses to use the *IFA Application for Housing*, then the *IFA Compliance Questionnaire* requirement is waived. Each adult household member must still complete their own application.

Property/Management Rules (House Rules)

An owner/manager will have clearly spelled out expectations for residents of a property that are beyond the regulatory requirements covered in this manual. These are commonly called *property rules* or *house rules*. Generally, each household is provided a copy of these rules and acknowledges receipt of them at move-in.

Any changes to the rules are also communicated prior to the changes being implemented. The household's receipt of the changes must also be documented in the tenant file. Although the rules may be as extensive as necessary, they must not conflict with any regulatory compliance provisions of the housing programs or the Fair Housing Act. To ensure that there are no such conflicts, IFA will review a property's house rules when conducting monitoring duties.

Tenant Selection Plan

To ensure that everyone who applies is treated fairly, and to make sure that program requirements are covered, owner/managers must adopt a written Tenant Selection Plan (TSP) which will be reviewed by IFA when conducting monitoring duties. IFA has provided sample templates on the IFA website under the heading "Other Forms" for you as a starting point. The callout box, *Tenant Selection Policy Guidance*, below is an outline of required and suggested topics. These are based on best-practice guidance in a HUD Handbook. For topics covered in this manual, chapter references are included.

Tenant Selection Policy Guidance

Based on HUD Handbook 4350.3 - Figure 4-2

A. Required Topics

1. Project eligibility requirements, project-specific requirements.
2. Income limits, including federal and state covenants (see Chapter 2 of this manual).
3. Procedures for accepting applications and selecting from the waiting list:
 - Procedures for accepting applications and pre-applications.
 - Procedures for applying preferences.
 - Applicant screening criteria:
 - Required drug-related or criminal activity criteria.
 - Other allowable screening criteria.
 - Procedures for rejecting ineligible applicants.
4. Occupancy standards.
5. Unit transfer policies, including selection of in-place residents versus applicants from the waiting list when vacancies occur (Chapter 4).
6. Policies to comply with Section 504 of the Rehabilitation Act of 1973, the Fair Housing Act and other relevant civil rights laws and statutes.
7. Policy for opening and closing the waiting list for the property.
8. Eligibility of students (Chapter 3).
9. VAWA Protections (Chapter 1).

B. Recommended Topics

1. Procedures for identifying applicant needs for the features of accessible units or reasonable accommodations.
2. Updating the waiting list.
3. Policy for notifying applicants and potential applicants of changes in the tenant selection plan.
4. Procedures for assigning units with originally constructed design features for persons with physical disabilities.
5. Charges for facilities and services.
6. Security deposit requirements.
7. Unit inspections.

File Organization

To maintain compliance, owner/managers must practice good organizational skills. This includes the order that the paperwork is arranged in a file. Neat and consistent files also help regulatory audits to go more smoothly. For these reasons, IFA strongly suggests the following file order as a best practice.

Initial move-in

- *TIC form*
- *Application*
- *IFA Compliance Questionnaire (if not using the IFA Sample Application)*
- *Income Verification(s)*
- *Asset Verification(s)*
- *Move-In Lease*
- *Move-in Lease addendums (as applicable)*
- *VAWA Acknowledgement*
- *Student Status Certification form(s) and any necessary verifications*
- *Zero Income Certification (if applicable)*
- *Alimony/Child Support Self-Certification (if applicable)*
- *Under \$5,000 Asset Certification, if applicable (LIHTC only or during HOME self-certification years)*
- *Consent to Release Forms (blanket release forms will not be accepted)*

Recertification

Most recent recertification documents only
100% LIHTC (without HOME)

- *Most recent Student Status Certification form and related verifications*

Mixed-use LIHTC projects, mixed-income LIHTC units and HOME recertifications

- *TIC form*
- *Application*
- *IFA Compliance Questionnaire (if not using the IFA Sample Application)*
- *Income Verification(s)*
- *Asset Verification(s)*
- *Move-In Lease*
- *Move-in Lease addendums (as applicable)*
- *VAWA Acknowledgement*
- *Student Status Certification form(s) and any necessary verifications*
- *Zero Income Certification (if applicable)*
- *Alimony/Child Support Self-Certification (if applicable)*
- *Under \$5,000 Asset Certification, if applicable (LIHTC only or during HOME self-certification years)*
- *Consent to Release Forms (blanket release forms will not be accepted)*

Determining Household Size

Income limits are based on the number of members in a household. Household members include all persons who occupy the unit as their primary residence.

Besides the obvious members, household members may also include:

- Children under joint custody who will be **in the unit at least 50% of the time**.
- Children away in foster care who will be returning to the household.
- Dependent students away at school.
- Members **temporarily** in a hospital or nursing home.
- Children being adopted.
- Foster children and adults.
- Any person on active military duty who leaves a spouse or dependent in the unit (see below for an exception in the case of dependents of military personnel). Note: If they are not the head, co-head or spouse of the head and do not leave a spouse or dependent in the unit, household members who leave the unit for active military duty are removed from the household.
- A future spouse or roommate.
- Unborn children.

Unborn children can be verified only through self-certification from the expecting mother. No further documentation is allowable. If the added unborn child is crucial to eligibility, miscarriages after move-in will not affect the initial qualification as long as the appropriate self-certification establishing the pregnancy was in the file at the time of move-in.

When determining household size for income limit purposes, we must exclude the following individuals, even though they live in the unit:

- Live-in attendants/aides for the disabled, when verified as necessary with a knowledgeable third party.
- Children under joint custody who will be **in the unit less than 50% of the time**.
- Temporary visitors and/or guests.

A live-in attendant/aide may be counted when determining unit size.

The time that a “guest” can stay before the household must report them to management and add them to the household should be clearly spelled out in the lease or house rules.

When a household member is **permanently** confined to a hospital or nursing home, the remaining household members have the right to decide whether to count the confined household member (and their income) or not.

Temporarily absent household members include, for example, dependent students away at school and military members assigned out of town that have a spouse or a dependent child residing in the unit. These types of individuals must always be counted as household members along with their income as applicable.

HUD and IRS guidance urges some leniency when it comes to those absent in the military with a dependent child in a unit. For example, it may be determined that a military member and their child are not household members when grandparents are temporarily caring for their grandchild while the parent is on active duty, even though the military member’s dependent is in the unit. As another example, the income of a guardian that is temporarily in a unit to care for the children of a head of household who is on active duty may be excluded. Note that this only applies to dependents. A situation where a member who is residing in a unit has a spouse on active duty will require that the absent spouse be included.

It is important to document the reason for the exclusion of members, such as live-in aides, those permanently confined to a care facility, incarcerated individuals, spouses who reside outside the country or absent military members who leave dependents in a unit.

EXAMPLE
Household size

June Picant is living with her parents (the head and co-head of the household). June is staying there while her husband, Stu, is on active duty in the military. June has a sister, May, who is a full-time student dependent of their parents. May is away at university so she is only in the unit on holidays. May has a daughter who is subject to joint custody and is in the unit every weekend but spends the weekdays with her father. How many people live in this unit for income limit purposes?

5

June’s parents (head and co-head)	2
June	1
Stu (on active duty with a spouse the unit)	1
May (dependent daughter of head)	1

May’s daughter is not counted, as she is in the unit less than 50% of the time.

Changes in Household Size

When adding members to the household after initial move-in verify and add the new member’s income to the rest of the household’s income as was verified on the household’s most recent *Tenant Income Certification* (TIC). The new household member must also complete other paperwork required of new move-ins, including a *Student Status Certification* and the *IFA Compliance Questionnaire*. Apply the Available Unit Rule if the new additional income puts them over the 140% limit (see the section in Chapter 4 regarding the Available Unit Rule).

When subtracting household members, wait until the next recertification date and simply reflect the smaller household on the TIC then.

Original members are the household members that were included on the household certification at move-in. If all original household members vacate a unit, the remaining member(s) added after the initial household moved in will need to qualify as a new household at that time, unless one of the following applies:

1. The household entirely qualified under the income limit in effect at any point after adding the new person.
2. The person individually income-qualified at move-in using the one-person income limit.

EXAMPLE

Adding a new member

Shelly moves into a unit in 2014 when her income was \$24,000. This was \$1,000 below the income limit. In 2016, her brother John passes the property's usual background checks and moves into the unit with his sister. His income is verified to be \$27,000.

The manager knows that first they need to test for the Available Unit Rule. Since the project is not 100% LIHTC and subject to income recertification, the manager adds John's income to Shelly's most recently certified income (now \$26,000) on a copy of her recertification TIC from 8 month prior. This results in a total of \$53,000 and puts the household over the 140% limit for a two-person household. The AUR is triggered and an eligible household must be moved into the next available unit in the building Shelly lives in. The manager realizes that John is personally above the income limit for one person when he moves in (which is still \$25,000), and that he will NOT qualify in the future if Shelly ever moves out because he would not have qualified if he had entered the property by himself in 2016. This will hold true unless:

- **At a future recertification, Shelly and John together are below the income limit.**
- **John is below the income limit when Shelly leaves the unit.**

EXAMPLE

Subtracting a household member

Candace and her cousin Marie apply to Desert Palms Apartments, a mixed-use property. Candace self-certifies that she is pregnant, so the household is certified as a three-person household. Five months later the pregnancy ends in a miscarriage. It is not necessary to recertify the remaining household members. If the income of the remaining household members exceeds 140% of the current income limit at the next recertification, the Available Unit Rule would be applied.

Verification

Student status, income, assets and other crucial eligibility items must be verified through knowledgeable third parties or third-party documents. IFA looks for the following methods of verification:

1. For employment (All forms of employment verification must be within 120 days of the effective date):

Starting with the release of the 2022 Manual, IFA no longer requires that both a verification of employment form and paystubs be gathered. One consistent method is sufficient.

1. A verification form completed by the employer (directly from the third party).
2. Two months of pay stubs or a payroll summary report. If an applicant does not yet have two months of consecutive pay stubs because they have recently started a new job, you must thoroughly document the file explaining the situation or use another form of verification.

Notes: ***This is required for HOME units, even if the owner/manager also additionally chooses to get a verification form completed by the employer.***

3. Information obtained from the well-known service *Work Number* or other database documentation. ***This also meets the HOME requirement.***
4. The IFA Notarized Affidavit of Income form should only be used in the rare instance of the inability to obtain a third-party verification.

2. For other income sources:

1. Social security benefits letters, unemployment letters, asset statements, and similar documentation.
2. Verification forms completed by a third party.
3. Acceptance Letter of Employment from the Employer

HUD has produced a document (Appendix 3 of the 4350.3) that can be used for LIHTC and HOME as a list of best practices relating to what forms of verification are allowed. We have included this document at the end of this manual.

IFA SUGGESTS
A “date received” stamp is extremely helpful in establishing when paperwork was received.

WORKSHEET

Required number of paystubs

Pay wage cycle:	# of stubs to cover 2 months:
Weekly	9
Bi-weekly	5
Semi-monthly	4
Monthly	2

Please note: HUD has a database system of income verification called Enterprise Income Verification (EIV). EIV is only available to HUD properties and reports that EIV generates cannot be shared with IFA LIHTC/HOME Compliance Officers. Any reference to EIV or Forms-9887 in Appendix 3 does not apply to programs covered in this manual.

Verification must be received no longer than 120 days prior to the effective date of the certification that the verification supports.

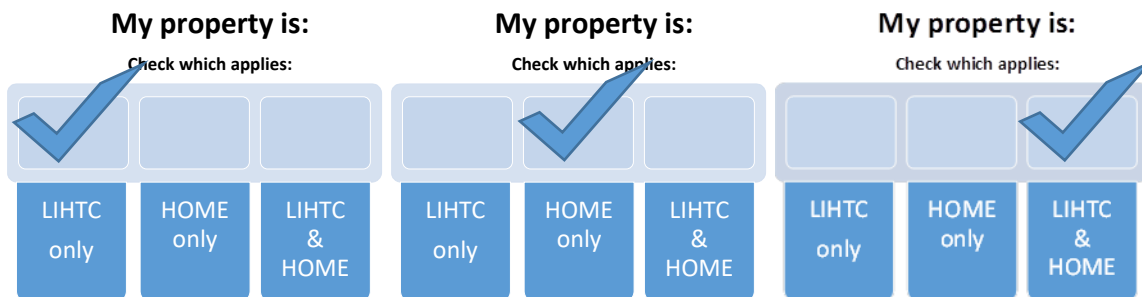

The most recent annual benefit letter for social security, pensions and other fixed-income sources can be used to verify those income sources, even if they are older than 120 days. **This does not apply to SSI benefits, which may change during a year.**

EXAMPLE

Inadequate Verification

A beneficiary of a trust applies for a unit. The beneficiary has access to the balance in the trust and can withdraw amounts “as needed,” but state that they are not aware of the value of the trust. They do not get any statements or other documentation prepared by a third party related to the trust. During an attempt to verify the asset, the person responsible for administering the trust will not reveal any information about the balance. There is insufficient data to determine household income. The household is ineligible because of inadequate available verification.

Verification

For LIHTC-only properties:

PHA Verification: the PHA CANNOT verify income as a third-party for voucher-holding households at move-in. It can be used for other years’ recertifications.

Assets: If the cash value of household assets does not exceed \$5,000, the household may complete the IFA *Under \$5,000 Asset Certification form* instead of third-party verification both at initial move-in and at recertification (if required).

For HOME-only properties:

PHA Verification: the PHA CANNOT verify income as a third-party for voucher-holding households at initial move-in or every 6th year of the HOME Affordability Period. It can be used for other years’ recertifications.

Assets: All assets must be verified at initial move-in and every 6th year of the HOME affordability period. For other years, the IFA *Under \$5,000 Asset Certification form* may be used instead of third-party verification.

For LIHTC/HOME units:

PHA Verification: the PHA CANNOT verify income as a third-party for voucher-holding households at move-in or every 6th year of the HOME Affordability Period. It can be used for other years’ recertifications.

Assets: All assets must be verified at initial move-in and every 6th year of the HOME affordability period. For other years, the IFA *Under \$5,000 Asset Certification* may be used instead of third-party verification.

Voucher-Holders

LIHTC

LIHTC units **may not** use PHA verification at move-in when full verification is required. If a household has rental assistance through a Section 8 voucher and documentation is received from the PHA stating the household's income and composition, the documentation is considered third-party verification for purposes of recertification of income only. The HUD 50058 certification form may be used as verification of income for the LIHTC income recertification. It may also serve as the TIC. If it is not possible to obtain the 50058 from the PHA, a signed statement from the PHA indicating all the names of all household members and the household's gross annual income may also be used as verification of income during recertification.

When a Housing Choice Voucher holding household has their income verified by the PHA, this sufficiently verifies student financial assistance *income*. PHA verification, however, does not address LIHTC or HOME *student eligibility*. Separate student eligibility verification must still be obtained.

HOME

HOME units **may not** use PHA verification at move-in or every sixth year of the HOME Affordability Period, when full verification is required. However, it may be used for recertifications conducted the other years (see Chapter 4 for further details on HOME recertification).

Household Assets under \$5,000

LIHTC

When the *cash value* of all household assets does not exceed \$5,000, third-party verification of assets is not required. The household is required to complete the IFA form *Under \$5,000 Asset Certification* indicating household assets are \$5,000 or under. This required form can be found on the IFA website.

The household's declared income from assets on the *Under \$5,000 Asset Certification* must be included in the calculation of annual income. If it is determined that the income from assets declared by the household is not reasonable, it is management's responsibility to obtain third-party verification of the assets. For instance, if a household declares no assets, but pays an application fee with a personal check, the *Under \$5,000 Certification* is incorrect as a checking account is considered an asset.

HOME

For the HOME program, the *Under \$5,000 Asset Certification* form may be used in years when self-certification is allowed, but not at move-in nor during the years when full tenant recertifications must be completed. If a project is required to obtain third-party verification for a unit due to participation in other housing programs, such as Section 8 or Rural Development, the use of the *Under \$5,000 Asset Certification* form is not acceptable.

Students

LIHTC

The IRS Code prohibits tax credit projects from being used as dormitories. Generally, households made up entirely of full-time students do not qualify. When determining eligibility, the owner/manager should start with the question:

“Are ALL household members (including minors) full-time students?”

If the answer is “no”, the household is LIHTC student-eligible and no further action is needed. If the answer is “yes”, the household must meet one of five exceptions to qualify.

A full-time student is defined as any individual of any age who:

- Is enrolled in a school with facilities and regular student body (including online-based learning).
- Is enrolled in all or parts of any 5 months out of the calendar year (not necessarily consecutively).
- Is considered full-time by the school that they are enrolled in, based on that school’s definition of a full-time workload.

Note about the 5-month rule: This means that a person who attended school full-time for any part of five months during a calendar year is a student the rest of the calendar year, even after they are out of school.

If a person indicates that they are a full-time student, the manager does not need to verify student status further. The only exception to this is if the status of an adult dependent full-time student is needed to establish their eligibility for limiting their earned income to \$480 (see later in this chapter for more on that).

Verification

Student status should be determined with the initial application interview prior to move-in. IFA’s form *Student Status Certification* is a required form. It asks the correct questions to determine if the household is made up of full-time students, and which exception (if any) they may meet. Based on this household Certification, further verification that the household meets an exception may need to be gathered. If one individual is attending school part-time and everyone else is a full-time student, student status must be verified with the school for the part-time student. The school will define what constitutes “full-time.” Student status must also be addressed annually and verified as necessary.

EXAMPLE

Five-month student rule

In November of this year, a single applicant applied to live in a tax credit unit. Although no longer in school, she finished school on May 15th of this year, and was a full-time student all year until graduation. If she wants to move in on December 1st, will this household be considered a FT Student household?

YES

When will she no longer be considered a full-time student?

January 1st of the next year

Exceptions

There are five exceptions to the student rule prohibiting households made up entirely of full-time students. Full-time student households must meet one of the exceptions continually to live in an LIHTC for the time period that everyone is a full-time student.

1. Any of the adult household members are married and entitled to file a joint tax return.

Verification required: copy of joint tax return or marriage certificate.

2. An adult member is a single parent with a minor child in the unit, the adult is not a tax dependent of any third party, and the child is not claimed as a tax dependent by anyone other than one of their parents (even if the other parent is not in the unit).

Verification: Copy of tax returns (if possible) or a signed affidavit that the adult in the household is not a dependent of anyone outside the household and that, if the children are claimed on anyone's taxes, it is only by one of their parents.

3. The household includes a member who receives welfare assistance in the form of Temporary Assistance to Needy Families (TANF).

Verification: TANF award letter.

4. The household includes a member who formerly received foster care assistance (that means they were a foster child or adult).

Verification: Foster paperwork from the placing welfare agency.

5. The household contains a member who gets assistance from the Job Training Partnership Act (JTPA) or similar programs such as General Education Diploma (GED) or High School Equivalency Test (HiSET). (NOTE: The "Workforce Investment Act" has replaced JTPA).

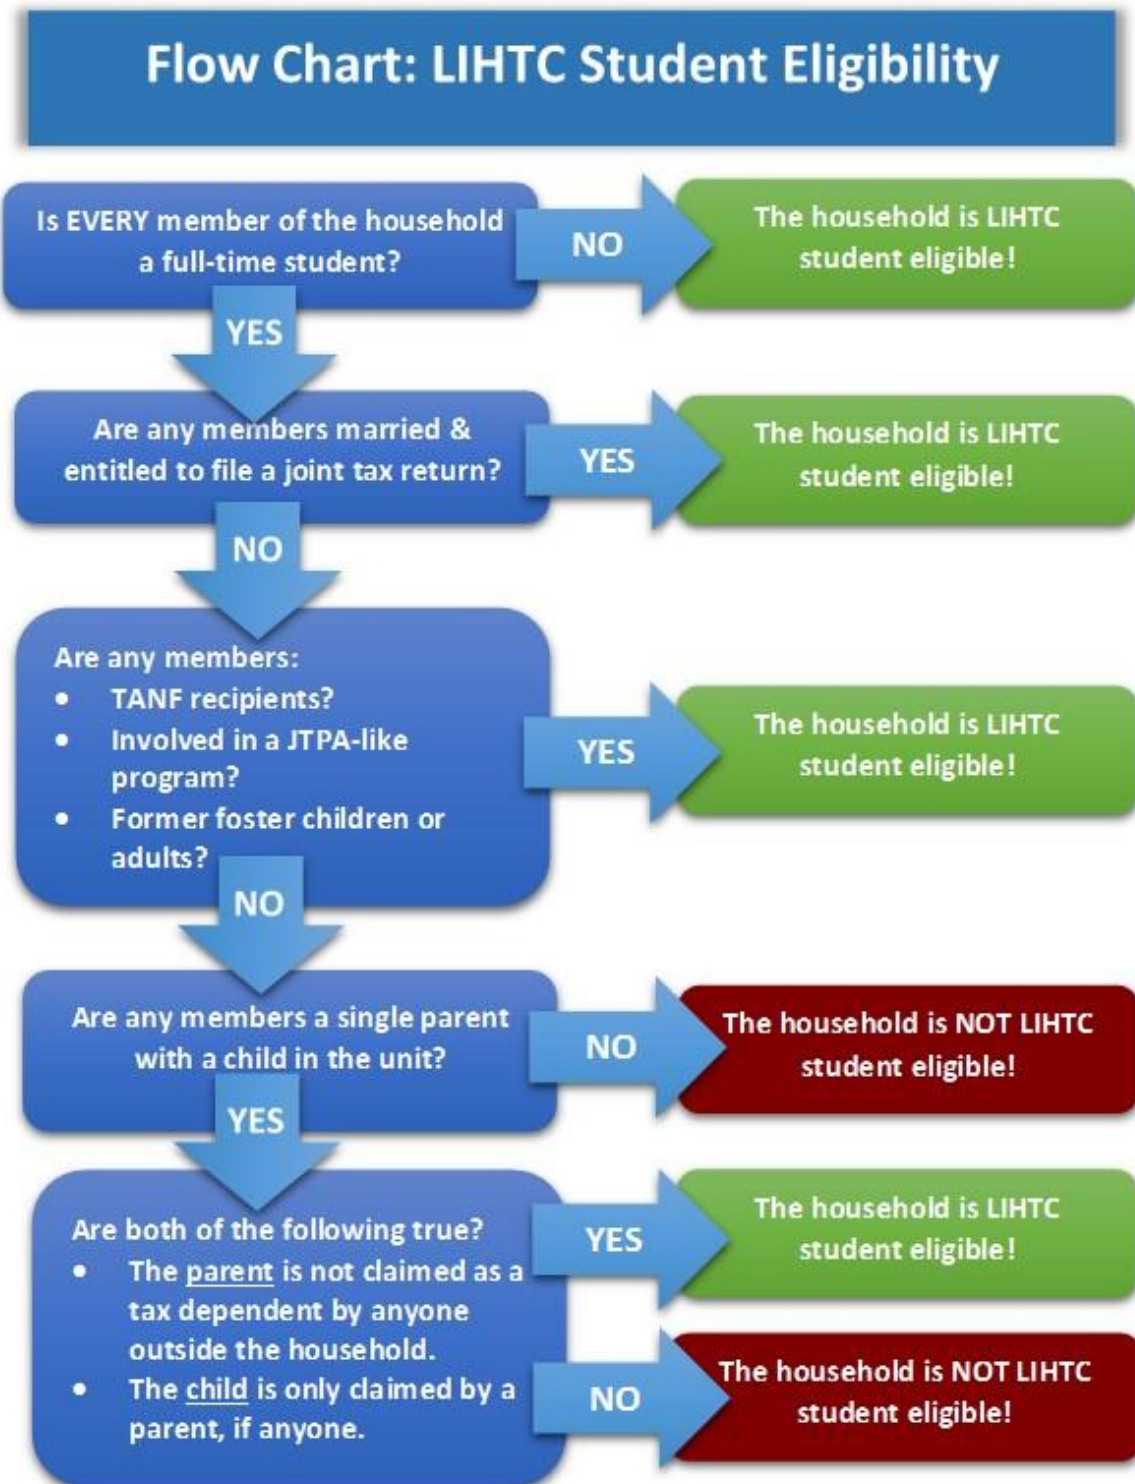

Verification: to identify JTPA-similar programs that are not part of the Workforce Investment Act programs, verification from the administrator of the program must establish that the program:

- a. Gets federal, state or local government funding; and,
- b. Has a mission similar to the one for the JTPA program (see below).

JTPA as amended by the Job Training Reform Amendments of 1992 and the School-to-Work Opportunities Act of 1994. Sec. 2

"It is the purpose of this Act to establish programs to prepare youths and adults facing serious barriers to employment for participation in the labor force by providing job training and other services that will result in increased employment and earnings, increased educational and occupational skills, and decreased welfare dependence, thereby improving the quality of the work force and enhancing the productivity and competitiveness of the Nation."

IFA does not require determination of student status for properties in the last 15 years of the Extended Use Period. Properties with HOME funds will still need to follow the HOME student rules until the end of the project’s HOME Affordability Period.

HOME

The HOME program also has a student rule. The program adopted the Section 8 student rules in a 2013 HOME regulation revision. Section 8 student eligibility rules are very different from the LIHTC rules. Section 8 student rules focus on individual students rather than households. They are designed to prevent any household containing a person who may be a tax dependent of parents outside the household from getting assisted housing. Understanding this premise should help the owner/manager to understand some aspects of the rule. For instance, this is why the age of 23 (the last year a student can be a tax dependent in most cases) occurs in the rule. One ineligible student disqualifies a household from qualifying as a HOME unit. IFA's form *Student Status Certification* is a required form to help establish HOME student eligibility. It asks the correct questions to determine if the household has any full- or part-time students that may trigger the rule, and which exception (if any) they may meet. Student status must be examined prior to move-in and at each recertification during the HOME Affordability Period. Eligibility for an exception must be documented for each potentially ineligible student member of a household.

To determine eligibility for HOME occupancy, an individual adult student, full-time or part-time at an institute of higher learning must be one of the below:

- A dependent of the household
- 24 years old or older
- Married
- A U.S. military veteran
- Have a dependent child(ren) living with them in the unit
- An orphan or ward of the court
- Disabled and was receiving section 8 assistance on 11-30-2005

If the answer is "yes" to one or more of the above, the student may qualify for occupancy. If the answer is no to each of the above, then the student must be independent from their parents. The student can demonstrate his or her independence from parents, including that they:

1. Must be of legal contract age under state law AND
2. Have established a household separate from parents or guardians for at least one year

OR

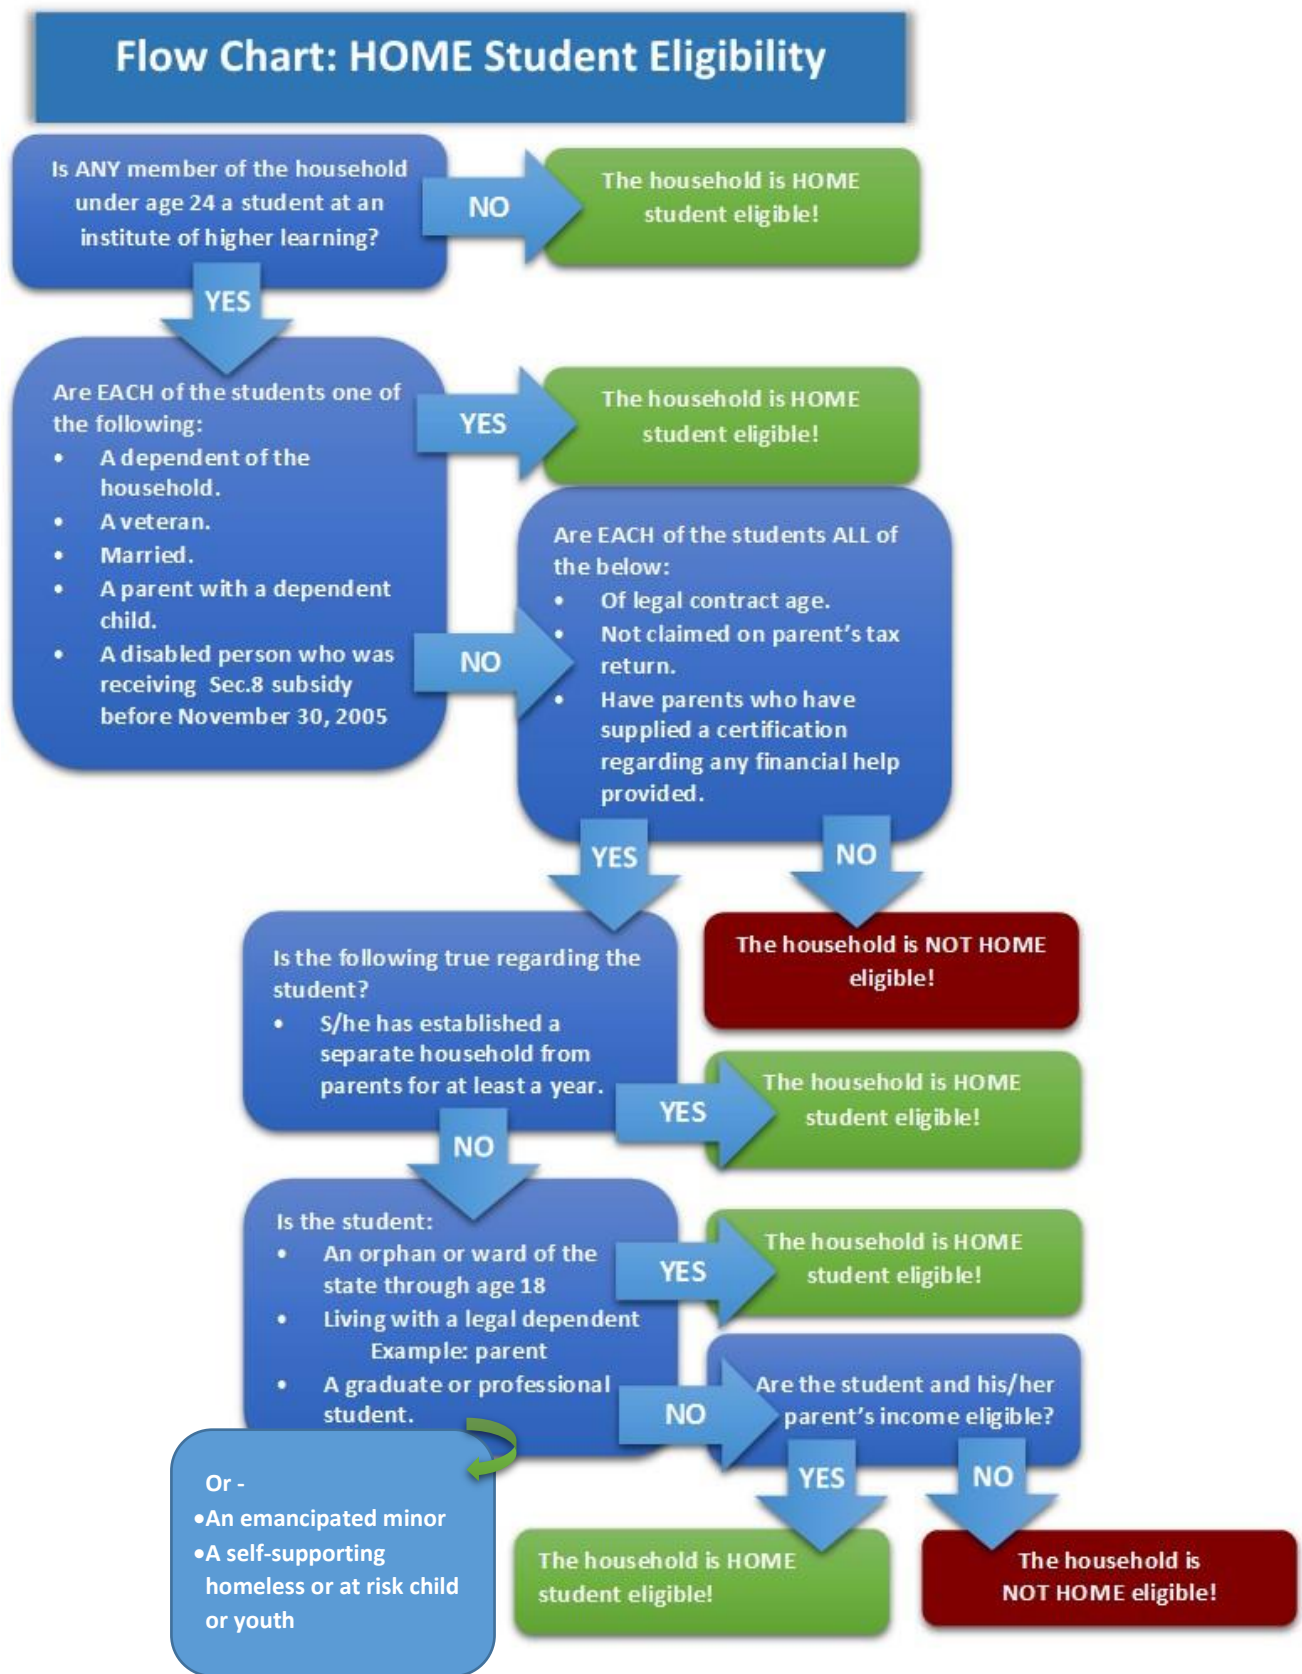

Meet the U.S. Department of Education's definition of an independent student, including being any one of the below:

- At least 24 years old by December 31 of the current year
- A veteran of the U.S. Armed Forces
- Have legal dependents other than a spouse (i.e., an elderly dependent parent)

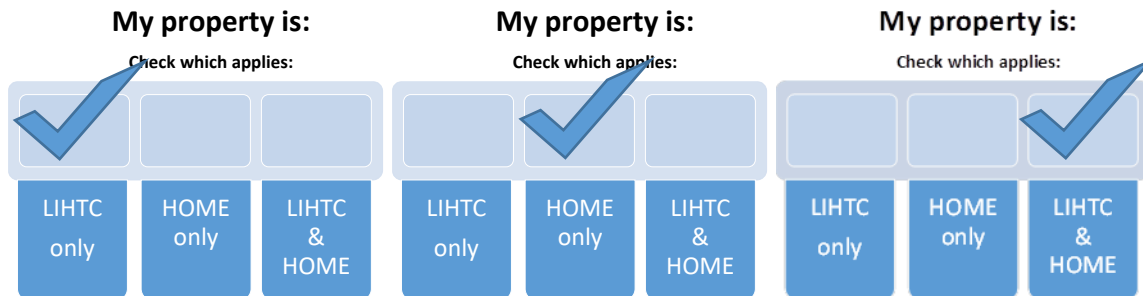

- A graduate or professional student
 - Married
 - Is an emancipated minor or was one before they became an adult
 - Is or was an orphan or a ward of the State or in foster care at any point since age 13
 - Been established this school year to be an unaccompanied homeless child or youth and self-supporting as defined by:
 - The McKinney-Vento Act,
 - Runaway and Homeless Youth Act or
 - A financial aid administrator.
1. If the student meets the U.S. Dept. of Education definition of Independence, above, the student qualifies. If not, they must not be claimed as a dependent by parents or legal guardians pursuant to IRS Regulations; AND
 2. The parents must provide signed certification if financial support will be provided

If none of the above applies, the student must demonstrate that they are income qualified AND that the student's parents or guardian, individually or jointly, are at or below the low-income limits (80% AMI).

Finally, student eligibility status must be examined at each recertification.

Student Status

For LIHTC-only properties:

Apply LIHTC student rules

Tax credits cannot be claimed for a unit that contains a household that becomes an ineligible student household. The lease should be designed so that the household is in violation of their lease to allow termination of tenancy.

For HOME-only properties:

Apply HOME student rules

A household that contains an ineligible student will be treated as “over-income”, but their tenancy is not terminated.

For LIHTC/HOME units:

Apply BOTH rules to LI units.

Violations of the LIHTC rule result in termination of tenancy. Violation of the HOME rule does not. Floating HOME units may change designations to make a non-LIHTC unit HOME, if available. For fixed HOME, the owner/manager will need to decide which program’s non-compliance represents the greatest risk to the project.

NOTE: Households in units that are only subject to one program are only subject to the student rule for the program applicable to the unit.

Periodic Income

Renting to qualified households is a major component of meeting affordable housing requirements (see the “Memory Aid” in Chapter 1). Along with student status, income eligibility establishes if a household is “qualified.” HUD is the dominant government housing agency in the country. When various housing program rules have been established relating to how household income is calculated, the government often borrows from pre-existing HUD rules. This is true of both the LIHTC and HOME programs as both utilize the Section 8 HUD method of determining annual income. The good news here is that this makes the rest of this chapter essentially identical for both programs!

Annual income, as defined by HUD, is the amount of income that is used to determine a household’s eligibility for LIHTC and HOME housing. Annual income includes all amounts, monetary or not, that go to or are received by any household member and amounts anticipated to be received from sources outside the household during the 12-month period following income certification. Annual income

includes all amounts that are not specifically excluded by regulation. HUD Handbook 4350.3, *Exhibit 5-1: Income Inclusions and Exclusions*, provides a complete list of inclusions and exclusions.

Anticipated income includes all raises, new jobs or any other income reasonably expected and verifiable to be received within the next twelve months.

For the purpose of determining whose income we count, annual income is comprised of three broad types of income:

Earned income

Employment, self-employment & military pay.

Unearned income

Such as benefit income, military basic allowance for housing pay, alimony/child support & gift income.

Asset income

Unless specifically indicated in this chapter, annual income includes gross EARNED income, before any deductions, that are anticipated to be received by all adult (non-dependent) members of the household. UNEARNED and ASSET income of all members (adult and dependent) are also counted. Whether no income or very limited earned income is received by a dependent, it must be shown and counted towards the household’s combined income. See the chart below for specifics.

At times, a minor member of the household who is age 17 at the time of certification will be turning 18 during the year. These cases will need to be examined closely. If the 17-year-old has any earned income, it will need to be verified and the annual income prorated for the portion of the year that they will be an adult. If the owner/manager determines that the dependent will continue to be a dependent because they will still be a full-time student, only \$480 of their earned income will be prorated for the remainder of the year that they are anticipated to be an adult dependent full-time student.

NOTE

Gross or Net Income?

In almost all cases, annual income includes GROSS income, before any deductions. However, there are a few cases where NET income is used. Below is a list of these cases. Further details on each can be found in the discussion of *Periodic Income* later in the chapter.

- 1. Social security:**
 - a. Delayed benefits
 - b. Adjustments for prior overpayments
- 2. Self-employment**
- 3. Income from assets** (for instance, NET rental income from real estate).

Note: Net income is never counted lower than \$0, even if the net amount is a loss.

How do we Count Household Members' Income?		
Members	Earned Income	Unearned & Asset Income
Head, Spouse, Co-Head	YES	YES
Other Adult (including foster adults)	YES	YES
Foster Adult	YES	YES
Dependents		
- Child Under 18	NO	YES
- Adult Full-time Student (Not Head, Spouse, Co-Head)	YES (up to \$480 a year)	YES
Minor Foster Child	NO	YES
Temporarily Absent Member	YES	YES
Permanently Living in a Hospital or Nursing Home	Household Decision – Only counted if part of the household	Household Decision - Only counted if part of the household
Non-Members		
Live-in Attendant	NO	NO
Guest*	NO	NO

*NOTE: the term "guest" identifying a temporary resident should be defined in the lease and must not be of long duration.

EXAMPLE

Dependent Income: Taye

16-year-old Taye is a dependent of his mother, who is the head of household and a widow. He makes \$16,000 a year working for a local fast-food restaurant. He also receives \$6,000 annual gross social security benefits from his deceased father. He puts his earnings and benefit money into a savings account, which is anticipated to generate \$100 a year in interest. He is the sole owner of the account.

The manager determines that his income contribution to the household is \$480 (the first \$480 of his benefit income). Is this correct?

NO

Wages (earned income from a minor is not counted)	\$ 0
Social Security (unearned Income of a minor is counted in full)	\$6,000
Asset Income (counted in full)	<u>\$ 100</u>
Total	\$6,100

Five years later, 21-year-old Taye is an adult full-time student and is still considered a dependent of his mother because of his student status. He now makes \$21,000 a year working for the restaurant. He also receives \$7,000 annual social security gross benefits from his deceased father. He puts his earnings and benefit money into a savings account, which is anticipated to generate \$300 a year in interest. He is the sole owner of the account.

The manager determines that his income contribution to the household is \$7,780. Is this correct?

YES

Wages (earned income for an adult dependent is limited to \$480)	\$ 480
Social Security (Unearned Income is counted in full)	\$7,000
Asset Income (counted in full)	<u>\$ 300</u>
Total	\$7,780

EXAMPLE

Dependent Income: John and Phillip

John is the head of household. He works a job with a total anticipated income of \$24,000. His spouse, Phillip, is an adult full-time student. He also works a full-time job with an anticipated annual income of \$36,000.

The manager determines that the household income is \$24,480 (John’s job + \$480 from the adult full-time student, Phillip). Is this correct?

NO

Wages (earned income for John)	\$24,000
Wages (earned income for Phillip)	<u>\$36,000</u>
Total	\$60,000

Note: Spouses and co-head full-time students are not eligible to be counted as dependents, so both household members must have their earned income counted in full.

Zero or Sporadic Income

Before we continue the discussion of how we calculate income, we will discuss what to do when there is an absence of income.

If a household’s income cannot be based on current income information due to the household reporting little to zero income, or income fluctuates, income may be determined based on actual amounts received or earned within the last twelve months. This should not be used if it is verifiably inaccurate. For instance, if a person had a job with sporadic income the last twelve months, but they no longer have that job, counting the sporadic income would be inaccurate.

The IFA *Zero Income Certification* form is required for any household member claiming zero income. This form will help an owner/manager determine if the household has any income that must be counted that the household may not have revealed on other documentation. For instance, the form asks about how a person is meeting their rent and other expenses. **Pay very close attention to this section of the form. If it is not filled out in its entirety, the form will be considered incomplete, and the unit considered out of compliance. Please note that the answer “rental assistance” explains how rent will be paid, but not how other necessities will be paid and is not a complete answer.** This section often reveals that other household members are paying the bills with already-verified income, gift income from persons or organizations outside of the household, or that the person intends to use their assets to meet their needs. The unit will remain out of compliance until the completed form is received by IFA

If an applicant intends to use only saved assets to pay expenses, the following steps must be taken:

- The household member must complete the *Zero Income Certification* form, ensuring that it includes a statement indicating the intention of utilizing saved assets to meet financial needs.
- Obtain verification of the asset(s) listed.

Overview: Periodic Income

HUD has defined 9 specific types of income.

1. Employment
2. Self-Employment
3. Income from Assets
4. Social Security and Other Benefits
5. Payments in Lieu of Earnings
6. Welfare Assistance
7. Periodic Allowances (Child Support, Gifts, Cash)
8. Military Pay
9. Student Financial Assistance (for Section 8 assistance recipients)

DEFINITION

“Periodic”

“Occurring or appearing at regular intervals, on a pre-determined schedule.”

The opposite is “sporadic” or “occasionally” which occurs irregularly, on no pre-determined schedule.

Below we will discuss each in turn and provide income calculation examples.

PERIODIC INCOME: HUD SAYS...

1. Employment Income is:

“The full amount, before any payroll deductions, of wages salaries, overtime pay, commissions, fees, tips, bonuses, and compensation,” for all adults.

When annualizing employment income, the frequency of pay should be determined first. Once the frequency of each pay period is determined, the calculations on the worksheet to the left should be applied to determine annual income.

For temporary employment, multiply by the number of periods expected to work over the next 12 months from the date of certification.

When RANGES are provided by the employer on items such as the number of hours, an average should be used. For instance, if the employer anticipates that a person will work 36-40 hours a week, an average of 38 should be used in the calculation.

At times verification will indicate that a change is anticipated to the rate of pay within the next 12 months. See the example below demonstrating a calculation when such a change is expected.

WORKSHEET

Pay periods

Pay wage cycle:	Multiply by:
Hourly	Hours per week x 52
Weekly wages	52
Bi-weekly wages	26
Semi-monthly wages	24
Monthly wages	12
Annual Salary	1

EXAMPLE

A change in anticipated employment

An employment verification form indicates that an employer anticipates giving a household member a raise six weeks after the household will move in. The manager performs the following calculation:

Hourly rate at move-in	\$7.50 per hour	
Rate after 6 weeks	\$8.00 per hour	
	6 weeks x 40 hours x \$7.50 =	\$ 1,800
	46 weeks x 40 hours x \$8.00 =	\$14,720
Annual Income		= \$16,520

Important lessons from the above:

1. **Calculations must always start with the move-in date.** When calculating a raise, care should be taken to be sure that the date of move-in is the starting point, not the date that the manager is calculating the income.
2. **Check your assumptions.** By looking at the assumptions in **red** above, the manager can see that the assumed total of weeks is 52, and thus correct. If 6 and 47 weeks were used (total of 53) or 5 and 46 (51), for instance, the math results will be incorrect.

In addition to the above calculations, annualize the year-to-date (YTD) amounts listed on the verification and most recent pay stub. IFA has observed that owner/managers have developed different calculation methodologies for annualizing YTD. IFA does not require a specific methodology, as long as the owner/manager is consistent with the method used. It is necessary to pay close attention to the date of hire, as this can affect the calculation.

The highest total income (between year-to-date and hourly) calculation should be used after examining income from all reasonable perspectives *unless* it can be clearly verified that a lower calculation is a better estimate of income. If the highest figure results in the income limit being exceeded when other calculations indicate the household may qualify, it is best practice to obtain further clarification from the employer.

EXAMPLE

A sample YTD Annualization Method

1. Determine the year-to-date beginning and end dates. Calculate the number of days YTD.
2. Divide the number of days YTD by 7 to determine the number of weeks YTD.
3. Divide the amount paid YTD by the number of weeks worked YTD.
4. Multiply by 52 weeks or the actual number of weeks expected to be worked within the next 12 months.

According to the employment verification:

YTD start date:	December 28
YTD end date:	February 28
Total pay YTD:	\$ 7,040

- | | |
|--------------------------|--|
| 1. Number of days YTD: | (Dec) 4 days + (Jan) 31 days + (Feb) 28 days = 63 days |
| 2. Number of weeks YTD: | $63 \div 7 = 9$ |
| 3. Average pay per week: | $\$ 7,040 \div 9 = \$ 782.22$ |
| 4. Annualized YTD: | $\$ 782.22 \times 52 = \$ 40,675.54$ |

EXAMPLE

Gross income

A member of a religious order, as part of their vows, commits their employment income to their church. Is the employment income counted, even though they do not receive the money?

YES

There are many deductions that a person may choose to have taken from their employment income. HUD is clear that gross income before these deductions are taken is counted.

EXAMPLE

Semi-monthly vs. bi-weekly pay

Ashton Way Apartments is a property that has a one-person income limit of \$25,000. Donna applies to live there and has a job making \$1,000 per semi-monthly pay cycle.

At the same time, Kya also applies. She is employed and is making \$1,000 bi-weekly.

Qualified?

Donna: $\$1000 \times 24 = \$ 24,000$ **YES**

Kya: $\$1000 \times 26 = \$ 26,000$ **NO**

PERIODIC INCOME: HUD SAYS...**2. Self-Employment Income is:**

“The net income from operation of a business or profession. Expenditures for business expansion or amortization of capital indebtedness shall not be used as deductions in determining net income. An allowance for depreciation of assets used in a business or profession may be deducted, based on straight-line depreciation, as provided in IRS regulations. Any withdrawal of cash or assets from the operation of a business or profession will be included in income, except to the extent the withdrawal is reimbursement of cash or assets invested in the operation by the household.”

This is one of the few times that NET income is used. Annualize self-employment based on information collected from the following documents, in order of preference, and as applicable:

- Previous year’s Tax Return Form 1040 with Schedule(s):
 - **C** for business income
 - **E** for rental property income
 - **F** for farm income.
- Financial Statement(s) of the business (such as monthly profit/loss or income statements).
- Signed statement by the business owner.

A completed Schedule **C** (or **E** or **F**) for the current year so-far, with supporting documentation required to establish YTD income. Multiply out to annualize.

Many people with self-employment income claim that they do not make enough to file taxes even though self-employed individuals are required to file tax returns even if they are reporting a net loss. However, IFA does not require management to enforce tax filing for self-employed individuals and alternative documentation can be used (as above).

Question: Can a resident use their unit for business purposes? A household member wants to do bookkeeping in one of the bedrooms in her unit. What if she claims business use of the unit on her tax returns?

Answer: For a tax credit project the answer is, yes. A household member may run a business out of a unit, if it remains their primary residence, even if they claim part of the unit on their taxes.

For a HOME project, information contained in the HUD 4350.3 Rev-1 Chg-4 in Chapter 6-9, discusses tenant’s conducting “incidental business,” such as computer work, limited babysitting, etc. within their unit as allowed and goes on to outline rules that should be contained in the properties House Rules to govern the usage of a unit that may also be used for incidental business purposes. IFA should be consulted if there is any question about whether a proposed “business” being run in a HOME unit would be considered incidental (sporadic, not scheduled) or permanent in nature.

Things to watch for on a Schedule C

Note: line numbers may change from year to year

Make sure that the last year’s tax return represents a full year’s income; otherwise you will need to annualize. (Line item H)

H If you started or acquired this business during 2012, check here . . .

Make sure to include any wages or contract labor listed on the schedule C that owner paid to him or herself or any other household member. (Line items 11 and 26)

11 Contract labor (see instructions) **11** _____

26 Wages (less employment credits) **26** _____

Make sure that if depreciation is listed, clarification is obtained to demonstrate what method of depreciation was applied. If an accelerated depreciation method was used, the household must provide an accountant’s calculation of depreciation using the straight-line method. The net income should then be determined using the expense based on the straight-line method. (Line item 13)

13 Depreciation and section 179 expense deduction (not included in Part III) (see instructions) . . . **13** _____

31 Net profit or (loss). Subtract line 30 from line 29.
 • If a profit, enter on both Form 1040, line 12 (or Form 1040NR, line 13) and on Schedule S (If you checked the box on line 1, see instructions). Estates and trusts, enter on Form 1041, line

If net business income is negative, income is zero. It does not offset other household income. (Line item 31)

Income Statement

Name: Ellie's Creations
 Time Period: January 1, 2019 through March 31, 2019

Financial Statements in U.S. Dollars

Revenue	
Gross Sales	\$ 12,000
Less: Sales Returns and Allowances	
Net Sales	\$ 12,000
Cost of Goods Sold	
Beginning Inventory	\$ 3,000
Add: Purchases	\$ 100
Freight-in	
Direct Labor	
Indirect Expenses	\$ 500
Inventory Available	\$ 3,600
Less: Ending Inventory	
Cost of Goods Sold	\$ 3,600
Gross Profit (Loss)	\$ 8,400
Expenses	
Advertising	\$ 60
Licenses and Fees	\$ 100
Miscellaneous	\$ 100
Supplies	\$ 600
Vehicle Expenses	\$ 200
Wages	\$ 5,000
Total Expenses	\$ 6,060
Net Operating Income	\$ 2,340
Net Income (Loss)	\$ 2,340

EXAMPLE

Self-employment: New business

Ellie applies to Alpine Manor and reports that she receives social security, but also has started new business creating high end custom artwork. She has not yet filed her income taxes but has created an income statement in order to apply for a small business loan.

In addition to her monthly SS payment of \$760, she was able to pay herself a quarterly salary and reported net income in the amount of \$2,340 for the quarter.

Her income calculation would be:

Social Security	\$760 x 12	\$ 9,120
Salary	\$5,000 x 4	\$20,000
Net Income	\$2,340 x 4	<u>\$ 9,360</u>
Total		\$38,480

EXAMPLE

Self-employment: Business losses

John started a new business January 1st of last year. Tax returns show a loss of \$5,004 last year. It is anticipated to do similarly this year. John’s wife has employment income anticipated to total \$34,560. They have no other income. What is the total anticipated household income?

John’s self-employment	\$ 0
John’s wife	\$34,560
Total	\$34,560

Note: net business losses do not offset other household income.

EXAMPLE

Self-employment: Partial year business income

Susan and Charlene own a business that began July 1st of last year. Their last year’s taxes show a total gross income for the year of \$5,000, and net income of \$4,000. The business is anticipated to do similarly this year. What is the anticipated income for a certification this year?

$$\$4,000 \text{ (net income from half of last year)} \times 2 = \$8,000$$

PERIODIC INCOME: HUD SAYS...

3. Asset Income is:

“Interest, dividends, and other net income of any kind from real or personal property.”

We will cover assets in much greater detail later in this chapter.

PERIODIC INCOME: HUD SAYS...

4. Social Security & Other Benefit Income is:

“The full amount of periodic income received from social security, annuities, insurance policies, retirement funds, pensions, disability or death benefits, and other similar types of or periodic receipts.”

Keep the following guidelines in mind when it comes to social security income. (SS) and supplemental security income (SSI) benefits:

- Count gross amounts BEFORE Medicare or any garnishments are taken out.
- Delayed SS and SSI payments are not counted as income (this also applies to VA benefits).

- Count AFTER adjustments for past overpayments (also applies to TANF and unemployment).
- Be aware of the Cost of Living Adjustment (COLA) which will be announced each year (although there may not always be an increase given). This is typically announced in October and a person begins receiving it either December 1st of the current year or January 1st of the upcoming year. Once the COLA is announced, income for SS recipients who have recently been approved, but have not moved in, will need to have their income eligibility re-examined to ensure that they are still income eligible.

In cases where state or local government, social security, or private pension income is split due to divorce, only count the net payment received.

IFA SUGGESTS

1. SS recipients who are applying to move-in between October and November should be warned of the possibility of a COLA adjustment affecting eligibility.
2. Properties subject to income recertification may want to send a letter in early October reminding households that receive SS to bring in their annual awards letter when it comes in the mail so that the manager has it on hand when the household’s recertification will be due later in the year.
3. Educating households on accessing the **SSA.gov** website may be useful. Printouts of benefit summaries can serve as verification.

Annuities may be either income (periodic payments) or an asset. Use the following guidelines to determine how to count an annuity:

- If there is no “lump sum” that can be cashed in, with periodic payments as the only option, it is income.
- If there is a “lump sum” that can be cashed in and the household is receiving periodic payments, the periodic payments are income, and the balance is ignored as an asset.
- If the household can cash in the lump sum amount of the annuity and no periodic payments are being received, then it is an asset (see asset section for further details).

EXAMPLE

Social Security Income

Adjustment for prior overpayment

The gross payment amount is \$450. However, the actual payment is \$397 due to an adjustment for past overpayment. Count \$397 as the monthly income amount until the adjustment is completed, *at which point the income returns to \$450 for the months remaining in the certification year.*

Delayed benefits

The gross payment is \$490. Of that amount, \$90 is for delayed benefits. Count \$400. *When the delayed benefits are paid out, the payment will drop to \$400, so no adjustment calculation is necessary.*

PERIODIC INCOME: HUD SAYS...

5. Payments in Lieu of Earnings Income is:

“Payments in lieu of earnings, such as unemployment, disability compensation, worker’s compensation, and severance pay.”

Unemployment compensation must be annualized unless a future job is verified via a third party.

EXAMPLE

Unemployment Benefit Income

Verification indicates that unemployment benefits are to be paid for 26 weeks at a rate of \$125 per week. No future job has been secured.

$$\$125 \times 52 \text{ weeks} = \$6,500 \text{ per year.}$$

PERIODIC INCOME: HUD SAYS...

6. Welfare Assistance Income is:

“Welfare assistance received by the household.”

Welfare

Food stamps are often listed by household members as welfare benefits because they get the benefits from the welfare office. However, food stamps are excluded from income and should not be counted.

EXAMPLE

Welfare benefit income

Kenneth’s Welfare verification shows a TANF benefit of \$450 a month and food stamps of \$345 monthly. What is Kenneth’s total annual income from welfare?

$$\$450 \times 12 = \$5,400$$

Note: the value of food stamps is not counted.

PERIODIC INCOME: HUD SAYS...

7. Periodic Allowance Income is:

“Periodic and determinable allowances, such as alimony and child support payments, and regular contributions or gifts received from organizations or from persons not residing in the dwelling.”

1. Cash and Non-Cash Contributions

ALL periodic cash and non-cash contributions (such as rent and utility payments paid on behalf of the household) to the household are counted as income except:

- a. Food groceries given to the household (NOT money to buy groceries).

As we will discuss later in this chapter when covering exclusions to income, many sources of food for low income families are excluded from income per HUD rules. Examples include food stamps, the WIC programs, and meals on wheels. Similarly, periodic contributions of groceries to a household are excluded.

- b. Childcare paid directly to the care provider on behalf of the household.

2. Alimony and Child Support

Alimony and child support amounts awarded by the court must be counted in full, unless the household certifies that payments are not being made and that he or she has taken

EXAMPLE
Child support

Bob was court-ordered to receive child support of \$940 a month. His ex-wife has paid sporadic amounts every month even though Bob has pursued the case through child support enforcement. A printout from the enforcement agency shows the following payments, and the manager calculates income accordingly.

Jan:	\$ 1,004	
Feb:	\$ 450	
Mar:	\$ 450	\$ 3,664 ÷ 6 x 12 = \$ 7,328
Apr:	\$ 200	
May:	\$ 960	
Jun:	\$ 600	
Total	\$3,664	

EXAMPLE
Alimony

Marcia was court-ordered to receive alimony of \$800 a month. Her ex-husband has not been paying his alimony, and Marcia has made no efforts to pursue collection of the arrears. The full \$800 must be counted as income.

all reasonable legal actions to collect amounts due, including filing with the appropriate courts or agencies responsible for enforcing payment.

In many cases, alimony and/or child support has been ordered but is not being paid. If this is the case, the household member must provide a statement attesting to the fact that support payments are not being received, the likelihood of support payments being received in the future and that a reasonable effort has been made to collect the amount due. To

provide this information, IFA’s form *Alimony/Child Support Self-Certification* is a required form. Documentation of efforts taken to collect must be supplied with the form in cases where the full court-ordered amount is not being received. If amounts being received are less than the court-ordered amount after efforts to collect are documented, an average of amounts received may be counted.

Any amounts received must be counted as income, whether court-ordered or not.

EXAMPLE

Cash and non-cash contributions from outside the household

Kia and her daughter live in a unit. Kia’s mother (who is not part of the household) pays Kia’s utilities of \$120 a month. She also writes a check to Kia’s childcare provider for \$400 a month. Kia’s father (also not part of the household) gives Kia \$200 a week in cash that Kia uses to buy groceries and anticipates that he will buy about \$50 a month in clothes for Kia’s daughter. How much of the contributions from Kia’s parents will be counted as income to Kia?

Utility payment	\$120 x 12 =	\$ 1,440
Money for groceries	\$200 x 52 =	\$10,400
Clothes	\$ 50 x 12 =	\$ 600
Total		\$12,440

Note: Only childcare paid directly to the provider is excluded in this case. Groceries given to the household are not counted as income. However, if money is given, the household has discretion over how the money is used and it is income.

PERIODIC INCOME: HUD SAYS...

8. Military Pay Income is:

“All regular pay, special pay, and allowances of a member of the Armed Forces, except...the special pay to a family member serving in the Armed Forces who is exposed to hostile fire.”

As discussed earlier in this chapter, military household members who are assigned out of town, but who have a spouse in a unit, must be considered temporarily absent and must be counted as part of the household. Their income must also be included. A similar rule applies to dependents, with exceptions.

EXAMPLE**Military pay**

Mary is in the military. She receives a total of \$2,200 a month, **which includes** *hazardous duty* pay (duties deemed more dangerous than others for which the military offers special incentive pay) of \$300. What is her total income from the military for tax credit purposes?

$$\mathbf{\$2,200 \times 12 = \$26,400}$$

Note: Only hostile fire pay is excluded from the types of military allowances, incentives, bonuses and special pay that are available to service personnel.

PERIODIC INCOME: HUD SAYS...**9. Student Financial Assistance Income is:**

“For Section 8 programs only ... any financial assistance, in excess of amounts received for tuition, that an individual receives under the Higher Education Act of 1965...from private sources, or from an institution of higher education (as defined under the Higher Education Act of 1965...shall be considered income to that individual, except that financial assistance described in this paragraph is not considered annual income for persons over the age of 23 with dependent children. For purposes of this paragraph “financial assistance” does not include loan proceeds for the purpose of determining income. Note: This paragraph also does not apply to a student who is living with his/her parents who are applying for or receiving Section 8 assistance).”

As stated above, student financial assistance includes:

1. Pell Grants and other programs funded by the Higher Education Act of 1965
2. Assistance from private sources (such as parents or grandparents)
3. Assistance from an institute of higher learning (such as scholarships or other cash assistance)

Generally, for LIHTC and HOME households, all student financial assistance is excluded from income.

If the household is receiving Section 8 rental assistance (through a Section 8 Housing Choice Voucher or project-based Section 8), income is counted differently. This makes it an important compliance matter to ask a household if they are receiving or anticipate receiving Section 8 assistance.

For Section 8 recipients, student assistance received by any student (**full- or part-time**) who attends an institute of higher learning, must be counted; EXCEPT:

- Students who are over the age of 23 and have a dependent child.
- Students who are dependents of the household.

All amounts of student assistance *in excess of tuition* are counted as income. Student loans are not considered student assistance and are never counted as income. *Tuition* includes all costs a student must pay a school to attend. An example of costs that would be added to tuition for purposes of this rule would be lab fees that a student pursuing a science degree must pay.

The following questions should be asked when determining if student assistance should or should not be counted:

- Is the household receiving Section 8 assistance? IF "NO", STOP
- Are any adults enrolled in an institute of higher learning? IF "NO", STOP
- Do the individual adults meet either of the following exceptions? IF "YES", STOP
 - Over 23 with a dependent child
 - Dependent of the household
- How is the schooling paid for each adult student? COUNT STUDENT ASSISTANCE
- What is the amount of tuition for each adult student? SUBTRACT FROM ABOVE

EXAMPLE

Student financial assistance counted

Connor is 21 years old and lives in a unit with his dependent daughter. They have rent assistance through a Section 8 voucher. He goes to school part-time. His tuition is \$5,000 a year and his grandparents pay \$7,000 a year toward his tuition and other school expenses. What student financial assistance will be counted?

Student assistance	\$7,000
Tuition	- \$5,000
Total	\$2,000

Connor is not over age 23. Even though he has a dependent, he must also meet the age requirement. He does not meet an exception and must have some of his student assistance counted.

EXAMPLE

Student financial assistance not counted

Shelly is age 45 and a student who lives in an LIHTC unit with project-based Section 8 subsidy. Her tuition is \$15,000 a year. She has a Pell Grant and other financial assistance totaling \$19,000. She lives with her two dependent sons, Kent (age 15) and Josh (age 21). Josh’s tuition is \$20,000 a year and his father (who is not living in the household) contributes \$24,000 a year to his schooling expenses. What student financial assistance income is counted?

Shelly (over the age of 23 and has dependents):	\$ 0
Josh (is a dependent of the household):	<u>\$ 0</u>
Total	\$ 0

Reminder: as stated earlier in this chapter, when a Housing Choice Voucher holder has their income verified by the PHA, this only serves to verify student financial assistance income. PHA verification, however, does not address LIHTC or HOME student eligibility. Separate student eligibility verification must still be obtained.

HUD SAYS...**Periodic Income Does Not Include:**

Partial list of common exceptions: See HUD 4350.5 Exhibit 5-1 and 24 CFR 5.609(b) and (c) for the full list

- **Income from employment of children (including foster children) under the age of 18 years.**
- **Payments received for the care of foster children or foster adults (usually persons with disabilities unrelated to the tenant family, who are unable to live alone).**
- **Lump-sum additions to family assets, such as inheritances, insurance payments (including payments under health and accident insurance and worker's compensation), capital gains, and settlement for personal or property losses.**
- **Amounts received by the family that are specifically for, or in reimbursement of, the cost of medical expenses for any family member.**
- **Income of a live-in aide.**
- **The full amount of student financial assistance paid directly to the student or to the educational institution (except for students receiving Section 8 assistance).**
- **Temporary, nonrecurring, or sporadic income (including gifts).**
- **Earnings in excess of \$480 for each full-time student 18 years or older (excluding the head of household and spouse).**
- **Adoption assistance payments in excess of \$480 per adopted child.**
- **Deferred periodic amounts from supplemental security income and social security benefits that are received in a lump-sum amount or in prospective monthly amounts.**
- **Amounts paid by a state agency to a family with a member who has a developmental disability and is living at home to offset the cost of services and equipment needed to keep the developmentally disabled family member at home.**
- **The value of the allotment provided to an eligible household under the Food Stamp Act of 1977.**
- **Payments to Volunteers under the Domestic Volunteer Services Act of 1973 (employment through AmeriCorps, Volunteers in Service to America [VISTA], Retired Senior Volunteer Program, Foster Grandparents Program, youthful offender incarceration alternatives, senior companions).**
- **Payments received under programs funded in whole or in part under the Job Training Partnership Act (effective July 1, 2000, references to Job Training Partnership Act shall be deemed to refer to the corresponding provision of the Workforce Investment Act of 1998, e.g., employment and training programs for Native Americans and migrant and seasonal farm workers, Job Corps, veterans employment programs, state job training programs, career intern programs, AmeriCorps).**
- **Payments received from programs funded under Title V of the Older Americans Act of 1985, e.g., Green Thumb, Senior Aides, Older American Community Service Employment Program.**
- **Allowances, earnings and payments to individuals participating in programs under the Workforce Investment Act of 1998.**

Income from Assets

Unlike some other government programs, housing programs do not put a limit on the value of assets a person can own. Eligibility is only affected by how much *income* a household receives from its assets.

Assets are “Items of value that may be turned into cash.”

An asset has a “market value” and a “cash value.”

- The market value is the amount another person would pay to acquire the asset.
- The cash value is the market value less costs to convert to cash.

NOTE: Actual income from an asset where there is an interest rate is based on the **market value**. Cash value is used when imputing asset income (discussed later in this chapter).

When relying on statements or other documentation supplied by the household it is important to ensure that the documents provide all necessary information needed to determine both the market and cash value of the asset.

Assets Owned Jointly

If more than one person owns an asset, its value may be pro-rated based on the percentage of ownership. For example, if verification indicates that an asset is jointly owned by two individuals, typically the pro-rated value of the asset would be 50% unless otherwise verified.

However, just because a household member has their name on an account does not mean that they “own” it. For example, adult children may be on their parent’s checking account for survivorship purposes. To help establish who owns such assets, gather documentation to establish answers to the following questions.

- Who receives the income, if any, from the asset?
- Who pays taxes on the income received?

EXAMPLE

Jointly held assets

Nick and his spouse, Erin, jointly own a piece of real estate with a value of \$80,000. Nick applies to live at Marble Acres Estates. During the application process, the manager determines that Erin is permanently confined to a nursing home and that Nick has decided not to include Erin as part of the household. What amount should the manager count for the real estate?

\$40,000

Two people jointly own this asset. Only one member is being counted in the household, therefore, only 50% of the asset value is counted.

Withdrawals from Investments

HUD tells us that “the withdrawal of cash or assets from an investment received as periodic payments should be counted as income...If benefits are received through periodic payments, do not count any remaining amounts in the account as an asset.”

Therefore, monthly, quarterly, semi-annual *or annual* periodic withdrawals are income, and the asset is not counted. IFA considers Required Minimum Distributions (RMDs) from retirement accounts to be “periodic withdrawals” as they are received periodically on an annual basis and are determinable.

Note that the household chooses whether to take periodic payments from many retirement accounts, and they may change their minds from year to year. For mixed-use properties and mixed-income units subject to income recertification, it will need to be established each year what a household is choosing to do with their retirement accounts to establish whether to count the asset or not.

Despite HUD’s general definition, many “items of value that can be turned into cash” are not counted. It is good to start the discussion of assets with a list of assets that are not counted.

DEFINITION**“Periodic”**

“Occurring or appearing at regular intervals, on a pre-determined schedule.”

The opposite is “sporadic” or “occasionally” which occurs irregularly, on no pre-determined schedule.

HUD SAYS...**Assets Do Not Include:**

Partial list of common exceptions: See HUD 4350.5 Exhibit 5-2.

- **Personal property (clothing, furniture, cars, wedding ring, other jewelry that is not held as an investment, vehicles specially equipped for persons with disabilities).**
- **Interests in Indian trust land.**
- **Term life insurance policies (i.e., where there is no cash value).**
- **Assets that are part of an active business. "Business" does NOT include rental of properties that are held as investments unless such properties are the applicant’s or tenant’s main occupation.**
- **Assets that are NOT effectively owned by the applicant. Assets are not effectively owned when they are held in an individual's name, but (a) the assets and any income they earn accrue to the benefit of someone else who is not a member of the family, and (b) that other person is responsible for income taxes incurred on income generated by the assets.**
- **Assets that are not accessible to the applicant and provide no income to the applicant.**
- **HSA and/or medical trusts.**

OVERVIEW: ASSETS

HUD has defined 10 specific types of assets.

1. Cash and Checking/Savings accounts
2. Revocable Trusts
3. Equity in Real Property
4. Stocks, Bonds, T-Bills, CDs, Mutual Funds, and Money Market Accounts
5. IRA, 401(k), and Keogh accounts
6. Retirement and Pension Funds
7. Whole Life Insurance Policies
8. Personal Property held as an Investment
9. Lump-sum, One-Time Receipts
10. A Mortgage or Deed of Trust held in a household member's name

Below we will discuss each in turn and provide income calculation examples.

ASSETS: HUD SAYS...

1. Cash, Checking & Savings:

“Cash held in savings and checking accounts, safe deposit boxes, homes, etc.”

- For savings accounts, use the current balance.
- For checking accounts, use the average balance for the last six months. This is an exception to the normal rule, whereby assets are simply valued the day that they are verified. Since checking is generally liquid and tends to have greatly varied balances day to day, an average is a fairer assessment of the value.
 - In situations where verifications from banks provide a figure other than the six-month average, (for instance a 3-month or YTD average), exercise good judgment on how to best calculate this asset and utilize the method consistently. IFA may also be contacted for further guidance if needed.

Debit Cards

In 2013 the Social Security Administration announced that almost all SS and SSI recipients will either have their benefits directly deposited into their bank account or will receive a “Direct Express Debit Card”. HUD issued guidance on how to handle these cards, but the direction provided relates to ALL accounts where debit cards are the only evidence of an account (including employment, state welfare cash benefits and unemployment benefits distributed on a debit card).

The balance of the debit card is considered an asset. It is to be verified, consistent with existing *savings* account verification requirements.

The balance can be obtained from:

- An ATM
- Through online account services
- Paper statements

The verification document must identify the account and the account holder. If the total household assets do not exceed \$5,000, no income will be derived from this asset (see the section below on imputing asset income for further details). If the total cash value of household assets exceeds \$5,000, total household assets should be imputed at the current HUD Passbook Rate.

EXAMPLE

Checking and savings

A family owns a checking account that has a 6-month average balance of \$450 and a current balance of \$1,200. They also own a savings account that has a 6-month average of \$600 and a current balance of \$120. Finally, they own a debit card with a current balance of \$200. If these are the household’s only assets, what is the total value of the accounts?

\$450 + \$120 + \$200 = \$770

ASSETS: HUD SAYS... **2. Revocable Trusts:**

“Include the cash value of any revocable trust available” to the household.

Assets may be put into a trust by a person or persons for another person or persons with established terms on how the assets are handled now and in the future. If a household member has created a trust or is the beneficiary of a trust, it may be an asset to them if they have access to a balance. Even if not accessible, the trust may still generate income to the creator or to the beneficiary.

Each trust is different, so in each case it will be important to secure the trust documents to establish whether your household members have any access to the trust balance (thus making it an asset) and whether they receive any income from it.

DEFINITIONS

Trust terminology

When reading trust documents, the following terms will be useful in establishing how to value and count income for the trust:

Revocable

A household has access to the trust and can cash it in or change the terms. The opposite is a *non-revocable* or *irrevocable* trust, which cannot be changed and are generally not accessible to a household.

Creator or grantor

Original owner of the assets that were put into the trust.

Beneficiary

The person that the trust is set up to benefit.

When the creator of a non-revocable trust establishes the trust, it is no longer accessible to them. It is not a current asset. However, if the trust was created within two years prior to a certification, the creator disposed of the assets in the trust, so a disposed of asset value will be assigned and income may be calculated when imputing asset income. See the sections below in this chapter on assets disposed of and imputing asset income for further details.

ASSETS: HUD SAYS

3. Equity in Real Property:

“Equity in rental property or other capital investments. Include the current fair market value less: (a) Any unpaid balance on any loans secured by the property and (b) Reasonable costs that would be incurred in selling the asset (e.g. penalties, broker fees, etc.)”

Determining the value and income from real estate that a household member owns can be a bit confusing. The chart shown below should help to keep the two straight.

Determining Real Estate:	
<u>Value</u>	<u>Annual Income</u>
Fair Market Value	Annual rental payments
- Outstanding mortgage principal	- Annual mortgage interest payments
- Cost to sell =	- Other allowed expenses* =
Cash Value	Annual Net Income

*: Taxes, insurance, maintenance (or other tax form schedule E costs)

In all cases where real estate is owned, the left side of the chart will apply. The right side of the chart only applies to households that are renting out real estate that they own. Be careful to note that many expenses are only deductible if rental income is involved. For instance, maintenance costs cannot be deducted from the value of a home for a person who is letting it sit empty. That deduction is only available when determining net income when rent is being received.

Real estate value is often verified through a combination of document types. Mortgage statements, tax returns and property tax statements establishing tax assessment based on market value often yield information needed to determine the cash and market values of real estate. The most recent tax return with *Schedule E* (for rental property) or *Schedule F* (farmland) may also be used to establish net income from the property. For further information on the types of items to look for on tax schedules when calculating net income, compare the *Self-Employment* section earlier in this chapter that used the *Schedule C* to establish net income from a business.

EXAMPLE

Real estate value and income

Darcy owns a home that she is renting out. She receives \$1,600 a month in rent (\$19,200 annually). The market value of the home is \$300,000. She has an outstanding mortgage balance of \$100,000 and monthly mortgage payments of \$1,962. Total interest payments on the mortgage will be \$9,500 in the coming year and principal payments will total \$14,044. If she were to sell the home, a broker determines the costs to be 10% of the market value, or \$30,000. The cost to maintain the home is \$1,004 a month (\$12,048 annually).

Determining Real Estate:			
Value		Annual Income	
\$ 300,000	Fair Market Value	\$ 19,200	Annual rental payments
- \$ 100,000	Outstanding mortgage principal	-\$ 9,500	Mortgage interest
- \$ 30,000	Cost to sell =	-\$ 12,048	Other allowed expenses

\$170,000 Cash Value

(\$2,348)

Annual loss

\$ 0 income is counted

Question: are mobile homes considered real estate or personal property?

Answer: Per Iowa Code 435.2, property tax rules on manufactured and mobile homes distinguish a difference as to where the “home” is placed; if it is in a mobile home (or manufactured or modular home) park or community then it is not to be assessed or taxed as real estate. If it is outside of such a community, then it is taxed and assessed as real estate. The assumption is that the owner of the “home” must also own the land on which the “home” is affixed (either the home is placed on a foundation or is otherwise no longer “moveable”).

ASSETS: HUD SAYS

4. Stocks, Bonds, etc.:

“Stocks, Bonds, Treasury Bills, Certificates of Deposit, Mutual Funds, and Money Market accounts. Interest or dividends earned are counted as income from assets even when the earnings are reinvested.”

You will notice that this category contains quite a variety of assets. In each case, it is important to determine the market and cash values and the income. The following chart lists how these are established by asset type.

Stock Market Vehicles	CDs and Money Markets
(Individual stocks and mutual funds)	
Market Value = # of shares owned X price per share	Market Value = Current Balance
Cash Value = Market Value less costs to sell (commissions)	Cash Value = Market Value less fees for withdrawal
Actual Income = Annual Dividend X # of shares	Actual Income = Interest rate X Market Value
Savings Bonds	A great tool to calculate bonds can be found at www.savingsbonds.gov
Market Value = Redeemable Value	You just need a record of the bonds, or the bond type (EE, for example), face value and date issued.
Cash Value = Redeemable Value	
Actual Income = Interest rate X Market Value	

Face Value Bond Type Date Issued

EXAMPLE

Certificate of deposit

A certificate of deposit has a market value of \$6,140. The penalty for early withdrawal is \$540, resulting in a cash value of \$5,600. The interest rate is 3%. What is the anticipated annual income on the CD?

(Market value) \$6,140 x 3% (.03) = \$184.20

EXAMPLE

Stocks

A resident owns 1,034 shares of stock in X-corp. The stock value is \$2.30 per share and the dividend paid is \$.50 semi-annually. What is the market value and income from the stock?

Market value:	1,034 x \$2.30	\$2,378.20
Income:	1,034 x \$.50 x 2	\$1,034.00

ASSETS: HUD SAYS...

5. IRA, 401(k)s, Annuities, Keoghs:

“These are included when the holder has access to the funds, even though a penalty may be assessed. If the individual is making occasional withdrawals from the account, determine the amount of the asset by using the average balance for the previous six months. (Do not count withdrawals as income.)”

ASSETS: HUD SAYS...

6. Retirement Accounts:

“Include the amount the household can withdraw without retiring or terminating employment. “

Retirement accounts have taken different forms over the years, so you will see above that HUD has separated them into two types. There are the more modern employee-funded, tax-sheltered accounts like 401(k)s and Individual Retirement Accounts (IRAs) and older-style pension accounts. The good news is that they are treated the same way.

While the owner of the retirement account is employed, only the part of the asset that can be cashed in without quitting or retiring is counted.

Once benefits are being received, then we determine if the account provides income only, or if it is an asset (see the section *Withdrawals from Investments* above in this chapter for further details on when periodic payments that are taken require the manager to exclude any balance as an asset).

EXAMPLE

Retirement account with periodic withdrawals

Mohammad has an IRA from which he is making periodic withdrawals of \$1,000 a month. The value of the IRA is \$54,000. Are the periodic withdrawals counted as income?

YES

Should the IRA value be counted as an asset?

NO

As periodic withdraws are being taken, the IRA is not counted as an asset.

EXAMPLE

Retirement account without access

Krystal is working for an employer that provides a pension fund. It is valued at \$6,090. It is verified that Krystal will not be able to collect the money until she retires in many years. What is the asset value that will show up on the certification?

\$0

If a person must quit a job to access a retirement account, it is not considered accessible or an asset.

ASSETS: HUD SAYS...**7. Whole Life Insurance:**

“Cash value of life insurance policies available to the individual before death (e.g. the surrender value of a whole life policy or a universal life policy).”

This does not include **term** life insurance that carries no cash value to the individual before death. Also, be careful not to count the full benefit value of the policy if the person were to die. You want the value that a person could cash in now, which is generally much lower than the benefit value upon death.

EXAMPLE**Whole v. Term Life Insurance**

Tom has two life insurance policies. One is term life, with a benefit of \$250,000. The second policy is whole life. It also has a death benefit of \$250,000. Its cash value is \$45,000 with an interest rate of 4%. What is the income that will be counted for his life insurance?

$$\$45,000 \times 4\% = \$1,800$$

ASSETS: HUD SAYS...**8. Personal Property Investments:**

“Include gems, jewelry, coin collections, or antique cars held as an investment. Personal jewelry is **NOT** considered an asset.” Also excluded: “Personal property (clothing, furniture, cars, wedding ring, other jewelry that is not held as an investment, vehicles specially equipped for persons with disabilities.”

As covered above, generally personal property is not counted as an asset. A household member may hold personal property that has great value but does not intend to sell it at any point. However, at times, they do intend to sell and are just holding it until it achieves a value they want. In that case, it is an asset. As you can see *intent* is the crucial difference in these cases. If they are truly holding the asset as an investment, then a value will need to be assigned to the property. This can be an appraisal, a current list of collectibles valued per credible trade catalogs or other reasonable means.

QUIZ**Personal property investment****TRUE or FALSE**

If a person has inherited an antique automobile valued at \$100,000 or more, it is automatically considered personal property held as an investment.

FALSE

No value automatically makes personal property an investment. The holder's intent is the important factor.

For a discussion of whether a mobile home is personal property or real estate, see the section on *Equity in Real Property* earlier in this chapter.

ASSETS: HUD SAYS...**9. Lump-sum and One-time Receipts:**

“Inheritances, capital gains, one-time lottery winnings, victim's restitution, settlements on insurance claims (including health and accident insurance, worker's compensation, and personal or property losses), and any other amounts that are not intended as periodic payments.”

These assets are usually verified when they are deposited into another asset (for instance a checking or savings account). Generally, the lump sum is not an asset itself unless it is still an uncashed check. Be careful not to double-count the lump sum where it has been deposited into another account.

If a lump-sum or one-time receipt of an asset occurs and the full amount is not distributed into another verifiable asset, it is important to determine what was done with the asset to ensure that it is not an asset disposed of for less than fair market value (see below for further on that topic). However, amounts used to pay for living expenses or purchase personal property for the household are allowable and only the remaining value is counted as an asset.

EXAMPLE**Lump sum one time receipt**

A month before moving in, George gets a one-time insurance settlement for \$23,000. The money is put into his savings account (his only asset). Subsequently, the balance of the savings account is verified to be \$27,320. What is the total asset value for the household?

\$27,320

ASSETS: HUD SAYS...**10. Mortgage, Deeds of Trust:**

“Payments on this type of asset are often received as one combined payment of principal and interest with the interest portion counted as income from the asset.”

Also known as a “contract for deed”, this is a seller-financed mortgage. A household member may be selling real estate on such an arrangement. To verify this asset, an amortization (loan payment) schedule is needed for the mortgage. This will break out each payment, and how much of it is interest and how much is principal.

The cash value and market values are the principal balance on the loan at the effective date of the certification. The income is the interest payments that will be received for 12 months from the certification effective date.

Amortization Example

Marvin Finkley is going to move in on February 15th, 2014. He is selling land on a deed of trust reflected in the below amortization schedule.

1. Circle the value of the asset
2. Circle the amounts to be added to determine income from this asset.

Enter Loan Information in Light Blue Cells Below				Loan Summary			
Name of Loan And/Or Lender	Bailout Bank Inc.			Scheduled Payment Amount (Per Period)	\$1,070.88

Imputing Asset Income

When a household has considerable assets, HUD wants a household to at least make a bare minimum rate of return on those assets. For this reason, if the cash value exceeds \$5,000, a passbook savings rate, based on FDIC national averages, must be applied to the total cash value of the household’s assets. If income based on that bare-minimum rate is higher than the amount the household is receiving, then the imputed income will be used.

NOTE: HUD announced in 2017, that an adjusted HUD passbook rate would be announced at least annually, however that has not been the case. It is important to watch for these changes and implement the use of the current HUD passbook rate as of the required effective date.

Disposed of Assets

It is not the intent of HUD for people to give away their assets in order to qualify for affordable housing units. If a household member gives away assets for substantially less than they were worth, HUD rules require that the portion of the asset that was given away still be included as a household asset for two years from the time the asset was given away or sold. This rule applies when the difference between the market value and the amount received was more than \$1,000. Assets lost to foreclosure, bankruptcy, divorce or separation settlements are not counted as disposed of assets.

The disposed of asset value is the cash value of the asset, less the amounts received.

EXAMPLE

When asset income is imputed

A household has the following assets.

Type of Asset	Market Value	Cash Value	Actual Annual Income
Checking Account (6-mo average)	\$ 700	\$ 700	\$ 0
Certificate of Deposit	\$ 3,700	\$ 3,500	\$ 175
Stocks	\$ 3,400	\$ 3,200	\$ 0
Real Estate	\$100,000	\$60,000	\$2,800
TOTAL	\$107,800	\$67,400	\$2,975

Since assets exceed \$5,000, actual income must be compared to imputed income based on the current HUD passbook savings rate. The certification was done in early 2015, so the applicable rate was .06%.

$$\$67,400 \times .06 \% (.0006) = \$40.44$$

Actual income of \$2,975 is higher and will be used when calculating income.

EXAMPLE

When asset income is not imputed

A household has the following assets.

Type of Asset	Market Value	Cash Value	Actual Annual Income
Checking Account (6-mo average)	\$ 700	\$ 700	\$0
Real Estate	\$100,000	\$2,000	\$0
TOTAL	\$100,700	\$2,700	\$0

Since the cash value of assets do not exceed \$5,000, actual income will be used to calculate income and \$0 income from assets will be added to household income.

EXAMPLE**Disposed assets**

John and Marty moved into a unit at Crystal Caves Townhomes on **01/01/15**. They had given their small farm to their sons on **12/01/14**. The farm's cash value was \$400,000.

The manager must count the value of the farm as if they still owned it until: **12/01/16**

What is the amount of imputed income that was included on their move-in certification (using the 2015 HUD Passbook Rate of .06%)?

$$\$400,000 \times .06\% (.0006) = \$240$$

Mei and Hiro moved in a month later 01/01/15. They had made a charitable donation to their church totaling \$400,000 on **07/01/13**.

The manager must count the value of the disposed of cash as if they still owned it until: **07/01/15**

What is the amount of imputed income that was included on their move-in certification (using the 2015 HUD Passbook Rate of .06%)?

$$\$400,000 \times .06\% (.0006) = \$240 \div 12 \times 6 = \$120$$

Note: Unlike the first example, the 24 month period ended during the first certification year, so the imputed income was prorated for the months until the asset is no longer counted.

EXAMPLE**Disposed assets**

Jane Doe sold a house worth \$89,000 to her daughter for \$10,000. Reasonable realtor and legal fees are determined to be \$1,800. What is the disposed of asset value?

$$\$89,000 - \$1,800 - \$10,000 = \$77,200$$

Tenant Income Certification (TIC)

Once all household composition and income information has been gathered and verified, the information is encapsulated on the *Tenant Income Certification* (TIC). IFA has a TIC that is required for both LIHTC and HOME units (with exceptions explained below for persons with subsidy from other programs). All household adults and the owner/manager must sign the TIC. Be sure to download the most current TIC form and instructions on the IFA website.

The TIC:

- Should be typed or completed in pen. Pencil is not acceptable. *If handwritten, it must be legible, or it will be returned for correction.*
- Should never be signed blank. The signature is how the manager and household attest that the information on the form is accurate. Signing a blank TIC is a form of fraud.
- Should always have the signature dated when it is signed. It must never be back-dated to match the effective date in cases where the TIC is signed late.
- Any corrections that are necessary (such as math errors resulting in incorrect income totals) should be made by crossing out the incorrect information and adding the correct information. Whiteout does not show what correction was necessary and should never be used. Both the tenant and the manager must initial all changes on the TIC.
- Can reflect the past effective date where a late certification is being created retroactively. However, it must be signed using the current date and include a statement by the signature that the information was “true and accurate as of” the effective date.

Exceptions where the IFA TIC is not required

As explained earlier in this chapter, households receiving Housing Choice Voucher assistance may have their income verified by the PHA providing their voucher during recertification. The certification form 50058 produced by the PHA can serve as both the verification of income and TIC during the recertification process only.

For HOME it applies for years other than the move-in and recertifications other than every 6th year of the HOME Affordability Period. The certification forms for project-based Section 8 (the 50059) or Rural Development (3560-8) can also serve as TICs for LIHTC and HOME recertification purposes only.

NOTE: The documents from RD and Section 8 must be accompanied by the proper verification of income documentation.

Chapter 4 - Other Rules

Recertification

Not all LIHTC projects require annual income recertification as detailed in the following pages. Projects with HOME do have annual recertification requirements. If the project is required to perform an annual recertification of either its LIHTC and/or HOME households, they are to be processed by the anniversary date of the effective date of the most recent Tenant Income Certification. IFA allows an owner/manager to move effective dates to meet other program requirements or for other reasons. The process of recertification is like the initial verification process for new move-ins.

IFA SUGGESTS

Notify residents 90-120 days before their recertification is due. This gives you plenty of time to deal with the issue if the household does not cooperate. In cases of extreme non-cooperation, tenancy can be terminated before federal noncompliance with recertification rules occurs.

LIHTC – 100% Projects

Since 2008, federal law considers income recertification at projects that are 100% LIHTC to be irrelevant as a project will always move in an income-qualified household into a vacant unit. For these projects, only student status needs to be verified annually by the anniversary of the effective date of the most recent certification. Although some state HFAs, investors or syndicators require a full income recertification on the first anniversary of move-in, IFA does not make this a requirement.

Deep Rent Skewed projects, even those that are 100% LIHTC, continue to be subject to full income recertification (see below).

NOTE: Owners/managers need to demonstrate due diligence when moving in all households to make sure that all available units are rented to qualified households. If an ineligible household is moved in and it cannot be demonstrated that due diligence measures were in place the Available Unit Rule is violated and an 8823 will be issued.

LIHTC – Mixed-Use Projects

Recertification at mixed-use projects ensures that a project maintains the appropriate applicable fraction for each building in the project. To comply with federal requirements, full recertification of income and student status must be conducted for each LIHTC household annually for mixed-use projects.

LIHTC – Mixed-Income Projects

At mixed-income 100% LIHTC projects, owners/managers must, at a minimum, recertify those units that are used to satisfy more restrictive state set-asides (for example, 30%, 40% and 50% units) to determine if they

IFA TERMS

Mixed-use and mixed income

To differentiate types of LIHTC properties, IFA uses the following terms consistently in this manual in relation to tenant recertifications:

Mixed-use: a project with LIHTC and non-LIHTC (market) units.

Mixed-income: a 100% LIHTC project with state covenant set-asides at lower income limits than federally required or a Deep Rent Skewed Project.

continue to meet the state set-aside as determined during allocation.

In some cases, additional units might need to be rented at the state set-aside to replace units that are determined to be over-income in order to satisfy the state covenant. Check your LURA to ensure compliance with this requirement.

Since the election to Deep Rent Skew requires adjusting units to 40% when the AUR is triggered (see the AUR section below), full annual recertification of all low income units will also need to be conducted at Skewed projects.

HOME Projects

Full third-party source documentation/verification of income is only required every 6th year of the affordability period.

In other words, in the 1st, 6th, 12th and 18th year of the HOME affordability period everyone who has lived in the project that is due for a recertification must be fully recertified using third-party verification. For other years, self-certification or PHA verification (for voucher holders) is sufficient.

Notice that the years to fully recertify are not specific to the length of individual household tenancy, but rather to project-specific years. If you are unsure of where your project is in its Affordability Period, please contact your IFA Compliance Officer for assistance.

LIHTC/HOME Projects

When programs are combined, the most restrictive recertification cycle will apply. The primary factor in these cases will be if the project is simply 100% LIHTC, mixed-income, or mixed-use (see the “recertification” chart later in this chapter for further details).

EXAMPLE

Recertification at a HOME Project

Affordability Period Starts 3/1/2016 **3/1/2016 to 2/28/2017**

The 1st year of the HOME Affordability Period

3/1/2017 to 2/28/2018

The 2nd year of the HOME Affordability Period

3/1/2018 to 2/28/2019

The 3rd year of the HOME Affordability Period

- 6/1/2018: Rosy moves into a HOME unit with full certification.

3/1/2019 to 2/29/2020

The 4th year of the HOME Affordability Period

- 6/1/2019: Rosy is recertified using self-certification.

3/1/2020 to 2/28/2021

The 5th year of the HOME Affordability Period

- 6/1/2020: Rosy is recertified using self-certification.
- 6/1/2020: Betty moves into a HOME unit with full certification

3/1/2021 to 2/28/2022

The 6th year of the HOME Affordability Period

- 6/1/2021: Rosy is recertified using full certification.
- 6/1/2021: Betty is recertified using full certification.

Increases of Household Income after Move-In

LIHTC Available Unit Rule

The LIHTC program is designed to let households increase their income without penalty after they move in. However, owner/managers at projects that contain non-LIHTC units are under obligation to rent non-LIHTC units that become vacant to LIHTC households to replace units housing LIHTC households that are “over-income” when recertified. This is called the Available Unit Rule (AUR).

LIHTC – 100% Project

Although for 100% LIHTC projects (unless Deep Rent Skewed –see below), income recertification is not required by IFA, owners/managers must demonstrate due diligence when moving in new households to make sure that all units that become available are rented to qualified households. If an ineligible household is inadvertently moved in, the project must demonstrate due diligence measures are in place that are designed to avoid errors in general when processing files. Lack of due diligence may be indicated by several over-income move-ins, lack of basic verification processes or no dual reviews of tenant files prior to move-in. If the owner/manager cannot demonstrate that good due diligence practices are in place after having moved in an over-income household, they violate the Available Unit Rule which would result in the loss of any such units to noncompliance.

LIHTC – Mixed-Use Projects

“Mixed use” projects are those with any non-LIHTC (market rate) units. These projects are subject to full income recertification *of all LIHTC units* each year. If a household’s income increases to over 140% of the current qualifying income limit when they are recertified, they become “over-income”. Credits can continue to be claimed on the unit as long as the next available unit (of equal or smaller size) **in the same building** is rented to a qualified household. The goal is to restore the applicable fraction, not counting the over-income household. Over-income units must remain rent restricted until the next available unit(s) are rented and all over-income LIHTC units are replaced. If the rule is violated, all comparable or smaller 140% units are no longer LIHTC for both the building’s applicable fraction & the project’s minimum set-asides. A Unit is no longer “available” if a legally binding agreement is in place prior to the effective date of a household being determined to be over 140%. For instance, if a lease is signed by a non-LIHTC household, but the household has not moved in, the unit is not “available” for purposes of the AUR. It is OK to move in the non-LIHTC household after the over-income recertification is effective. However, any non-LIHTC unit not legally spoken for is subject to the AUR. Once all over-income units are replaced with LIHTC units after following the AUR, the over-income households can be treated as non-LIHTC and can be charged market rents as soon as the lease allows.

For an example of when the AUR is applied correctly, as well as one when it is violated, see below.

EXAMPLE:

AUR (correctly followed)

June:
Applicable Fraction: $\frac{5}{10}$

July: two households go over 140% at recertification
AUR is triggered

Aug: A market unit becomes available
AUR is in effect

Sept: An LIHTC household moves in
LIHTC unit fraction: $\frac{4}{10}$ (excluding OI units)
AUR is still in effect

Oct: Another market unit comes vacant and is rented to an LIHTC household
Applicable Fraction: $\frac{5}{10}$

As applicable fraction is restored excluding OI units, OI units may be converted to market
AUR is satisfied

EXAMPLE:
AUR (violated)

June:
Applicable Fraction: $\frac{5}{10}$

July: two households go over 140% at recertification
AUR is triggered

Aug: A market unit becomes available
AUR is in effect

Sept: A market household moves in
Applicable Fraction: $\frac{3}{10}$
AUR is violated

Note:
For buildings that have an applicable fraction based on square footage, the calculations may be more complex than here presented.

LIHTC – Average Income Test Projects

The Available Unit Rule (AUR) works differently at properties that elected the Average Income test on Form 8609. The **first** difference is the threshold at which the units are considered “over-income.” For the original MSAs, the threshold is reached when a household at recertification exceeds 140% of the

current minimum set-aside income limits. Thus, it is 140% of the 50% limits for 20-50 projects or 60% for 40-60 projects. For Average Income projects, the threshold will be 140% of the HIGHER of the 60% limits or the designation for a unit. This means that those units designated between 20% and 60% will use 140% of the 60% limit while units designated at 70% will use 140% of the 70% limit and 80% units will use 140% of the 80% limit applicable to the unit.

The **second** adjustment to the AUR is the care that must be taken to re-rent the next available unit at the correct set-aside to satisfy the rule. The action taken will depend on whether the vacant unit is already tax credit or not.

1. If a unit becomes vacant and is a **tax credit** unit while an over-income household is living in a comparable or larger unit in the building, the available vacant unit must be rented to a household at the designation the unit is currently designated at.
2. If a unit becomes vacant and is **market** while an over-income household is living in a comparable or larger unit in the building, the available vacant unit must be rented to a household at the designation that the over-income unit is designated at. This replaces the over-income unit in your unit mix.
3. If two units at different set-asides are over-income at recertification and a vacant **market** unit becomes vacant, IFA requires that the vacant unit replaces the designation of the over-income unit that has the lowest designation.
4. If an Average Income Test property is also subject to State agency covenants, the State AUR will also apply (see discussion below)

LIHTC/HOME – State Agency Covenant Projects

As stated earlier in this chapter, units designated to satisfy the State agency covenant set-asides are subject to recertification, even at 100% LIHTC and Average Income Test properties. If any unit designated an agency covenant unit exceeds its designated set-aside at recertification, it is considered “over-income” and the State Available Unit Rule (State AUR) is invoked. Unlike the federal AUR, the State AUR does not allow the LIHTC household to go up to the 140% limit before triggering the rule. The State AUR requires that the next **comparable** unit in the **project** must be rented to a household eligible at the set-aside that the “over-income” household originally met. For projects with HOME, it’s important to know if your agency covenant units are fixed or floating (contact your Compliance Officer with questions). The goal is to restore the mix of units designated in the LURA or the Exhibit A as established during allocation.

Note: Although increases of income alone do not require adjustment to a unit’s Average Income designation, charging the rent appropriate to a State agency covenant after upward adjustment may require changing the unit’s federal Average Income LIHTC designation to a higher level, and the Average Income unit designation mix reassessed to assure an average of no more than 60%.

EXAMPLE**Average Income Project with Agency Covenants – Invoking the State AUR**

The Aziz family moves into Pleasant Valley Apartments, a 10-unit project containing 40%, 60% and 80% AMI units. At move-in this household qualifies for a 40% unit which also fulfills an agency covenant requirement. At recertification the household goes from 40% to 60% AMI. This invokes the State Available Unit Rule and requires that the next available unit in the project of comparable or larger size (whether LIHTC or market) be rented to a 40% household. AFTER a new 40% household is qualified and moves into the vacant unit, the Aziz household unit designation would change to a 60% AMI unit, and the higher rent imposed (as their lease allows). This will preserve the average income.

EXAMPLE**Increase of Income in a Unit designated to satisfy an Agency Covenant**

Blue Skies Apartments is a property with 75 units in three buildings. The project's LURA requires that 15 of the units be rented to households at 30% AGMI and the remaining units rented to households at 60% AGMI.

Archer moves into a 30% unit. At his second recertification, he is \$200 above the 60% limit and thus exceeds the 30% set-aside for the first time since he moved in. As Archer is not above 140% of the minimum set-aside 60% limit, the federal Available Unit Rule is not triggered, however the state Available Unit Rule has been triggered.

When the next 60% unit that is comparable to Archer's unit becomes available in any building in the project, the unit is leased to a 30% household who pays the appropriate 30% rent. Once Archer's unit is replaced with the new 30% household, his unit is designated as a 60% unit and his rent adjusted when his lease allows.

Fair Market Rents (FMR)

An Owner may agree to the FMR limits as outlined in the project LURA that the rent for all of the residential units shall not exceed 100% of the fair market rent as established by the U.S. Department of Housing and Urban Development. If a unit exceeds this limit, it is to be considered 'over-rent'. The overage must be refunded to the tenant. Documentation must be provided to IFA (copy of refund check and/or letter explaining the refund).

LIHTC – Deep Rent Skewed Projects

The Available Unit Rule works differently at Deep Rent Skewed Projects for several reasons.

- The definition of over-income is 170% of the current income limits rather than 140% as used in projects that are not skewed.
- The election to skew also has the effect of “fixing” LIHTC units in a project. If a project consists of 10 units, and units 1-5 are LIHTC and units 6-10 are non-LIHTC, the non-LIHTC units 6-10 never have to become LIHTC units, even if households are over-income at recertification. This is helpful where non-LIHTC rents are substantially higher than the LIHTC rents and ensures that the non-LIHTC unit rent revenue will remain consistent.

According to §42 (g)(2)(D) of the Code, once a household triggers the AUR at a Deep Rent Skewed project, ALL subsequent LIHTC units that become available must be rented to 40% households until the over 170% household moves out or their income decreases at future recertifications to at or below the 170% mark. This means that the owner may end up with more 40% units than originally planned for with less rent collected.

NOTE: The serious possibility of ending up with some or even most of the LIHTC units ending up at 40% rents should be carefully considered before making the irrevocable election to Deep Rent Skew, especially at 100% LIHTC projects where the benefit of consistent market rents is not a factor.

EXAMPLE**Increase of Income in a Deep Rent Skewed (DRS) Project**

Green Prairie Apartments is a 100% LIHTC property with 40 units. The project 8609 indicates that the DRS election was made which requires that 6 of the units are rented to eligible households at 40% AGMI and the remaining units rented at the LIHTC minimum set-aside limit of 60%. AGMI

Marisol moves into a 40% DRS unit. At recertification, she is \$100 above 170% of the 60% limit and thus is considered an over-income household. Until Marisol moves out or her income drops below 170% of the 60% limit, each vacant unit must be filled with a 40% eligible household.

Marisol will not move out of her unit and her income has not decreased at her next recertification. Over the course of the next 12 months four vacant 60% units have had to be rented to 40% households. The owner now has 13 units at 40% resulting in a significant loss of rental income.

HOME Projects - Over-Income Rules

When an owner/manager recertifies a HOME household's income, the household's income is considered “over-income” for the HOME Program when:

- The household occupies a Low HOME unit, and the household's income increases above the current very-low (50% AMI) income limit but does not increase above the low income (80% AMI) limit, or

- The household occupies a unit at an agency-designated income limit (an “Agency Covenant”), but does not increase above the low income (80% AMI) limit, or
- The tenant occupies a High or Low HOME unit and the household income increases over the current HOME Low income (80%) limit for that household size.

When a HOME unit goes over income, the unit and property are in temporary noncompliance with HOME Program requirements. Temporary noncompliance is permissible if the owner/manager takes steps, at the next available opportunity, to restore the property’s unit mix. These steps will vary, depending on if the property has fixed or floating HOME units.

Note: the owner/manager cannot terminate or fail to renew a lease because a household is over-income, but the household’s rent may be adjusted according to the HOME rules. Over-income households are protected by the terms of their leases; rent changes go into effect only when the lease permits.

The following chart gives instructions on what to do when a HOME unit goes over income. Note that there are different procedures for fixed and floating HOME units that go over the HUD low (80%) limit.

When Income Increases at HOME Recertification

1. If a Low-HOME household’s income increases above 50% AMI, but remains less than the HUD low (80%) limit:

For all HOME properties:

- The next comparable High-HOME unit must be rented to a very low income (50%) household and re-designated as a Low HOME Unit. When “replaced”, the rent may be increased to the High HOME rent.
- Non-HOME units are not affected.

2. If a Low- or High-HOME household’s income increases above the HUD low (80%) limit:

Fixed HOME Properties	Floating HOME Properties
<ul style="list-style-type: none"> • As soon as the lease allows, rent <i>must</i> be raised to 30% of adjusted income, with NO cap. • If it is a Low-HOME unit, the next High-HOME unit must be rented to a Low-HOME household. • Note: If the unit is also an LIHTC unit, the new rent is based on adjusted income and capped at the LIHTC max rent limit. 	<ul style="list-style-type: none"> • As soon as the lease allows, rent <i>must</i> be raised to the lower of 30% of adjusted income or market rent. • The next available unit in the property must be rented to a HOME-eligible household to restore the original balance of Low/High-HOME set-asides required by the property’s HOME Contract. • Once “replaced”, the over-income unit may be treated as non-HOME. • Note: If the unit is also an LIHTC unit, the new rent is based on adjusted income and capped at the LIHTC max rent limit.

Monthly rent for households who are over the 80% limit:

$$\text{Gross Income} - \text{Deductions} = \text{Adjusted Annual Income} \div 12 \times 30\%$$

Adjusted Income-Based Rent

Once gross household income is calculated (as discussed in Chapter 3), 5 possible adjustments may be made before rent is determined.

1. Dependent Deduction

This is a \$480 (per dependent) annual allowance. A dependent is someone who is:

- Under 18 years of age
- A person with disabilities
- A full-time student of any age

A dependent can never be:

- Head, spouse, or co-head.
- Foster child, a child who is unborn or has not yet joined the household, or a live-in aide.

Documentation must be gathered to prove that an adult is a qualified full-time student if they are to be considered a dependent.

2. Childcare Expense

Anticipated unreimbursed expenses for the care of children (including foster children) under age 13 may be deducted if:

- The expenses enable a household member to work or go to school (part or full-time).
- No adult household member is available to provide care.
- The amount that allows the adult to work must not exceed the income received from the work. Expenses that allow schooling have no limit.

The money cannot be paid to a household member living in the unit and the expenses must reflect reasonable charges. There is no limit on reasonable costs that allow an adult to look for work or attend school. Only \$480 will be allowed annually to enable a qualified adult FT Student (who is not a head, spouse or co-head) to attend school because \$480 is the amount counted as income. These expenses must be for a child living in the unit.

3. Disability Assistance Expense

Reasonable expenses for auxiliary apparatus or the care of an individual with disabilities in excess of three percent of annual income may be deducted from annual income if the expenses:

- Enable the individual with disabilities or another household member to work;
- Are not reimbursable from insurance or any other source; and
- Do not exceed the amount of income earned by the person who is able to work as a result of the expenses.

Along with other forms of documentation, to qualify for this deduction the household must identify the individual with a disability on the application.

4. Elderly Household Deduction

A single \$400 deduction is made from annual income for any “elderly household”. To be considered an elderly household, the head of household, spouse or sole member of a household who is a party to the lease must be 62 years of age or older, or an individual with a disability.

5. Medical Expenses

To qualify for this allowance, the head, spouse, or co-head must be at least 62 or disabled. It includes the un-reimbursed medical expenses of ALL household members. It includes all anticipated expenses during the 12 months following certification/recertification that are not reimbursed by an outside source (such as insurance).

The owner may use the ongoing expenses the household paid in the 12 months preceding the certification/recertification to estimate anticipated medical expenses.

Once the annual adjusted income is determined, dividing by 12 establishes monthly adjusted income. Monthly adjusted income is then multiplied by 30% to determine rent based on adjusted income.

The below worksheet provides a useful tool for determining adjusted income. An owner/manager may develop their own tools.

Sample Format for Calculating Adjusted Income-Based Rent				
Household Member Name	Position in Household	Age	Total Income	Total Expenses

1. Enter Annual Gross Income.

1.

2. Enter the number of household members (excluding head or spouse) under 18, disabled, or full-time students.

2.

3. Multiply line 2 by \$480.

3.

4. If a household member is enabled to work or further their education as a result of childcare expenses, enter the unreimbursed annual childcare expenses (reasonable childcare expenses for children under age 13).

4.

5. If the household member was enabled to work as a result of the childcare expenses, enter that household member’s annual employment income.

5.

6. If an amount is reported on Line 5, enter the lesser of Lines 4 or 5. Otherwise, enter the amount in Line 4.

6.

7. If the household qualifies as an elderly and/or disabled household, enter \$400.

7.

8. Add Lines 3, 6, and 7.

8.

9. *If this household has no unreimbursed disability assistance or medical expenses*, subtract Line 8 from Line 1. This is the Adjusted Income for this household *without* these expenses.

9.

10. If Line 9 is applicable, divide Line 9 by twelve and multiply by 30%. This is rent based on adjusted income.

10.

*****FILL IN LINES 11 THROUGH 20 IF THE HOUSEHOLD HAS*****
UNREIMBURSED DISABILITY ASSISTANCE OR MEDICAL EXPENSES

11. Enter unreimbursed annual disability assistance expenses.

11.

12. Enter the annual earned income of the household member enabled to work as a result of unreimbursed disability assistance expenses.

12.

13. Enter the lesser of Lines 11 or 12.

13.

14. Enter unreimbursed annual medical expenses.

14.

15. Add Lines 13 and 14.

15.

16. Multiply Line 1 by 0.03.

16.

17. Subtract Line 16 from Line 13. If negative, enter 0.

17.

18. Subtract Line 16 from Line 14. If negative, enter 0.

18.

19. Subtract Line 16 from Line 15. If negative, enter 0.

19.

20.

20.

a. If the household reported only unreimbursed disability expenses but no unreimbursed medical expenses, add Lines 8 and 17.

a.

b. If the household reported only unreimbursed medical expenses but no unreimbursed disability expenses, add Lines 8 and 18.

b.

c. If the household reported both unreimbursed disability expenses and unreimbursed medical expenses, add Lines 8 and 19.

c.

21. Subtract either Line 20a, 20b, or 20c from Line 1. This is the Adjusted Income for this household *with* these expenses.

21.

22. If Line 21 is applicable, divide Line 21 by twelve and multiply by 30%. This is rent based on adjusted income.

22.

EXAMPLE A

Household Member Name	Position in Household	Age	Total Income	Total Expenses
Pearl Henderson	Head	76	\$13,500	Prescription medication – \$75/month; Medicare deduction – \$38.50/month
Marshall Jones	Grandson	19	No income; fulltime student	Visits to physician – \$120/year

1. Enter Annual Gross Income.	1.	\$13,500
2. Enter the number of household members (excluding head or spouse) under 18, disabled, or full-time students.	2.	1
3. Multiply line 2 by \$480.	3.	\$480
4. If a household member is enabled to work or further their education as a result of childcare expenses, enter the <u>unreimbursed</u> annual childcare expenses (reasonable childcare expenses for children under age 13).	4.	N/A
5. If the household member was enabled to <u>work</u> as a result of the childcare expenses, enter that household member’s annual <u>employment income</u> .	5.	N/A
6. If an amount is reported on Line 5, enter the lesser of Lines 4 or 5. Otherwise, enter the amount in Line 4.	6.	\$0
7. If the household qualifies as an elderly and/or disabled household, enter \$400.	7.	\$400
8. Add Lines 3, 6, and 7.	8.	\$880
9. If this household has no unreimbursed disability assistance or medical expenses, subtract Line 8 from Line 1. This is the Adjusted Income for this household <i>without</i> these expenses.	9.	N/A
10. If Line 9 is applicable, divide Line 9 by twelve and multiply by 30%. This is rent based on adjusted income.	10.	N/A

*****FILL IN LINES 11 THROUGH 20 IF THE HOUSEHOLD HAS*****
 UNREIMBURSED DISABILITY ASSISTANCE OR MEDICAL EXPENSES

11. Enter unreimbursed annual disability assistance expenses.	11. N/A	
12. Enter the annual <u>earned income</u> of the household member enabled to work as a result of unreimbursed disability assistance expenses.	12. N/A	
13. Enter the lesser of Lines 11 or 12.	13. N/A	
14. Enter unreimbursed annual medical expenses.	14. \$1,482	
15. Add Lines 13 and 14.	15. \$1,482	
16. Multiply Line 1 by 0.03.	16. \$405	
17. Subtract Line 16 from Line 13. If negative, enter 0.		17. \$0
18. Subtract Line 16 from Line 14. If negative, enter 0.		18. \$1,077
19. Subtract Line 16 from Line 15. If negative, enter 0.		19. \$1,077
20.	20.	
a. If the household reported <u>only</u> unreimbursed disability expenses but <u>no</u> unreimbursed medical expenses, add Lines 8 and 17.	a. \$0	
b. If the household reported <u>only</u> unreimbursed medical expenses but <u>no</u> unreimbursed disability expenses, add Lines 8 and 18.	b. \$1,077	
c. If the household reported <u>both</u> unreimbursed disability expenses <u>and</u> unreimbursed medical expenses, add Lines 8 and 19.	c. \$0	
21. Subtract either Line 20a, 20b, or 20c from Line 1. This is the Adjusted Income for this household <i>with</i> these expenses.		21. \$11,543
22. If Line 21 is applicable, divide Line 21 by twelve and multiply by 30%. This is rent based on adjusted income.		22. \$289

Example A Notes

Line 2	Marshall is a full-time student, so the household qualifies for one \$480 deduction.
Line 4	There are no children under the age of 13.
Lines 5-9	The household qualifies as an elderly household and does have annual unreimbursed medical expenses.
Lines 11-15	The household does not have any annual unreimbursed disability assistance expenses (Lines 11-13) but does have annual unreimbursed medical expenses $[(\$75/\text{month} \times 12 \text{ months}/\text{year}) + (\$38.50/\text{month} \times 12 \text{ months}/\text{year}) + (\$120/\text{year}) = \$1,482]$. This amount is entered in Line 14.
Line 16	The household can only deduct those unreimbursed medical and disability assistance expenses that exceed 3 percent of annual household income.
Lines 17-19	The household deducts 3 percent of its annual income from the total amount of annual unreimbursed medical expenses (Line 17).
Lines 20a-20c	The household adds its medical expenses deduction (Line 17) to the other deductions (dependent deduction, elderly household deduction) that are summed in Line 8, and enters this total in Line 19b (households reporting medical expenses, but no disability assistance expenses).
Line 21	The amount entered in Line 19b (\$1,957) is subtracted from the household's annual income figure in Line 1 (\$13,500), giving it an adjusted income of \$11,543.

EXAMPLE B

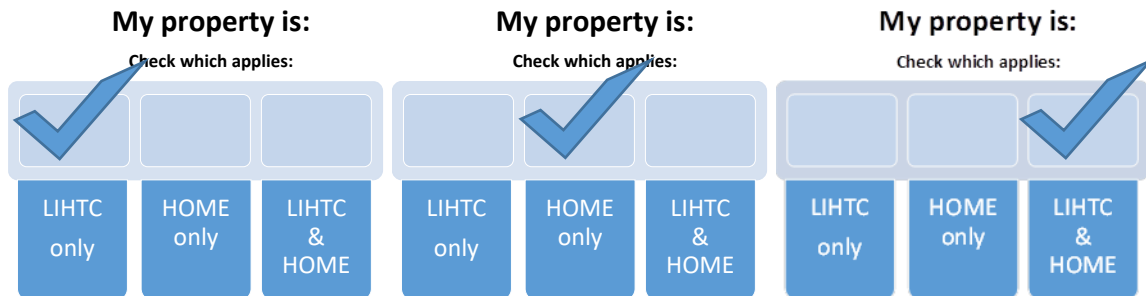

Household Member Name	Position in Household	Age	Total Income	Total Expenses
Clark Griswald	Head	40	\$27,900	Prescription medication – \$75/month
Rusty Griswald	Son	13	No income	Childcare – \$50/week
Audrey Griswald	Daughter	11	No income	Childcare – \$50/week

1. Enter Annual Gross Income.	1.	\$27,900
2. Enter the number of household members (excluding head or spouse) under 18, disabled, or full-time students.	2.	2
3. Multiply line 2 by \$480.	3.	\$960
4. If a household member is enabled to work or further their education as a result of childcare expenses, enter the <u>unreimbursed</u> annual childcare expenses (reasonable childcare expenses for children under age 13).	4.	\$2,600
5. If the household member was enabled to <u>work</u> as a result of the childcare expenses, enter that household member’s annual <u>employment income</u> .	5.	\$27,900
6. If an amount is reported on Line 5, enter the lesser of Lines 4 or 5. Otherwise, enter the amount in Line 4.	6.	\$2,600
7. If the household qualifies as an elderly and/or disabled household, enter \$400.	7.	\$0
8. Add Lines 3, 6, and 7.	8.	\$3,560
9. <i>If this household has no unreimbursed disability assistance or medical expenses, subtract Line 8 from Line 1. This is the Adjusted Income for this household without these expenses.</i>	9.	\$24,340
10. If Line 9 is applicable, divide Line 9 by twelve and multiply by 30%. This is rent based on adjusted income.	10.	\$609

Example B Notes

- Line 2 There are two children in the household under the age of 18.
- Lines 4-6 Although the household has childcare expenses for both children, only Audrey’s expenses are eligible for the childcare deduction because only she is under the age of 13. Audrey’s childcare expenses are less than Clark’s annual income and are reported as the household’s childcare expense deduction (Line 6).
- Line 7 The household does not qualify for either the elderly or disabled household deduction of \$400.
- Lines 8-9 The household’s eligible deductions are subtracted from Clark’s annual income. This is the household’s adjusted income (\$24,340). The rest of the chart is not applicable.

Recertification

For LIHTC-only properties:

100% LIHTC: Income recertification is not required. Student status must be verified annually.

100% LIHTC, mixed income: same as above, except that, at a minimum, lower set-aside unit that meets state covenants will need to be fully recertified annually to determine compliance with state covenants. Student Status must be verified annually.

Mixed-use: Full income and student status verification are required each year.

Increases of Income: Households are “over-income” when they exceed 140% of the current income limits. The “Available Unit Rule” must be followed to restore the applicable fraction in the building.

For HOME-only properties:

Full third-party verification is required every 6th year of the affordability period. Self-certification from the household is required for other years. Student status must be verified annually.

Mixed Income: At a minimum, lower set-aside unit that meets state covenants will need to be fully recertified annually to determine compliance with state covenants.

Increases of income:

Households are “over-income” when they exceed the 80% “Low income” limit. Rent is calculated based on the household’s adjusted income and further actions are taken depending on if the unit is fixed or floating HOME to restore the mix of HOME units in the project required in the HOME Contract.

For LIHTC/HOME units:

100% LIHTC: Full third-party verification is required every 6th year of the affordability period. Self-certification from the household is required for other years. Student Status must be verified annually.

100% LIHTC, mixed-income: same as above, except that, at a minimum, lower set-aside unit that meets state covenants will need to be fully recertified annually to determine compliance with state covenants. Student Status must be verified annually.

Mixed-use: Full income and student status verification are required each year.

Increases of income:

Households are “over-income” for HOME when they exceed the 80% “Low income” limit. Rent is **NOT** calculated based on the household’s adjusted income, and High HOME rents continue to apply. Further actions are taken depending on if the unit is fixed or floating HOME to restore the mix of HOME units required.

Households are not “over-income” for the LIHTC until they exceed 140% of the current income limits. The “Available Unit Rule” must be followed to restore the applicable fraction in the building.

LIHTC: Vacant Unit Rule

Vacant units that were formerly occupied by eligible LIHTC households continue to qualify for tax credits if reasonable attempts are made to rent the LIHTC units before any market units in the project are rented. This is called the *Vacant Unit Rule* (VUR). If there are vacancies in LIHTC units at any time, the owner/manager should keep proof of newspaper and internet advertising, as well as banners at the property and any other marketing efforts expended to fill the vacant tax credit unit(s).

Additionally, the following guidelines apply to the VUR:

- Units must be made rent-ready in a reasonable time in order to continue claiming credits. This is true even if there is no waiting list.
- For vacant units to continue to qualify as rent-ready, do not allow vacant units to be utilized as “supply closets” for maintenance repairs and supplies for other units within the property. Also, fixtures and appliances from vacant units should not be “cannibalized” for occupied units.
- If the VUR is violated, each unit of comparable or smaller size to the vacant LIHTC unit that is rented to market-rate households prior to renting to an income-qualified household will be reported to the IRS as a violation.
- Vacant LIHTC units can be used to support tax credits in newly placed in-service developments. In most cases all vacant units that have not been occupied by a qualified household should be rented before any newly vacant unit is rented to a second household. This helps to ensure that tax credits can be taken on all units.

Voucher Holders

Applicants must not be denied solely because they have Section 8 Housing Choice Voucher assistance. However, owner/managers are not required to accept lower rents than they charge for other LIHTC households if the PHA providing the voucher will not pay the full rent. The owner/manager should also deny voucher-holding households who do not meet their tenant selection criteria as delineated in the project’s tenant selection plan.

Unit Transfers

LIHTC

A household that transfers from one unit to another within the same building does not need to re-qualify or be recertified. The two units that are involved in the transfer simply switch status if the household is moving to a non-LIHTC unit. For unit transfers occurring between buildings that are part of the same multi-building project (as defined by the 8609s line 8b), the same rule applies.

Special note for first-year lease-ups: A household cannot initially qualify and start tax credits for more than one unit at a time. As with all transfers, when they transfer the unit they were in and the unit they go to switch status. This means that if they transfer from a unit that they initially qualified to a unit that has never been qualified for credits, the unit they move to is now qualified, but the unit they leave becomes non-qualified starting the date of transfer.

A resident wanting to move to a building that is **not** part of the same 8609 8(b) multi-building *project* must qualify as a new low income resident at the time of transfer through the recertification process.

From a tax credit standpoint, they are moving to another project, even if the buildings are part of the same development.

The only difference between transfers within a building and transfers between buildings is that a household that was over-income (140%) at their most recent recertification may only relocate within the same building. Therefore, management can rely on the most recent recertification of the household to establish that the household is below the 140% limit. For 100% projects not subject to income recertification, transfers are allowed between buildings in the project without income examination.

IFA does not require interim recertifications for residents who request a unit transfer. However, the date of the transfer must be clearly identified in the resident file. If the property is only LIHTC, the owner/manager may maintain the effective date of the move-in for the recertification cycle. The household may continue to be recertified on the anniversary of the original date it moved into the development. It is not required that the effective date be changed to the unit transfer date. This rule does not apply to properties with other funding such as HUD or Rural Development. Many other programs require adjustment to effective dates or interim certifications at transfer. IFA allows these other program rules to be applied at LIHTC projects that are combined with other federal housing programs.

For 100% LIHTC projects not subject to income recertification, student status verification continues to be due on the anniversary date of the original move-in after a transfer occurs.

HOME

When a household transfers into a HOME unit, the household must be fully certified (treated as a new move-in) to ensure that they meet the appropriate HOME set-aside (Low or High HOME unit). The effective date of future recertifications will be the date of the anniversary of the initial move-in to the project, not the date of transfer.

Nonprofit Owners of LIHTC Properties

According to LIHTC program rules, no less than 10% of all tax credits allocated each year by IFA must be awarded to qualified nonprofit organizations with an ownership interest in projects. Additionally, the qualified nonprofit organization must materially participate in both the development and operation of their project throughout the 15-year Compliance Period. Not all nonprofit organizations that own projects were allocated credits under the nonprofit set-aside. If a project is part of this set-aside, it will be indicated on IRS Form 8609, Line 6(f) or (g), depending on the year the Form was issued.

Although a nonprofit owner may partner with another for-profit developer or may engage a management company to oversee the daily management of the project, the nonprofit must still have an active and meaningful role in the running of the project. They may not simply consent to their for-profit partner or manager's decisions. The IRS suggests the following guidelines should be used in defining the concept of "Material Participation":

- Material participation is most likely to be established in an activity that constitutes the principal business/activity of the taxpayer.
- Involvement in the actual operations of the activity should occur. That is, the services provided must be integral to the operations of the activity. Simply consenting to someone else's decisions or periodic consultation with respect to general management decisions is not sufficient.

- Participation must be maintained throughout the year. Periodic consultation is not sufficient.
- Regular on-site presence at operations is indicative of material participation.
- Providing services as an independent contractor is not sufficient.

Owners of these projects are required by IFA to submit a *Qualified Nonprofit Certification* form annually as part of the owner certification process. The objective of this certification is to ascertain whether the nonprofit continues to materially participate in the operation of the project as required by the IRS.

6 Check the boxes that describe the allocation for the building (check those that apply):

a Newly constructed and federally subsidized b Newly constructed and **not** federally subsidized c Existing building

d Sec. 42(e) rehabilitation expenditures federally subsidized e Sec. 42(e) rehabilitation expenditures **not** federally subsidized

f Allocation subject to nonprofit set-aside under sec. 42(h)(5)

Casualty Loss

Unfortunately, natural or man-made disasters or accidents sometimes damage or destroy HOME & LIHTC units, buildings or whole projects. Should this occur, it is the responsibility of the owner/manager to report casualty losses to IFA using the required *Notice of Building Casualty Loss or Damage Form* within 30 days of an incident that results in a unit or building going off-line, accompanied by the plan for reconstruction or replacement. Owners/Managers are responsible for updating IFA monthly until the project is fully restored and then completing the required *Casualty Loss Completion Form*.

For LIHTC projects, a casualty loss invokes no recapture if the unit or building is returned to good condition in a *timely fashion*. Good condition means habitable and suitable for occupancy. Generally, most casualty losses occur on a small scale and the project’s credits are not at risk of recapture and units are rarely out of service for an extended length of time.

For LIHTC projects facing major casualty loss issues resulting from natural disasters like flooding or tornado damage, IRS Revenue Rulings 2014-49 (9% credit projects) and 2014-50 (4% credit projects) provide temporary relief from certain requirements of Section 42 of the IRS Code (the LIHTC Program) for owners when projects been impacted by a major disaster in Presidentially declared major disaster County. The Rulings also provide emergency housing relief for individuals who are displaced by a Major Disaster from their principal residences in certain Major Disaster Areas. I

If a building’s qualified basis is reduced due to a casualty loss, a building is not subject to recapture if restored within a reasonable period of time, but the building may not claim credits while out of service due to the casualty event. IFA will determine what is reasonable in the case of a Major Disaster, but the extension may not extend beyond the end of the 25th month following the close of the month of the Major Disaster declaration. For example, if a major disaster is declared in August 2018, the deadline for the restoration of qualified basis may extend no longer than September 2020.

Restoration of non-Presidentially declared disaster casualty losses are allowed to be completed within two years following the end of the tax year in which the casualty loss occurs. In most cases, this is a greater time period than the 25 months allowed for a Presidentially declared major disaster. For reference see IRC §42(h) (5) (B). Unlike major disaster losses, tax credits cannot be claimed during the restoration period during non-major disaster-related casualty losses.

For LIHTC projects, IFA must report the loss and replacement of the units to the IRS within 90 days. If the units have not been fully restored, IFA will submit a copy of the owner’s plan and timeframe for replacement along with an uncorrected 8823 to the IRS. Once all units have been restored and are available for occupancy, IFA will issue a corrected Form 8823 to show the units are back in compliance.

Chapter 5 – LIHTC Acquisition/Rehab or Rehab Only

Rehabilitation costs can be a basis for claiming tax credits. In fact, if an owner is planning on rehabilitating a property, they can also get tax credits based on the cost of acquiring or purchasing the building or buildings. These combined credits are referred to as acquisition/rehab credits.

In some cases, the owner may elect to only take rehabilitation credits based on a variety of variables determined during the allocation process. Regardless, the property is generally still acquired or purchased by the ownership entity and the date of acquisition will still play a part in the compliance process.

Generally, the day-to-day compliance operation of acquisition/rehab and rehab-only properties is the same as new construction, with some significant differences. This chapter discusses the key differences from new construction LIHTCs.

Placed in-Service Dates

As we discussed in Chapter 1, the placed in-service (PIS) date for a newly constructed building is the date that a building is deemed ready for its intended purpose - to house people. This is indicated most often by the issuance of a certificate of occupancy. Acquisition/rehab placed in-service dates, however, are a bit more complex. Generally, people are already living at the property, so a building is technically ready the day it is acquired by the new owner. Acquisition and rehab credits also receive separate placed in-service dates. These placed in-service dates are based on:

- **Acquisition:** *PIS is the date of purchase.* Acquisition credits may start as early as the date the building is acquired (placed in-service) but must start the same year as the rehab credits do. If rehab credits are placed in-service in a later year, the acquisition credits are *deferred*. An income test (the Safe Harbor rule) will need to be conducted for households at less than 100% LIHTC projects (see Chapter 1, *Deferral* for more information on the income test).
- **Rehab:** *PIS is based on an expenditure test.* The owner selects a time over a 24-month period when financial thresholds have been met. A sufficient eligible basis must have also been achieved for the planned rehab credits.

Certification Process

There are several different scenarios that may be present in Acquisition Rehab or Rehab-only projects; generally, the certification process remains the same.

- Market rate projects coming in for a first allocation of tax credits
- Existing LIHTC projects coming in for additional tax credits (called resyndication)
- Existing Multi-Family projects that are HUD-funded, Section 8 Project-Based or RD projects coming in for a first allocation of tax credits

Completing Rehabilitation in the Year of Acquisition

Existing households may qualify an LIHTC unit on the date of acquisition. The IRS allows owner/managers up to 120 days before or after the date of acquisition to prove that these households qualify and to establish the unit's effective date as the date of acquisition.

If the owner has access to the residents before acquisition, any certification utilizing all required paperwork that was completed no more than 120 days prior to acquisition can also have an effective date as of acquisition. If the certification of a household that was in place as of acquisition is completed after the 120 days, the effective date is the date the last adult household member signs the TIC form. Certifying households quickly may result in being able to claim the maximum amount of credits possible for each unit.

Once a household is certified after acquisition it is considered a qualified LIHTC household and will not be considered over-income if the household's income increases in the future. If an owner/manager waits until later to certify the household, their income may have increased over the limits and they will not be considered a qualified household as of the date of acquisition.

Once initial certifications are conducted at acquisition, no recertification is required as of the rehabilitation placed in-service date. The recertification cycle will be based on the initial effective date (date of acquisition for most). New move-ins after acquisition are certified prior to move-in, like any other new household, and have an effective date and recertification cycle as of their move-in date.

Revenue Procedure 2003-82 – The Safe Harbor Rule

When a building's rehabilitation is completed the year following acquisition, the units occupied by a qualified household may begin to produce a tax credit in January of the year the owner completes the rehabilitation. January 1st is referred to as the "look-back date." The owner wants the existing residents certified as of January of the year they plan to complete the rehabilitation activities.

Revenue Procedure 2003-82 tells owners how to protect their tax credits without needing to replace outdated initial TICs. If a TIC was completed more than 120 days before the start of the credit period, the owner should test the resident's income by using the IFA Self-Certification of Income form certifying to any changes in their income since completing their initial TIC. The test should be completed during the 120 days prior to the start of the credit period. If the resident indicates a change in income, the owner asks for a copy of any documentation showing the change; E.g., a copy of a pay stub, benefit award letter, etc. If the resident's income has risen above 140 percent of their income limit, the owner implements the available unit rule.

Implementing Rev Proc 2003-82 is particularly important in mixed-income projects. In a 100 percent LIHTC project, the owner always rents the next available unit to an LIHTC-qualified resident regardless of what they find when they test a resident's income at the start of the credit period. No resident may be forced to vacate a unit due to an increase in income since completing their initial TIC. The safe harbor rule allows an owner to preserve their tax credits without forcing a resident to move. The IRS has said that a resident's income rising above 140 percent of the income limit is not considered good cause to either refuse to renew their lease or to evict them from their unit.

Existing Leases

For acquisition/rehabs, IFA does not require owner/managers to sign a new lease with an existing resident who has lived in the unit under a lease that had an initial term of at least 6 months.

***Note:** Acquisition/rehab or rehab-only projects can be complex, and IFA recommends that competent consultation should be sought to ensure that the rules are applied most effectively.*

Transfers

Because of complex construction schedules, household transfers are often necessary at rehabs. The unit transfer rules found in Chapter 4 apply to acquisition/rehab as well as new construction projects. At times an owner may elect to identify an unexpected combination of buildings as “projects” within a rehabbed development. Each building may be designated its own project, or some buildings may be combined into projects while excluding other buildings. It is very important to know what the 8609 8(b) multi-building election is going to be, along with what buildings are included in the project(s) in the rehabbed development, to ensure that it can be accurately determined if transfers between specific buildings in the development will require recertification or not.

Resyndication

After an existing LIHTC property has concluded its initial 15-year Compliance Period, there is an option for the owner to submit a new LIHTC application to IFA to start a new flow of tax credits. This is often referred to as “resyndication”. The resyndication of tax credits is used to purchase and finance the rehab of the existing LIHTC property.

One important feature of resyndication is how existing residents are treated. The IRS considers residents who were qualified under the first set of credits as protected (or “grandfathered in”) during the entire Extended Use Period of the first set of credits. According to the IRS qualified households in an existing LIHTC project that is being rehabbed with new tax credits continue to qualify for the next set of credits without re-certification.

The Average Income Test and Resyndication

When an existing LIHTC project is awarded new credits, the LURA requirements from the first set of tax credits are not extinguished but will be incorporated into the new LURA. In other words, the two LURAs will run concurrently and the original LURA requirements end when the original LURA expires.

The original minimum set-aside is not replaced by the new one, therefore if an owner elects the Average Income Test with their new set of credits, they will only be able to qualify households below either the 50% or 60% AMI limits until the original LURA has expired. Electing to Income Average would allow the owner the flexibility, once the original LURA has expired, to use the higher 70% and 80% AMI limits in the future.

Warning: Only income qualification is automatic for past-qualified households. Be aware that many states, including Iowa, relax the student rules after the Compliance Period (see Chapter 7). If an owner thinks there is any chance of resyndication, the IRS student rules should continue to be applied to ensure household continued eligibility.

Tenant Files

Even though the IRS does not require previously qualified LIHTC households to be recertified, IFA requires that all existing LIHTC households are certified using the IFA-required forms in place at the time of acquisition. If existing households are over-income at the time of acquisition, the household does not invoke the Available Unit Rule (AUR) or the Unit Transfer Rule (UTR). This is done to ensure that all tenant files are complete and up to date with all current requirements at the time of acquisition.

IFA suggests that the owner/manager maintain the original file establishing eligibility at move-in to provide to the Compliance Officer during an audit if there are any questions or concerns. In many cases, projects have changed management companies and/or ownership and the original file is often missing or deficient. If this is the case, the certification done at acquisition along with any subsequent recertification showing that the household was below the income limit current at the time of acquisition will be sufficient. A uniform file order should be established to aid in keeping tenant files audit-ready.

Resyndication causes the site to establish a new placed in-service date as of the acquisition of the first building for purposes of the new credits. This may affect income and rent limits currently in use, as the resyndication starts a new income limit hold harmless point at the new placed in-service date. If the project has been holding harmless at past year levels, they will have to adjust to the current, lower, income and rent limits. Since HERA Special income limits only apply to projects that were placed in-service in 2008 or earlier, a resyndication will also eliminate this option for the new credits. Lower income limits may need to be applied to new move-ins after acquisition and rents may need to drop for the project (see Chapter 2 for further details on holding limits harmless and HERA special limits).

The new credits and accompanying covenants do not replace the original covenants found in the original LURA. BOTH must continue to be applied. During the allocation process for the new credits, IFA will ensure that the LURA requirements for both sets of credits are compatible.

EXAMPLE**Resyndication and existing households**

The Millers moved into unit 201 at Shady Pines in 2003. The project was constructed in 1995 and is in its Extended Use Period when awarded new credits during the 2017 allocation cycle.

The Millers are asked to certify using all current required forms being used by the project and IFA. When recertified, the household was over-income when applying the 2019 MTSP limits currently in use. Per the IRS, the household remains a qualified household, however the 2019 MTSP rents are lower than the HERA Special Limits that were being used prior to resyndication and the owner will be required to lower the tenant's rent at the time of recertification.

The Uniform Relocation Act (URA)

Acquisitions of properties with federal funding (such as HUD or HOME) trigger a federal law called *The Uniform Relocation Act (URA)*. This Act provides important protections and assistance for households affected by the acquisition/rehab of federally funded projects. The URA does not consider the LIHTC to be federal funding, but it comes into play where other programs are involved. This law was enacted to ensure that households occupying properties that are acquired, or who move as a direct result of

projects receiving federal funds, are treated fairly and equitably and receive assistance in moving from the property they occupy.

If the displacement of current residents is deemed allowable, some of the URA responsibilities toward displaced households include:

- Provide relocation advisory services to displaced tenants and owner occupants
- Provide written notice to vacate within minimum time frames prior to requiring possession
- Reimburse for moving expenses
- Provide payments for the added cost of comparable replacement housing

Further discussion of the URA is beyond the scope of this manual. However, please be advised that this requirement can seriously impact how you lease up an LIHTC acquisition/rehab that is combined with other federal programs and the associated costs involved with its implementation. Termination of tenancy will often not be an option for households that do not qualify for LIHTC units.

Because of the major implications of the URA, it is vital to refer to HUD URA guidance long before acquisition to help determine whether the URA covers a program in use at the project and what the implications might be.

Comparison Chart: New Construction v. Acq/Rehab Tax Credits

Rule	New construction	Acq/rehab
Date placed in-service (PIS)	Generally, the building is PIS when certificates of occupancy are received, and new residents can be moved in.	Acquisition: date of acquisition Rehab: Determined by IFA based on an expenditure test conducted during project implementation.
Effective dates of household certifications	When each household moves in. All paperwork must be completed no more than 120 days BEFORE move in.	For households in place at acquisition, the effective date is the acquisition date if the paperwork is completed within 120 days BEFORE or AFTER the acquisition date. New move-ins after acquisition are treated the same as for new construction.
Initial lease term	The initial lease term must be at least six months after move-in and initial qualification.	A new lease is not required to be executed with an existing resident at acquisition who has lived in the unit under a lease that was at least six months in duration.
IRS form 8609	There is one form for each Building	There is one form for acquisition credits and one for rehab credits for each Building. The two 8609s will have different amounts for eligible basis and qualified basis as well as for credit percentages. They will share the same applicable fraction, however.
Tax credit calculations	Each building has an eligible basis, an applicable fraction and a credit percentage.	Each building has two eligible basis figures (one for acquisition costs and one for rehab costs). The credit percentage will be 4% for the acquisition credits and may be 4% or 9% for the rehab credits, depending on whether the rehab was financed with tax-exempt bonds or not. The applicable fraction is the same for both sets of credits.
Credit deferral	Credits may be claimed the year a building is PIS, or they may be deferred to the following year depending on if the building has met the planned LIHTC occupancy by the end of the year.	As with new construction, deferral may occur because buildings are not qualified by the end of the year the acquisition is PIS. However, they may also be deferred because a rehab is not PIS the same year as the building is acquired. In such cases, the option to defer for <i>both</i> acquisition and rehab credits begins with the year the <i>rehab</i> is PIS.
Building Identification Numbers (BINs)	The building will receive a new BIN.	For resyndication projects only: the original BINs will apply to any later credits.

Chapter 6 - Compliance Monitoring & Noncompliance

Based on tax Code, the IRS has defined specific issues of noncompliance that put tax credits in jeopardy. Owners may agree to additional obligations during the development process with IFA, but these are not Federal noncompliance. IFA monitors both types of noncompliance, but only reports federal violations to the IRS on IRS Form 8823. Though violations of state agency covenants do not constitute a risk to tax credits, IFA will still enforce compliance with all rules that the owner has agreed to. Among other measures, future allocations of credits or other funding available through IFA will be denied to owners of existing projects that do not comply with Federal and/or IFA requirements.

EXAMPLE

Violation of state v. federal set aside limits

Project Minimum Set-Aside	40-60	MSA income limit: \$ 30,000
Additional state set-aside	50%	IFA set-aside income limit: \$ 25,000

The owner/manager strives to rent to all households at or below the most restrictive \$25,000 limit. However, an error is made, and a state set-aside unit is rented to a household who has anticipated income of \$28,400. The unit is in violation of the IFA covenant, but an 8823 is not turned into the IRS, as the household is in compliance with the Federal income limit based on the MSA. However, a State Notice of Noncompliance will be issued.

Overview of Reporting of Federal Noncompliance

The mechanism used by IFA to report noncompliance to the IRS is Form 8823, *Low-Income Housing Credit Agencies Report of Noncompliance or Building Disposition*. This form lists the major categories of noncompliance per tax Code. It also indicates whether reported noncompliance is corrected.

To provide guidance to state agencies, the IRS has published a Guide entitled *Guide for Completing Form 8823, Low-Income Housing Credit Agencies Report of Noncompliance or Building Disposition (8823 Guide)*. The 8823 Guide addresses what is considered “in and out of compliance” for each federal category used on the form. It also establishes how to correct many compliance issues. IFA accepts and follows almost all provisions of the 8823 Guide. Minor issues where we have adjusted Guide provisions are addressed in this manual. As the 8823 Guide is very effective, IFA will not repeat the Guide’s direction for addressing noncompliance in this manual.

IFA is required to periodically monitor a property’s files and physical buildings for compliance. If noncompliance is discovered, IFA will give a *correction period* to correct what was found. Although it may be shorter, this correction period may not exceed 90 days, unless a special extension is granted by IFA for up to an additional 90 days. Once the correction period has expired or the owner has submitted documentation to correct the noted noncompliance, IFA will submit Form 8823 to the IRS for federal noncompliance and indicate if noncompliance was corrected during the correction period. Further details specifically relating to IFA file audits and site inspections are provided later in this chapter.

Due Diligence

If owner/managers practice due diligence in reviewing their own files, policies and procedures and corrections of errors are made prior to an audit by IFA, the IRS will not be notified of any noncompliance when discovered. This specifically means that, if an owner/manager discovers a noncompliant situation at a property and corrects it before IFA informs the owner/manager that IFA will be conducting an audit of the property, IFA will not report the issue on Form 8823. This makes the date that IFA informs the owner/manager of an upcoming audit a crucial date.

Owners who are diligently monitoring their own compliance because it is the right thing to do, and not just because of the threat of an impending audit, are thus rewarded for their proactive approach.

The IRS requires IFA to examine other evidence of due diligence as it reviews for compliance. Errors may still result in credit loss, but it may minimize the extent or severity of the determination of noncompliance. According to the IRS, additional signs of due diligence should include:

1. Separation of duties
2. Adequate supervision of employees
3. Management oversight and review (internal audits)
4. Third-party verifications of tenant income
5. Independent audits
6. Timely recordkeeping

DEFINITION**“Due Diligence”**

“The care that a reasonable person exercises to avoid harm to other persons or their property... reasonable steps taken by a person in order to satisfy a legal requirement.”

Federal vs. State Issues

Federal noncompliance items	State noncompliance items
LIHTC	
The household is above the income limit upon move-in (based on the minimum set-aside income limit(s)). 8823 Guide Chapter 4	The household is above the state set-aside income limit upon move-in (but below the minimum set-aside income limit(s)).
Late or not-completed annual recertification (at properties less than 100% LIHTC or are Deep Rent Skewed). 8823 Guide Chapter 5	Late or not-completed annual recertification (at 100% LIHTC, mixed-income properties for units at State covenant set-asides).
Violations of UPCS standards. 8823 Guide Chapter 6	Physical deficiencies not covered by UPCS, but that IFA may require to be fixed due to State or local building codes.
Failure to submit complete annual owner’s certification. 8823 Guide Chapter 7	Failure to submit additional state-required reporting.
Changes in eligible basis (for instance charging inappropriate fees or removing amenities). 8823 Guide Chapter 8	
Failure to keep the number of units in compliance as required by the minimum set-aside. 8823 Guide Chapter 10	
Rents charged over the limit(s) based on the minimum set-aside. 8823 Guide Chapter 11	Rents charged that are over state set-aside rents (but below the minimum set-aside).
Project not available to the general public. 8823 Guide Chapters 12 &13	
Violations of the Available Unit Rule. 8823 Guide Chapter 14	Failure to move a household in a State covenant unit to a higher income category after an increase of income at recertification and then to re-designate the next comparable unit in the project to the lower income category.
Violations of the Vacant Unit Rule. 8823 Guide Chapter 15	
Failure to execute the LURA by the time credits are claimed. 8823 Guide Chapter 16	
Units occupied by nonqualified student households. 8823 Guide Chapter 17	
Utility allowance was calculated incorrectly. 8823 Guide Chapter 18	

Owner fails to respond to agency notifications of inspection. 8823 Guide Chapter 19	
LIHTC units used on a transient basis (initial leases less than 6 months). 8823 Guide Chapter 20	
Building no longer participating in the LIHTC program. 8823 Guide Chapter 21	Noncompliance with non-federal requirements listed in the LURA.
HOME	
The mix of High and Low HOME units is not maintained.	Note: noncompliance with the HOME Contract for a project puts the federal HOME funding at risk. The HOME program does not make a Federal-PJ noncompliance distinction.
Lease for HOME units fails to meet HOME provisions.	
Households over HOME limits at move-in.	
Rents charged are above the HOME limits (including subsidy).	
Leasing of next units incorrect after increases of income.	
Rents calculated incorrectly for households over the 80% income limit.	
Noncompliance with non-federal HOME Contract provisions.	
A HOME unit contains an ineligible student household.	

Yearly Compliance Reporting Requirements – Owner’s Certificate of Continuing Compliance

LIHTC Code states that the owner of a LIHTC development is required to certify to IFA that, for the preceding 12-month period, the development met the requirements of Section 42 provisions: HOME has similar requirements. Owners must report in the form and manner IFA specifies, including completing all applicable Exhibits and utilizing IFA’s online reporting system, Certification Portal (CP), to report tenant-level data for analysis. The owner must certify, under the penalty of perjury, that the information provided is true, accurate, and in compliance with the requirements of LIHTC and/or HOME rules and regulations. Treasury regulations list 12 specific requirements that must be addressed in the Certification to meet LIHTC requirements.

IFA is required to review the *Owners Certification of Continuing Compliance* and related exhibits annually. The majority of the related exhibits are used to monitor for compliance with State-specific elections made during the allocation process. The owner is considered noncompliant if the Certification and/or exhibits are inaccurate, incomplete (or not submitted), or the owner discloses noncompliance with program requirements. Unlike the process followed during a compliance review of a project, the

Owner will be notified of their noncompliance upon review of their submission and an 8823 or State Notice of Noncompliance will be issued without a corresponding correction period.

Initial Certifications for newly allocated projects are due April 1st and subsequent year's Certifications are due March 1st. For example, if a project is awarded credits in March 2015, the first Certification is due April 1, 2016, even if the project has not yet placed a building in-service or begun claiming credits.

The *Owner's Certificate of Continuing Compliance* is a required form that is updated and posted in December each year to the IFA website. IFA's compliance website is updated regularly and should be checked for current LIHTC and HOME reporting policies and requirements.

Failure to submit the Owner's Certification of Continuing Compliance will result in the issuance of an 8823 or a State Notice of Noncompliance.

Quarterly Compliance Reporting Requirements

The owner is responsible for reporting occupancy to IFA for ALL projects. Occupied units are to be counted on the last day of each month and reported to IFA on a quarterly basis by the 10th of the month following the end of each quarter. IFA requires the use of our Asset Management Portal to report quarterly occupancy information.

If a project also contains HOME funds or has an IFA program loan/grant, additional reporting requirements are also in place which may include submitting annual audits, quarterly financials, operating budgets, owner tax returns or insurance certificates using the Asset Management Portal. All LIHTC projects awarded in 1999 or later are required to submit annual audits using the Asset Management Portal.

Physical Inspection Protocol

IFA may use a contractor to conduct physical inspections and any references to IFA below may mean IFA and/or our contractors.

The physical inspection protocol that IFA uses is the *Uniform Physical Conditions Standards* (UPCS). UPCS is a code that the IRS has allowed state agencies to borrow from HUD. HUD has produced a Dictionary of Deficiency Definitions that explains what exact deficiencies are considered to be noncompliant. The UPCS Dictionary then defines very specific severity codes for physical problems on a scale from 1 to 3 (with 3 being the most severe). The Dictionary also defines issues that are *Health and Safety* concerns.

The UPCS dictionary can be found at: www.hud.gov, Search Keywords - "UPCS Dictionary."

Following is a quick overview of UPCS.

UPCS 5 “Inspectable areas”: Overview

1. Site
 2. Building Exterior
 3. Building Systems
 4. Dwelling Units
 5. Common Areas
- “Health and Safety” applies to all areas

Inspectable area:

1. Site

The IRS expects that: “The site components...must be free of health and safety hazards and be in good repair.”

Areas Inspected

- Fencing
- Retaining Walls
- Grounds
- Lighting
- Mailboxes
- Signs (project or areas of the project)
- Parking lots/driveways
- Play areas and equipment
- Refuse disposal equipment
- Roads
- Storm drainage
- Walkways

Areas of Possible Concern

- Abandoned vehicles
- Dangerous walkways or steps
- Poor drainage
- Septic tank back-ups
- Sewer hazards
- Excess accumulation of garbage and debris
- Vermin or rodent infestation
- Fire hazards

Inspectable area:

2. Building Exterior

The IRS expects that: “Each building on the site must be structurally sound, secure, habitable, and in good repair. Each building’s doors, fire escapes, foundations, lighting, roofs, walls, and windows, where applicable, must be free of health and safety hazards, operable, and in good repair.”

Inspectable area:

3. Building Systems

The IRS expects that: “Each building’s domestic water, electrical system, elevators, emergency power, fire protection, HV AC, and sanitary system must be free of health and safety hazards, functionally adequate, operable, and in good repair.”

Inspectable area:

4. Dwelling Units

The IRS expects that: “Each dwelling unit within a building must be structurally sound, habitable, and in good repair... All areas and aspects of the dwelling unit must be free of health and safety hazards, functionally adequate, operable, and in good repair.”

Areas Inspected

- Bathroom & kitchen
- Call-for-aid system (if applicable)
- Electrical systems
- Hot water heater
- HVAC
- Lighting
- Outlets/switches
- Patio/porch/balcony
- Smoke detectors
- Stairs
- Ceilings, doors, walls, floors, windows

Units Must Have

- Hot and cold running water
- Bathroom in proper operating condition:
 - usable in privacy,
 - adequate for personal hygiene
- Adequate source of potable water
- At least one smoke detector on each level of the unit

Inspectable area:

5. Common Areas

The IRS expects that: "Common areas must be structurally sound, secure, and functionally adequate for the purposes intended."

Areas Inspected

- Basement
- Garage/carport
- Restrooms
- Closets, utility and mechanical rooms
- Community rooms
- Halls/corridors
- Stairs
- Kitchen
- Laundry rooms
- Office
- Porch
- Patio
- Balcony
- Trash collection areas

Inspectable area:

Health and Safety

The IRS expects that: "All inspectable areas must be free of Health and Safety hazards."

Examples of health and safety issues

- Air quality
- Electrical hazards
- Elevators
- Emergency/fire exits
- Flammable materials
- Garbage and debris
- Handrail hazards infestation

Exigent (immediately life-threatening) hazards must be corrected promptly.

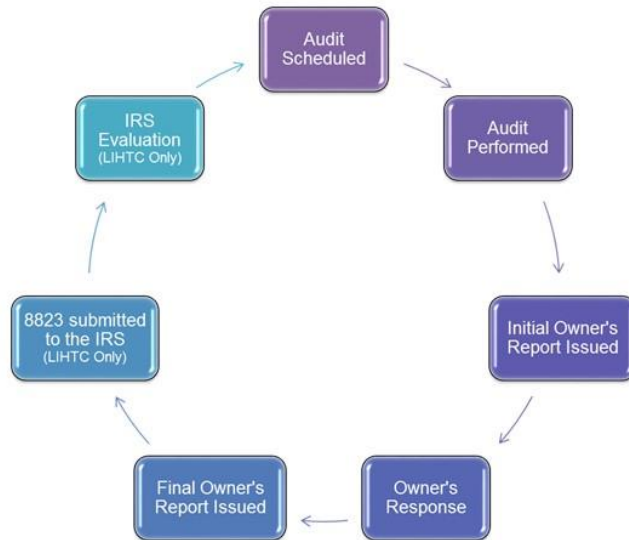

The inspector will leave a list and a tight deadline to fix these issues.

These issues include:

- Air quality problems such as propane, natural gas, or methane gas detected.
- Electrical hazards such as exposed wires, open panels, and water leaks on or near electrical equipment.
- Carbon monoxide hazards such as gas or hot water heaters with missing or misaligned chimneys.
- Emergency equipment, fire exits, and fire escapes that are blocked or not usable.
- Fire safety issues: missing or inoperative smoke detectors (including missing batteries), expired fire extinguishers.
- Window security bars preventing egress from a unit.

Monitoring Visit Processes

Compliance Review Cycle

Scheduling of the Project Monitoring Visit

IFA (or IFA’s contractor) will contact the owner or their designated contact to select a mutually agreed-upon date to conduct the inspection. An information sheet with instructions regarding the file audit portion of your monitoring visit will also be provided.

IFA will issue an 8823 or a State Notice of Noncompliance if an owner/management agent fails to respond to our contractor’s request to establish a date for inspection within five days of their third unsuccessful attempt to contact the owner/management agent.

Once the inspection date and time has been scheduled a letter will be issued to confirm the date and time of the monitoring visit. IFA will inform you at this time of the name of your Compliance Officer for this audit.

Preparing for the Monitoring Visit – Project Level Items

Below is a checklist of items that will be reviewed by IFA

- LIHTC -Review of 8609 options and impact on compliance
 - 100% LIHTC vs Mixed-use projects (line 3b)
 - Impact of multi-building election (8b) on compliance monitoring

- Impact of minimum set-aside (10c)
- Impact of deep rent skew election (10d)
- LIHTC and/or HOME -Review of the LURA and impact on compliance
- Review of HOME contract (written agreements) & HOME Compliance Monitoring requirements
 - Total # of HOME units
 - Fixed or Floating units
 - High or Low units
 - Affordability period start date and end date
- Review Resident Selection Criteria Plan and Lease
- Review Property/Management Rules (House Rules)
- Review Contact Information
- Review of Project-Specific LURA requirements
- Site, Building, and Tenant File Preparation
- Assure Usage of Mandatory Tenant Forms (as applicable)
 - Child Support Self Certification
 - Compliance Monitoring Information Sheet
 - IFA HOME Lease Addendum (HOME)
 - IFA Self Certification of Income (HOME)
 - Student Status Certification
 - TIC -Tenant Income Verification Form
 - *Under \$5,000 Asset Certification* (LIHTC & HOME during self-certification years)
 - *Zero Income Certification*
 - *VAWA Forms & Lease Addendum*
- Review IFA forms to be used by IFA or their contractor during the physical inspection.
 - Site/Building/Systems & Common Area Review Form
 - Unit Inspection Review Form

Monitoring Visit – Submission of Project- Level Information & Tenant Files

At the outset of the monitoring visit, IFA (or IFA’s contractor) will provide the property contact with file auditing instructions and a list of the tenant files and units that have been selected for audit.

Per IRS requirements physical inspections and file reviews will be performed by IFA or its authorized representative at least once every three years. Please note that IFA may place a development on a more frequent inspection cycle if observed violations are numerous or severe in nature at the sole discretion of IFA. In projects that also contain HOME units, inspection frequency will continue to follow the HOME requirements throughout the HOME Affordability Period.

- Physical Inspection – a minimum of 4 units chosen at random or a maximum of 20% of the low income units. Observation of systemic or chronic noncompliance may trigger additional unit inspections.

- File Review - a minimum of 4 units or a maximum of 20% of the low income units. Observation of systemic or chronic noncompliance may trigger additional file reviews.
- IFA will require that the file submitted match the unit inspected unless a vacant unit is selected for audit. We will inspect the vacant unit and will review the file of the last household to occupy that unit.

Required documentation must be submitted to IFA within 5 business days of the monitoring visit. These can be transmitted in a variety of ways, as instructed.

Items to be submitted to IFA (electronically) when notified of pending inspection:

Project Documents Required

Tenant Selection Plan	IFA Compliance Review Form
Current Rent Roll	Property/Management (House) Rules
Documentation of any filed Fair Housing violations (if applicable)	

Tenant File Documents Required

Cerification Packet:

Initial move-in income/asset qualifications & verifications for 100% LIHTC projects

Recertification of income/asset qualifications & verifications
(HOME & mixed-use/mixed-income projects)

TIC -Tenant Income Certification Form (LIHTC & HOME)

Initial signed lease & Applicable Lease Addendums (i.e. VAWA, HOME)	Completed Application (each adult tenant) and/or IFA Compliance Questionnaire
Student Status Self-Certification (each adult tenant)	Zero Income Certification (each adult tenant, if applicable)
Consent to release information forms (no signed blanket forms to be used)	Under \$5,000 Asset Certification (each adult tenant, LIHTC or Self-Cert. for HOME)

Checklist of common issues IFA encounters

- ❑ Whiteout used on files. This makes it difficult to determine who made any changes and what the changes were. Any changes or corrections made must be crossed out and initialed by all parties.
- ❑ Messy files which are hard to follow. This leads to things being missed and follow-up required by the property (See Chapter 3 – File Order).
- ❑ Stale verifications. Documentation must correspond to the move-in date. If verification forms are received AFTER the move-in date or are more than 120 days old this is a finding.
- ❑ Using forms not approved by IFA when an IFA-required form is necessary.
- ❑ Verification forms must show a date received. This can be hand-written, but IFA prefers a date stamp. A fax or email with date information is also acceptable.
- ❑ Not updating utility allowance figures annually, or as available from the local PHA as required.
- ❑ Exceeding maximum allowable rent as a result of using incorrect income limits or utility allowances
- ❑ In mixed-use projects, failure to rent the next unit available to a tax credit-qualified household when an existing LIHTC household's income exceeds 140% of the maximum allowable income.

NOTE: IFA may reject any files, or require a larger sample to be submitted, that consistently contains any number of these issues.

Monitoring Visit – Physical Inspection

IFA will:

- Check the property for proper signage to comply with Fair Housing requirements. Appropriate Equal Housing Opportunity (EHO) and handicapped accessible logos on building or project signage along with Fair Housing posters must be displayed in common areas where they can be seen by applicants and tenants.
- Perform physical site inspections covering the entire exterior and common areas of the project and the interiors of a percentage of low income restricted residential units selected by IFA.
- Perform a technical evaluation of the mechanical systems and structural aspects of the property. We will include in the technical evaluation a description of the actual systems and structures utilized in the construction of the property, their current age, life expectancy, and any indications that preventative or urgent maintenance is needed.

What you need to know:

- In most instances, the physical inspection will take approximately 1 to 2 hours unless a large number of units are being inspected.
- IFA contractors will NOT generally make any determinations concerning compliance but will simply conduct and document the inspection (including photos), note any potential deficiencies and provide their findings to IFA for their review.
- IFA will be responsible for communicating with you the outcome of this inspection and file review.
 - If any critical violations are noted during the inspection, you will receive a written notice of the violation(s) at the time of inspection and be expected to provide documentation

to IFA that the repair work is completed within 72 hours. Failure to do so will result in the issuance of an 8823 or a State Notice of Noncompliance.

Issuance of Initial Owner’s Report

Issuance of Initial Owner’s Report

Within 30 days of submission of tenant/project files to IFA; an initial owner’s report will be issued to the owner and the designated management company contact.

If the physical inspection was conducted by our designated contractor, the contractor will submit the physical report, photos and recommendations to IFA for inclusion in one report.

The completed report will be sent to the owner-designated contact. Please ensure that IFA has the most up-to-date contact information by verifying this information on the IFA Compliance Review Form or by contacting your IFA Compliance Officer. A courtesy copy will also be sent to the management company contact.

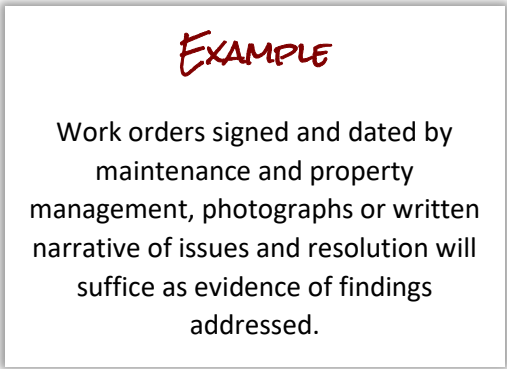

The report will detail findings for the project, each building and all units selected for audit. Findings will be identified as a Section 42 violation, a HOME rule violation and/or a LURA-related violation.

- Initial findings will be listed as determined by IFA’s review of information received from the project.
- The report may identify administrative or technical issues and recommendations for best practices and changes to improve future management of the project.
- Suggestions may be given to provide the project with corrective actions to remedy noted noncompliance issues.

Owner's Response to Initial Owner’s Report

The owner has 90 days from the date of the initial report to respond to any findings. The owner will submit documentation and/or an explanation to mitigate findings from IFA’s initial report.

IFA may, at our discretion, grant up to an additional 90-day extension (for physical deficiencies only). A formal request must be submitted in writing and received within 60 days of the date the initial report was issued. After the 60-day period, no extension will be granted without the approval of the IFA Asset Management Director.

In the written request the owner/manager must provide details on why an extension is necessary including estimates on when repairs/file corrections will be made.

Final Owner's
Report Issued

Issuance of Final Owners Report

The final report will be issued only to the owner within 30 days after the end of the 90-day correction period (or up to 180 days with an approved written request for an extension). It is the owner's responsibility to share this document with their management company if they choose to do so. IFA's role is to determine whether the owner has provided:

- Clarification establishing that the owner was always in compliance.
- Documentation that the issue(s) of noncompliance have been remedied within the correction period (noncompliance corrected).
- No acceptable documentation that the issue(s) of noncompliance have been remedied within the correction period (out of compliance).
- Documentation that the issue(s) of noncompliance has been remedied, but the noncompliance was not corrected until after the end of the correction period (back in compliance).

The Final Report will document:

- Issues that were cited and later determined to have never been out of compliance.
- Both corrected and non-corrected Section 42 and HOME issues.
- Both corrected and non-corrected LURA-related issues.

The issuance of this report is the Owner's indication that:

- 8823's will be issued shortly to the IRS for Section 42 findings.
- A separate State Notice of Noncompliance will be issued shortly to the owner detailing HOME or LURA-related findings.

8823 Submitted
to the IRS
(LIHTC Only)

An 8823 is Issued for Each BIN or Building

Note: The below does not apply to projects after the initial 15-year Compliance Period. IFA will not submit Form 8823 for these projects but will issue a *State Notice of Noncompliance* per project rather than per building.

- If it is determined that the owner was always in compliance, no 8823 will be issued. IFA will notify the owner that a specific issue is closed, and no Form 8823 will be filed with the IRS.
- If it is determined that the owner either remedied the issue(s) of noncompliance or remains out of compliance, a Form 8823 must be filed with the IRS.

When the 8823 is submitted to the IRS a copy is sent to the owner for their records. It is the owner's responsibility to share this document with their management company if they choose to do so. 8823s are required to be submitted to the IRS within 45 days after the end of the correction period (including any extension granted).

State Notice of Noncompliance (HOME & LIHTC)

- For LIHTC projects, this Notice relates to noncompliance with the property's filed Land Use Restrictive Agreement (LURA).
- For HOME-only projects, this Notice relates to noncompliance with HOME rules or with the Regulatory Agreement or Contract.

This Notice will be issued to the owner within 90 days of the end of the correction period only if the project has not corrected reported noncompliance issues. Any noncompliance reported via the State Notice of Noncompliance carries the same weight as those reported to the IRS on Form 8823, especially if the owner wishes to apply for future LIHTC or HOME allocation rounds or applies for funds from any other IFA program.

IRS Actions upon Receipt of Filed 8823

According to the IRS, they take the following steps upon receipt of each 8823 filed by IFA.

1. Noncompliance corrected Forms 8823 are processed at the Philadelphia Service Center (PSC) without contacting the owner.
2. Out of Compliance Forms 8823 are assigned to technicians to prepare owner notification letters. The letters are specific to the type of noncompliance reported and explain that noncompliance may result in the loss and recapture of the tax credit.
3. The taxpayer receives the notification letter.
4. The PSC processes the Forms 8823 and transcribes the information into a database.
5. Forms 8823 are routinely analyzed to determine whether an audit of the owner's tax return is needed. The taxpayer's three latest filed income tax returns and all Forms 8823 filed for the project are analyzed.
6. If it is determined that an audit is warranted, the case file is sent to the appropriate field office for examination.
7. The Taxpayer is notified that an audit has been scheduled.

Possible Owner Actions upon Receipt of an IRS Notification Letter

- The notification letter to the owner instructs the owner to contact IFA to resolve the noncompliance issue(s) reported on the filed Forms 8823.
- If the noncompliance is resolved within three years, a "back in compliance" Form 8823 must be filed with the IRS, and a copy sent to the owner concurrently. Note: Some issues of noncompliance cannot be corrected. Contact your IFA Compliance Officer to see if this applies to your issues.

Correcting Specific State LIHTC Noncompliance

As discussed above, the IRS' 8823 Guide clarifies how to correct noncompliance with federal issues. The provided chart also references chapters in the Guide specific to many common compliance issues. Here we address findings on the chart relating to state covenant issues.

- **A household is above an applicable state agency covenant set-aside income limit upon move-in (but they are below the minimum set-aside income limit).**

To correct the shortage of state set-aside units, the owner/manager should apply one of the following fixes:

 1. Establish if the household's income has decreased since move-in and they now qualify.
 2. Identify other in-place households that are currently below the IFA set-aside. Rent may need to be adjusted.
 3. Rent other comparable units to IFA-compliant households until the required state set-aside mix is restored.
- **Late or not-completed annual recertification (at 100% LIHTC properties for units with state set-asides)**

Recertification should be conducted as soon as possible. Possible approaches are:

 1. Perform a recertification using information current to the time the cert is being conducted.
 2. A recertification can be conducted using information retroactive to when the recertification should have been conducted. The cert should be dated as of the date signed with a statement that the recertification is "true and accurate" as of the past effective date. Note: the benefit of this approach is that if household income has gone up since the time the recertification should have been conducted, this may help avoid having to apply state set-aside adjustments until the next recertification is due.
- **Physical deficiencies not covered by UPCS, but that IFA may require to be fixed**

Address the physical violation and submit proof to IFA, per IFA policy. Note: issues that IFA requires to be addressed will generally become worse with time and eventually become more serious UPCS violations. Addressing them when IFA requires will help avoid later federal noncompliance.
- **Failure to submit additional state-required reporting**

Submit the required reporting as soon as possible.
- **Rents charged that are over state set-aside rents (but below the minimum set-aside)**

Adjust rents as soon as possible. Rebate any overcharges.

Note: IFA also requires that federal rents that are overcharged must be rebated to households who overpaid. The project file must be documented, including notification by the owner to the household of the overpayment and the amount to be rebated.

This exceeds federal requirements, but it indicates due diligence to IFA.

Some noncompliance is very specific to a situation, property or LURA/HOME Contract. Your Compliance Officer can provide specific advice beyond the scope of this manual.

Correcting Specific HOME Noncompliance

- **Mix of High and Low HOME units not maintained.**

To correct the mix of HOME units, the owner/manager should establish a plan to restore the mix.

1. For floating HOME projects this can involve identifying in-place HOME and non-HOME residents who meet HOME requirements, renting to newly qualified HOME households or a combination of both approaches.
 2. For fixed HOME, moving HOME households who meet the correct set-asides into HOME units, encouraging voluntary transfers of HOME-qualified households from non-HOME units or a combination of both approaches.
- **Lease for HOME units fails to meet HOME provisions.**
Execute a correct lease and IFA Addendum.
 - **Households over HOME limits at move-in.**
 - For floating HOME projects, other comparable units can be designated as HOME.
 - For fixed HOME, providing incentives for the household to voluntarily transfer to a non-HOME unit or to move out. IFA may also authorize changing fixed HOME units in a project.
 - **Rents charged are above the HOME limits (including subsidy) or rents are calculated incorrectly for households over the 80% income limits.**
Adjust rents as soon as possible. Rebate any overcharges.
 - **Leasing of the next available HOME unit to an unqualified household after a current household exceeds the 80% income limits.**
Fix the HOME mix (as suggested above) depending on if the property is fixed or floating HOME.
 - **A HOME unit contains an ineligible student household.**
Treat the household as “over-income” (over the 80% income limit) per the HOME rules relating to increases of income. When charging rent based on adjusted income, include ineligible student parents’ income (see Chapter 4 for a detailed discussion of the HOME over income rule).

Record Retention

LIHTC

Records for each year of the Credit Period (including resident files) must be kept according to the following minimum timeframes:

- **Year 1 of the Credit Period:** At least 6 years beyond the deadline for filing the tax return the last year of the Compliance Period, for a total of over 21 years.
- **Years 2-15:** 6 years beyond the deadline for filing the tax returns for each year.

IFA and the IRS allow copies of files to be stored electronically. However, extreme caution must be taken to ensure that the files are complete, remain uncorrupted over time and that hardware and software are maintained that can access the electronic files for over 21 years.

HOME

HOME records must be kept for 5 years beyond the project’s Affordability Period. If a project is both LIHTC and HOME, the LIHTC requirements may be more restrictive.

Chapter 7 - Post-Year-15 issues for LIHTC Properties

The phrase, “Post Year-15” is used here to denote the period beyond the Compliance Period (years 1 through 15) which may also be referred to as the Extended Use Period.

The following Post Year-15 Monitoring Procedures apply to Tax Credit developments that have completed the initial 15-year Compliance Period and have an Extended Low-Income Housing Commitment defined in the development’s LURA. The following rules are IFA-specific. Post-Year-15 rules may differ substantially in other states.

These procedures also apply to LIHTC developments that were financed with tax-exempt bonds, provided the bonds are no longer outstanding and the bond Qualified Project Period has expired.

Several procedures change in the compliance monitoring process previously discussed for the initial 15-year Compliance Period. If not specifically addressed in the following pages, procedures will remain the same as used during the initial 15-year Compliance Period.

Managers should carefully track when buildings within a development transition from the Compliance Period to the Post Year-15 or Extended Use Period. Premature implementation of the Post Year-15 compliance and monitoring guidelines may result in noncompliance with IRC Section 42 for which IFA will be required to notify the IRS using Form 8823.

After the initial 15-year Compliance Period has expired, there is no tax impact in the event of noncompliance. Therefore, IFA will no longer file IRS Form 8823 with the IRS to report noncompliance. IFA has modified the IRS Form 8823 to serve as a reporting tool reflecting issues of noncompliance with the development’s LURA. This notice, the *State Notice of Noncompliance*, will be issued only after the 90-day correction period and if the development has not taken effective measures to cure all observed LURA noncompliance items.

Important Note: Developments financed with other funding sources, such as HUD, HOME, RD or tax-exempt bonds that are still outstanding, may continue to be subject to the rules of their respective funding source beyond the LIHTC 15-year Compliance Period. Check with an IFA Compliance Officer and your other programs’ regulatory monitor if you are unsure of the current status of your development in regard to other funding sources.

Initial Income Certification and Recertification Process

The initial *Tenant Income Certification* (TIC) with appropriate verifications (as previously discussed) will be completed only at the time of initial occupancy. Households must continue to have an initial lease term of no less than 6 months.

Annual recertification, with appropriate verifications, will continue to be required for existing households after year 15 of the Compliance Period for mixed-use and Deep Rent Skewed projects and for units with state covenant set-asides at mixed-income 100% LIHTC projects.

Annual Reports

Owners will continue to submit their *Owner Certification of Continuing Compliance* and supporting documentation as well as report tenant-level data through the IFA Certification Portal (CP).

Household Transfers & Available Unit Rule

As during the Compliance Period, households may change units, including moving to a unit in a different building within the development, without the submission of a new household income qualification.

Owners should indicate all household transfers on the Annual Report.

The Available Unit Rule will no longer pertain to “comparable or smaller size”, and will apply on a unit basis only, allowing one-for-one unit replacement to maintain building applicable fractions.

Student Status

LIHTC student status rules no longer apply after the Compliance Period. If the project is also a HOME project, it will need to continue to certify student status during the HOME Affordability Period.

An important word of caution: If a property will be resyndicated and get more tax credits as a result of rehabilitation, or if that is a possibility, an owner should not discontinue applying the student status rules.

Applicable Fraction and Agency Covenants

After year 15, it is required that the applicable fraction continues to be met the same as before. Agency covenant set-asides do not change Post Year-15. The original income restrictions set forth in the development’s LURA will remain in effect through the term of the LURA.

For properties facing extreme financial hardship, an owner may request a change to the LURA that will improve the financial feasibility of the property. Contact your IFA Compliance Officer to discuss the change application and fee. The request will be reviewed by a team at IFA on a case-by-case basis.

Note: IFA cannot grant changes for programs that they do not monitor such as Rural Development or HUD. IFA recommends the owner contact representatives of other funding sources for a determination of the impact on the other program prior to submission of a change request to IFA.

Record Retention

Beginning in year 16, owners must maintain a resident file for the entire term of residency plus one year after the household vacates the unit. Check with an IFA Compliance Officer if you have other funding sources and program rules that may still be in effect.

Compliance Monitoring Visits

Physical inspections and file reviews will be performed by IFA or its authorized representative at least once every 5 years. Please note that IFA may place a development on a more frequent inspection cycle if observed violations are numerous or severe in nature at the sole discretion of IFA. In projects that also contain HOME units, inspection frequency will continue to follow the HOME requirements throughout the HOME Affordability Period.

- **Physical Inspection** – a minimum of 4 units chosen at random or a maximum of 20% of the low income units. Observation of systemic or chronic noncompliance may trigger additional unit inspections.
- **File Review** - a minimum of 4 units or a maximum of 20% of the low income units. Observation of systemic or chronic noncompliance may trigger additional file reviews.

IFA will randomly select which low-income units and resident records are to be inspected and reviewed by IFA. IFA will continue to provide an owner 30-day advance written notice that an inspection of the building and low-income units or resident record review will occur so that the owner may notify residents of the inspection or assemble resident records for review.

Noncompliance

The same correction period process (90 days from the date of owner notification from IFA) will be used as during the first 15 years; however, IFA will issue the *State Notice of Noncompliance* to owners for uncorrected issues. For systemic or chronic noncompliance, temporary suspension and/or debarment procedures may be implemented.

Qualified Contract Process

In 1989, the requirement was added for Extended Use Periods that lengthened the period of time that LIHTC developments are required to maintain affordability from 15 to 30 years. In an effort to ease the concerns of program participants about the economic viability of maintaining affordability for the longer period, the Code provided an option for owners to exit the program after the end of the initial 15-year Compliance Period by requesting the state allocation agency to assist in finding a purchaser, willing to continue the affordability restrictions, at a “Qualified Contract Price” (QCP).

Even though the program provides owners with the Qualified Contract opt-out provision, many developers in Iowa waived their right to an early opt-out in exchange for additional points in the scoring and allocation process. IFAs Qualified Contract process applies only to those properties that are eligible for opt-out at some point after year 15 prior to the end of the Extended Use Period. Owners are encouraged to review their applications submitted to IFA when they originally applied for an allocation of credits, as well as the LURA, to determine if and when they are eligible to pursue the opt-out provision. If eligible for early opt-out, owners may request, in writing, that IFA find a buyer for the property using the appropriate procedures, forms and application found on the IFA website. If IFA is unable to find a buyer pursuant to a Qualified Contract after a year, the property may be converted to market rate, provided the property has no other use restrictions (such as subordinate loans, HUD Use Agreements, etc.).

Owners must notify IFA of their desire to sell the property using the current IFA policy found on the IFA website. For developments that consist of more than one building (as evidenced in the development’s 8609(s)), **all buildings** must be in the last year of their initial Compliance Period or after in order to request the Qualified Contract. Qualified Contract requests can be submitted annually in March and in October.

The development and owner must be in compliance with all program requirements to be eligible to apply for the opt-out provision. The Qualified Contract may be suspended or terminated due to any

mortgage defaults or encumbrances on the property or IRS audit or investigation that may adversely affect the sale of the property.

Foreclosure or Deed-in-Lieu

If a property is facing the prospect of either foreclosure or deed-in-lieu due to financial insolvency, IFA will make all efforts to maintain affordability by working with the owner/manager to seek a more positive solution. Please contact the IFA Asset Management Director if your project is facing the likelihood of foreclosure as soon as possible. The chances of obtaining an alternate solution may improve with early intervention.

Chapter 8 - Responsibilities

To provide a conclusion to this manual, this last chapter summarizes many of the topics discussed and how they translate to responsibilities conducted by IFA and owner/managers.

IFA Responsibilities

IFA allocates and administers compliance with the tax credit program for the State of Iowa. Additionally, IFA serves as the Participating Jurisdiction (PJ) for the HOME program funds allocated to the State of Iowa. The primary compliance-related responsibilities of IFA are as follows:

A. Prepare Regulatory Agreement/Restrictive Covenants

For LIHTC projects, IFA will prepare a Land Use Restrictive Agreement (LURA) prior to the issuance of the IRS Form 8609. The LURA is an encumbrance on the property. This document must be recorded before the end of the calendar year in which credits are first claimed.

For HOME projects, IFA issues the HOME Contract and master agreement.

B. Issue IRS Form 8609 (Low-Income Housing Certification), with Part I executed

When the original recorded LURA is returned to IFA and all fees have been paid, the IRS Form 8609 will be sent to the owner. An IRS Form 8609 is prepared by IFA for each building in the development.

Note: If rehabilitation and acquisition credits are claimed on the same building, the rehabilitation is treated by Section 42 as a separate building. Therefore, the acquisition and rehabilitation will receive separate 8609 forms.

The owner submits the original to the IRS when the owner's personal, partnership, or corporate tax returns are filed for the first taxable year in which the credit is claimed. Refer to the 8609 instructions to determine when and how a copy of the 8609 must be submitted with the tax return.

Owners should consult with their legal and/or tax advisors for advice on completing and filing the IRS tax forms. IFA cannot provide legal or tax advice on the filing or completion of tax forms.

Part 1 of IRS Form 8609 is prepared and filed by IFA only. If IFA becomes aware that a developer or agent filed a self-prepared 8609 with the IRS, IFA reserves the right to determine that all parties involved are ineligible for future participation in Iowa's LIHTC program for a period of up to five (5) years.

C. Review Annual Owner Certification of Continuing Compliance and other required reporting

IFA maintains and makes available to owner/managers a Certification Portal (CP) and works with third-party vendors to ensure compatibility with management company software. For information on the Annual Owner Certification, see Chapter 6.

D. Conduct On-site Monitoring

IFA is required by the IRS to conduct in-depth, on-site inspections of all buildings in the development. For further information regarding on-site monitoring, see Chapter 6.

E. Notify IRS of Noncompliance

IFA will provide written notification to the owner for items of noncompliance. The correction period will not exceed 90 days from the date of notice of noncompliance. IFA may extend the correction period for up to six months, but only if IFA determines there is good cause for granting the extension. During the 90-day time period (for physical deficiencies only), or the extension thereof, the taxpayer must supply all documentation that verifies the development is back in compliance.

F. Record Retention

IFA will retain all owner certifications and records for not less than three years from the end of the calendar year in which they are received. IFA will retain records of noncompliance or the failure to certify compliance for six years after its filing IRS Form 8823.

G. Compliance Updates and Training

IFA will provide updates at the *HousingIowa Conference* held annually in September.

H. Possible Future Subcontracting of Functions

Treasury Regulations allow IFA the right to delegate some or all compliance monitoring responsibilities. IFA may in the future, decide to retain an agent or private contractor to perform some of the responsibilities listed above. In this event, IFA shall use reasonable diligence to ensure that the agent or private contractor(s) properly perform(s) the delegated monitoring functions. If IFA determines that a third party shall perform monitoring responsibilities, IFA will always retain responsibility for notifying the IRS of any noncompliance of which it becomes aware via Form 8823.

I. Administration and Notification

Information regarding compliance is posted on the IFA website and updated regularly and includes the following:

- Annual Compliance Reporting Requirements & Documentation
- Current Income & Rent Limits (HOME, LIHTC, Fair Market)
- Historical Income & Rent Limits (HOME, LIHTC, Fair Market)
- Inspection Documents
- Required Forms
- Sample Forms
- Qualified Contract Process documents
- Certification Portal (CP) login in & training documentation
- Asset Management Portal (AM)

Program notices, news releases and notices of training opportunities are also posted on the website. Additionally, owners/managers and other interested parties may join the Compliance email listing by submitting contact information to the Asset Management Director. It is the responsibility of the owner/manager and other parties to notify IFA if changes in personnel or email addresses occur.

Owner/Manager Responsibilities

The owner has chosen to utilize the LIHTC and/or HOME program to take advantage of the tax and other benefits provided. In exchange for these benefits, the owner must adhere to certain requirements and accept responsibilities.

These responsibilities include, but are not limited to the following:

A. Allocation/Commitment Requirements

In the LIHTC and/or HOME application, the owner provides comprehensive development information with evidence of overall economic feasibility. Prior to the issuance of a final allocation of credits and commitment of HOME funds, the owner certifies to the total development costs and that all program requirements have been met. Any violation of the program requirements or misinformation represented in the application or certifications could result in the loss of the credit allocation and HOME funding.

B. Project Knowledge

At a minimum, the development owner should be knowledgeable about the following (as applicable):

1. The credit year of the development. (What is the date of allocation?)
2. The date placed in-service for each building. (The placed in-service date is the date of first possible occupancy, not necessarily actual occupancy – generally; this is the date of the certificate of occupancy).
3. If a LIHTC acquisition rehabilitation development:
 - a) Whether residents were required to move out during rehabilitation.
 - b) Whether the building was occupied during the rehabilitation.
 - c) Whether current residents are qualified households.
 - d) Developers must track the relocation of residents during the rehabilitation process sufficient to complete the cost certifications and tax returns.
4. The number of buildings in the development.
5. The Building Identification Number (BIN) for each building in the development.
6. The minimum set-aside and other federal set-asides elected:
 - a) 20-50, 40-60 or Average Income
 - b) Deep Rent Skewing
 - c) 40-50 election for HOME or
 - d) Additional elections made in the application for additional points
7. Developers must track the relocation of residents during the rehabilitation process sufficient to complete the cost certifications and tax returns.
8. The HOME required mix of High and Low HOME units.
9. The HOME fixed or floating designation.
10. For each building, the percentage of the residential units and the percentage of residential floor space occupied by qualified residents.
11. The year that credit was first claimed.
12. The first year of the HOME Affordability Period.
13. The terms, under which the tax credit reservation or HOME Commitment was made, including statutory set-asides, deeper targeting agreements, etc.
14. The terms and conditions stated in the LURA.

C. Proper Administration and Record-Keeping

The owner is responsible for the proper administration of the development, including the Code requirements that resident income and rent records be kept and retained for each building in the development for the Compliance Period.

Owners must maintain the records necessary for IFA to conduct a compliance monitoring review and for the IRS to conduct an audit. Maintain records for the first year of the Credit Period for a minimum of 21 years, and records for all other years in the 15-year Compliance Period for a minimum of 6 years following each year's end. HOME records must be kept for a minimum of five years.

The records must include the following:

1. The total number of residential rental units in the building (including the number of bedrooms and the size in square feet of each residential rental unit).
2. The percentage of residential rental units in the buildings that are low income units.
3. The rent charged for each residential rental unit in the building, supporting documentation, and the applicable utility allowance.
4. The number of occupants in each low income unit.
5. The low income unit vacancies in the building and information that shows when and to whom the next available units were rented (this information must include the unit number, resident name, move-in dates and move-out dates for all residents, including market-rate residents).
6. The annual income certification of each eligible resident (as applicable).
7. Documentation to support each eligible resident's income certification.
8. The eligible basis and qualified basis of the building at the end of the first year of the Credit Period.
9. The character and use of the nonresidential portion of any building included in the project's eligible basis under Section 42(d) of the code (e.g., resident facilities that are available on a comparable basis to all residents and for which no separate fee is charged for use of the facilities, or facilities reasonably required by the development).

D. Maintain a Development File

Owners must maintain a development file that contains all pertinent documents for the development.

IFA retains the right to inspect the development file at any time. The development file must contain:

1. All approved tax credit and HOME applications together with applicable attachments.
2. A recorded copy of the Regulatory Agreement/Restrictive Covenant/LURA/HOME Contract.
3. IRS Forms 8609 and 8586 for each building for each year credit is claimed.
4. All applicable documents relating to any other form of housing or finance programs (i.e., HUD Section 8, RHS., etc.).
5. Documentation that the development complies with any statutory set-asides or Qualified Allocation Plan (QAP) requirements.
6. Documentation for each utility allowance update or revision, that must occur at least once per year.

E. Maintain a Resident/Unit File for Each Unit in the Development

The resident/unit file requirements are outlined in Chapter 3 of this manual. Files may be paper or electronic, as discussed in Chapter 6.

F. Reporting and Certification Requirements

1. Owners must submit a copy of IRS Form 8609 (Part I & Part II), once signed and dated.
2. Owners must submit and retain copies of the Owner's Annual Certification of Continuing Program Compliance, and related documents, for each year of the Compliance Period and corresponding documentation for the HOME Affordability Period. Certifications will include the notification of the Local Lead Agency of all vacancies and the use of Iowa's free rental housing locator at www.iowaHousingSearch.org if required by the project's QAP at the time of the award. Initial Certifications are due April 1st and subsequent year's Certifications are due March 1st.
3. The owner must submit quarterly occupancy information through the IFA Asset Management Portal (AM). The owner is responsible for reporting occupancy on a quarterly basis. Occupied units are counted on the last day of each month and reported to IFA on a quarterly basis by the 10th of the month following the end of each quarter (see further instructions on the IFA Asset Management Portal). An Asset Management Portal guide is on our website.
4. The owner must submit financials (audits preferred) for all LIHTC projects awarded in 1999 or later and any project with HOME or Multifamily loans. The owner must submit insurance certificates and other required submissions as shown in the IFA AM based on the IFA funding source.

G. Train On-Site Personnel

It is the owner's responsibility to ensure that the on-site management knows, understands, and complies with all applicable rules, regulations, and policies governing the development.

H. Ensure Proper Maintenance

The owner is responsible to maintain the development in a decent, safe, and sanitary condition. Failure to do so is a reportable act of noncompliance.

I. Administration and Notification

The owner must notify IFA immediately in writing of any anticipated changes in the ownership composition, general partner or managing member, or in the management agent, such as name, address, telephone number, and federal ID#. Depending upon language contained in the LURA, the owner may need to seek IFA's approval prior to the transaction taking place. A careful review of the project's LURA will provide guidance on the course of action that needs to take place.

Upon receipt of a request from the owner IFA will send a packet with instructions and forms or a list of documents that need to be completed and sent to us for approval prior to closing.

The owner is responsible for informing IFA of any event that might affect the development's credit or HOME funding throughout all phases of development, rent-up, and operation. This includes the initial phases of construction, the scheduled placed-in-service date and the completion of the development as

outlined in the Code. Any delays or omissions in following this process may result in the issuance of an 8823 or a State Notice of Noncompliance and could also potentially void the sale or transaction.

All communications with IFA must include the IFA-assigned development number, and, if appropriate, the affected Building Identification Numbers (BINs).

J. Compliance Training

Training is provided annually in conjunction with the *Housinglowa Conference* and at other times at IFA's discretion.

K. Declaration of Land Use Restrictive Agreement (LURA)

Prior to claiming tax credits, the building owner must record an approved IFA Declaration of Land Use Restrictive Agreement (LURA) which must be in effect as of the end of the tax year credits are claimed.

Management Company and On-Site Personnel Responsibilities

A. General

The management company and all on-site personnel are responsible to the owner for implementing the LIHTC and/or HOME program requirements properly. Anyone who is authorized to lease apartment units should be thoroughly familiar with federal and state laws, rules, and regulations governing certification and leasing procedures. It is also important that the management company provide information to IFA, as needed, and submit all required reports and documentation in a timely manner.

B. Noncompliance

If the management company determines that the development is not in compliance with the LIHTC or HOME program requirements, the management company should correct the noncompliance whenever possible.

Correction of LIHTC noncompliance matters prior to receiving notification from IFA of a pending scheduled file review and physical inspection is demonstration of proper due diligence and is not reportable to the IRS on form 8823.

C. Compliance Training

Management staff must remain up-to-date on all IRS Code regulations and procedure changes that are published. This may be accomplished through the IRS website, several nationally known LIHTC training providers, IFA's website, and the annual *Housinglowa Conference*.

NOTE: THE ULTIMATE RESPONSIBILITY FOR COMPLIANCE AND PROPER ADMINISTRATION OF THE LIHTC PROGRAM LIES WITH THE OWNER.

Date

HOME/NHTF Rent Approval Guidelines 2022 Rents Released

The 2022 Income and High/Low HOME Rent Limits were published on May 25, 2022, with a June 15, 2022 effective date. The new rent and income limits can be implemented immediately, but no later than June 1st in accordance with the tenant's current lease.

HOME and National Housing Trust Fund (NHTF) regulations require that PJs review and approve rents each year. IFA is responsible for approving rents in all HOME or NHTF-assisted units funded through these two programs currently being administered by IFA. This is done to ensure that the rents comply with the HOME or NHTF rent limits and do not result in undue increases from the previous year that would be difficult for low-income households to afford. Decreases in HOME or NHTF limits may also necessitate a change in HOME or NHTF rents; therefore, a review of rents by IFA of all HOME or NHTF projects is required annually. [see §92.252(f)(2)].

Each project with HOME or NHTF funds from the State of Iowa is required to submit to IFA, within **45 days** of the effective date of the new HOME Income/Rent Limits the IFA required form "HOME/NHTF Rent Approval Worksheet." **Therefore, the deadline for submission of this form and, if applicable, any attachments would be, August 1, 2022.**

If your project has not submitted the required rent approval worksheet by the deadline, you will be issued a State Notice of Noncompliance. Submission of the worksheet will correct the noncompliance. Please note that any requests for rent increases made after this date will be denied and the project will not be eligible for a rent increase until the 2023 rent limits are published by HUD.

General Guidelines:

- All HOME or NHTF projects must report on the IFA required form *HOME/NHTF Rent Approval Worksheet* anticipated rents for their project based upon the published HOME or NHTFC rent limits.
- If, in addition to HOME or NHTF, the project is also either a Section 8 Project Based project or an RD project, anticipated rents must still be reported to IFA. The most recent rent approval documentation from RD or HUD must be submitted with the worksheet.
- An *IFA Compliance Update* will be sent to all owner/management contacts via email when the updated limits are published and posted on the IFA compliance web page. The worksheet is due to IFA within 45 days after the HOME or NHTF rent limits are effective.
- The effective date of a proposed rent increase must be at least one year from the effective date of the property's last approved rent increase.
- A notice to residents of the property's intention to submit a rent increase to IFA for approval must be made available to all households in HOME or NHTF assisted units at least **15 days** prior to submitting the rent increase to IFA for approval. **A copy of the notice sent to residents must be attached to the worksheet in order for IFA to process the rent increase request.**
- Existing residents must be given a 30-day notice before implementing any approved rent increase.
- Decreases resulting from lower HOME or NHTF rent limits or increases in utility allowances must be made in accordance with the tenant's current lease.
- In 2019 IFA dropped the requirement to submit financials and budgets to support a rent increase request. However, IFA reserves the right to request additional information to support a proposed rent increase as we review such requests.

**HOME/NHTF Rent Approval Guidelines
2022 Rents Released**

There are three ways to submit your worksheet and required attachments:

- Through the IFA Certification Portal (CP). Please send an email to: complianceadministrator@iowafinance.com if you would like more information about submitting your data electronically through the portal.
- VIA email: HomeRentandUA@iowafinance.com
Please place the project name and project number in the subject line.
- Snail Mail: Iowa Finance Authority

HOME/NHTF Rent Approval Worksheet
2022 Rent Schedule

Changes in Rent. An Owner/manager may be able to increase the HOME or National Housing Trust Fund (NHTF) rents, depending on the changes in the HUD-published 2022 HOME/NHTF rent limits, changes in the utility allowances in use, or changes in the tenant’s income. PJ’s must approve all rents for projects with HOME or NHTF assisted units, in accordance with the approval process prescribed by IFA.

2022 Rent Schedule**

SECTION 2 – Request for Rent Increase

The deadline for submission of this document is **August 1, 2022**. **Failure to submit this document by that date will result in the denial of the proposed rent increase.**

The following items must be submitted to IFA when requesting a HOME Rent Increase:

- 1. A brief narrative outlining the need for the rent increase requested Yes No
- 2. Most recent rent roll Yes No
- 3. Current utility allowance chart or schedule in use* Yes No
- 4. Six months of occupancy rate data Yes No
- 5. Notice given to residents regarding the proposed rent increase Yes No

**UA Chart(s) must be less than 12 months old or information from the source provided as to why they have not been updated. IFA reserves the right to request additional information to support a proposed rent increase.*

Please complete the following table only if you are requesting a rent increase (use HOME/NHTF addendum document as needed.)

Number of Bedrooms	High or Low HOME Unit (H or L)	Maximum HOME Gross Rent	Amount of Utility Allowance in Use	Current Contract Rent	Proposed Contract Rent	Amount of Rent Increase Requested	% of Rent Increase Requested

SECTION 3 – Signature of Owner/Representative

I certify that I am authorized to sign on behalf of the Project Owner and the above information is true and correct. If a rent increase has been requested, I hereby certify that I have notified, in writing, current tenants of this request.

<input type="checkbox"/> (YES) <input type="checkbox"/> (NO)	42.	Does your household have any needs that might be better served by an apartment that is accessible to persons with mobility or other impairments? _____

APPLICANT RESPONSIBILITIES:

All Questions that were answered "Yes" will need to be verified through the appropriate third-party sources. It will be your responsibility to provide management with all the necessary information to properly process your application and in the future, to verify your on-going eligibility as required. You will be asked to provide the names, addresses, phone number and fax numbers, account numbers (where applicable) and any other information that may be necessary in order to expedite the verification process.

Upon review of the information management receives, you will be provided with a separate verification form for each source that requires verification that you will need to sign and date. You will not be asked to sign a blanket verification form nor will you be asked to sign any blank verification forms.

SIGNATURE:

I understand that management is relying on this information to prove my household's eligibility which is required by the funding sources under which this property operates. I certify under penalty of perjury that all information and answers provided are true and complete to the best of my knowledge. I further understand that providing false information or making false statements may be grounds for denial of my application. I also understand that such action may also result in criminal penalties.

I authorize my consent to have management verify the information contained in this application questionnaire and to perform a credit check and criminal background check for purposes of proving my eligibility for occupancy. I understand that my occupancy is also contingent on meeting management's resident selection criteria and other program requirements.

IFA HOME/NHTF Lease Addendum

Property Name:			
Project# (HOME/NHTF Agreement #)		LIHTC Only: (BIN #)	
Tenant's Name (Head of Household)		Unit #	

- The lease term for a HOME or National Housing Trust Fund (NHTF)-assisted unit must be for at least one year, unless the Tenant and the Owner mutually agree upon a shorter term.
- The rent is subject to the rent restrictions of the HOME or NHTF Program.
- The initial rent for this unit is \$_____ per month.
- The Owner retains the right to adjust rents, in accordance with the HOME/NHTF Rent limits.
NOTE: The rent for Tenants whose incomes exceed the HOME 80% income limits may increase.
- The Tenant(s) understand that they must recertify their income eligibility on an annual basis. The Tenant's failure to cooperate in the income recertification process will constitute a violation of the lease. Deliberately providing false information can result in termination of the lease.
- The Owner may choose not to renew a Tenant's lease for good cause as defined in the Tenant's lease. The Owner must give the Tenant a written notice at least 30 days before the Tenant must vacate the unit.
- Owner retains the right to inspect, and permit the Iowa Finance Authority, and HUD to inspect HOME or NHTF-assisted units annually during the affordability period. Tenants must receive at least a 24 hour notice prior to a scheduled inspection.
- For any building built prior to 1978, HUD's Lead Based Paint notification form must also be completed.

The Owner agrees to the following:

- The Tenant shall not be sued, be made to admit guilt, or agree to a judgment in favor of the Owner in a lawsuit brought in connection with the lease.
- The Owner may not seize or sell personal property of household members without written notice to the Tenant and a court decision on the rights of the parties. This does not apply to disposition of personal property left by a Tenant who has vacated a property which shall be disposed of in accordance with state law.
- The Tenant will not be asked to hold the Owner or Owner's agents legally responsible for any action or failure to act, whether intentional or negligent.
- The Owner will not institute a lawsuit without proper written notice to the Tenant.
- The Owner will not start proceedings to evict the Tenant and/or any household members without instituting a civil court proceeding in which the Tenant has the opportunity to present a defense, or before a court decision on the rights of the parties.
- The Tenant will not be asked to waive the right to a trial by jury.

IFA HOME/NHTF Lease Addendum

- The Tenant will not be asked to waive the right to appeal or to otherwise challenge in court a court decision in connection with the lease.
- The Tenant will not be required to pay Owner’s attorney’s fees or other legal costs if the Tenant wins in a court proceeding against the Owner. The Tenant, however, may be obligated to pay costs if the Tenant loses.
- The Tenant will not be required to accept supportive services unless the Property is a transitional housing project.

The HOME/NHTF provisions listed in this Lease Addendum shall supersede any conflicting language contained in the lease.

Notice of Casualty Loss or Damage

The Iowa Finance Authority (IFA) must be notified if;

- i. the casualty loss is the result of a major event such as fire, or flood, or natural disaster, or
- ii. the loss results in the household(s) being transferred or the household(s) removed from their unit

The Internal Revenue Code 42(j)(4)(E) states that buildings which are allocated tax credits are protected from recapture of credits due to a casualty loss to the extent that such loss is restored by reconstruction or replacement within the time established by IFA (Compliance Manual pg. 115). Owners or their designated representatives must report the casualty loss and their plan for reconstruction or replacement of the loss of the building (or of each affected building) within 30 days of the incident. Monthly updates MUST be provided to IFA until project is fully restored.

While HOME and NHTF rules are silent on this issue, IFA requires these projects to also complete this form.

Complete a separate form for each affected building and submit to:

Iowa Finance Authority
Attn: Tim Morlan, Asset Management Director
1963 Bell Ave, Ste 200
Des Moines, IA 50315
Email: tim.morlan@iowafinance.com

Property Name:	
Household Name:	

Instructions for Use:

Pages 1 -3 are to be used when certifying or re-certifying a household for eligibility with the **HOME or National Housing Trust Fund (NHTF) programs**. Page 4 pertains to eligibility with the LIHTC program. You must use all four pages of the document if you are qualifying a tenant for a unit that is both a HOME and an LIHTC unit as the requirements are different for each. The household must qualify under both programs in order to be eligible to occupy a HOME/LIHTC unit.

Part 1: (If an LIHTC project only, skip to Page 4 & submit only Page 4)

Are any household members under age 24 and students (full- or part-time) at an institute of higher learning? (YES) (NO)

If "NO," sign and return the form to management. *No further action is necessary.*

If "YES," list all students in the table below, then sign (add an additional sheet if necessary.) Have EACH student or their parent/guardian complete PART 2. Complete PART 3 and 4 as the form directs.

	Student Name	Age	Name of Educational Institution	Date Range Attended or Planning to Attend	Full or Part-time
1.					<input type="checkbox"/> FT <input type="checkbox"/> PT
2.					<input type="checkbox"/> FT <input type="checkbox"/> PT
3.					<input type="checkbox"/> FT <input type="checkbox"/> PT
4.					<input type="checkbox"/> FT <input type="checkbox"/> PT
5.					<input type="checkbox"/> FT <input type="checkbox"/> PT
6.					<input type="checkbox"/> FT <input type="checkbox"/> PT

Student Status Certification

Property Name:	
Household Name:	

This page is to be used when qualifying households for eligibility with the LIHTC program (one document per household)

Check A, B, C or D, as applicable (note that “student(s)” include those attending public or private elementary schools, middle or junior high schools, senior high schools, colleges universities, technical, trade, or mechanical schools, but does not include those attending on-the-job training courses):

- A. Household contains at least one occupant who is not a student, has not been a student, and will not be a student during the current and/or upcoming calendar year. A student is defined as someone who attends school full time for any part of five or more months in a calendar year (months need not be consecutive). If this item is checked, no further information is needed.

- B. Household contains all students, but the following occupant(s) is/are a part-time student(s). Documentation of part time student status is required for at least one member of the household.

	PT Student Name:
1.	
2.	
3.	
4.	

- C. Household contains all full-time students for five or more months during the current and/or upcoming calendar year (months need not be consecutive). If this item is checked, questions 1-5, below must be completed:
 - 1. Is at least one student receiving assistance under Title IV of the Social Security Act (known as TANF in Iowa –provide TANF award letter or 3rd party verification)? (YES) (NO)
 - 2. Was at least one student previously under the care and placement responsibility of the state agency responsible for administering foster care? (provide documentation of participation) (YES) (NO)
 - 3. Does at least one student participate in a program receiving assistance under the Job Training Partnership Act, Workforce Investment Act, or under other similar, federal, state or local laws? (attach documentation of participation) (YES) (NO)
 - 4. Is at least one student a single parent with child(ren) and this parent is not a dependent of another individual and the child(ren) is/are not dependent(s) of someone other than a parent? (YES) (NO)
 - 5. Are the students married and entitled to file a joint tax return (provide marriage certificate or tax returns)? (YES) (NO)

- D. No member of this household has been a student during the current calendar year or plans on becoming a student in the current or upcoming calendar year.

Under penalty of perjury I certify that the information presented in this certification is true and accurate to the best of my/our knowledge. The undersigned further understands that providing false information herein constitutes an act of fraud. False, misleading or incomplete information may result in the termination of a Lease Agreement.

Tenant Income Certification Instructions

INSTRUCTIONS

General Instructions: The purpose of this form is to enable reporting of federal low income housing tax credit data, but it has been adapted to allow use with the HOME and National Housing Trust Fund programs as well. The definitions for all fields are to be understood in that context. All fields below must appear on the state TIC. States are free to include other fields on their TICs that are designed to collect other data. This form is to be completed by the owner or an authorized representative.

Part I. Development Data

Check the appropriate box for Initial Certification (move-in), Recertification (annual recertification), or Other. If Other, designate the purpose of the recertification (i.e., a unit transfer, a change in household composition, or other state-required recertification).

- Move-in Date** Enter the date the tenant has or will take occupancy of the unit.
- Effective Date** Enter the effective date of the certification. For move-in, this should be the move-in date. For annual recertification, this effective date should be no later than one year from the effective date of the previous (re)certification.
- Property Name** Enter the name of the development.
- County** Enter the county (or equivalent) in which the building is located.
- BIN #** Enter the building identification number (BIN) assigned to the building (from IRS Form 8609).
- Address** Enter the address of the building.
- Unit Number** Enter the unit number.
- # Bedrooms** Enter the number of bedrooms in the unit.

Part II. Household Composition

Name: List first name, middle initial and last name of all occupants of the unit. For unborn child or pregnant household member, enter "unborn"

Relationship: State each household member's relationship to the head of household by using one of the following coded definitions:

H	-Head of household	S	-Spouse
A	-Adult co-tenant	O	-Other family member
C	-Child	F	-Foster child(ren)/adult(s)
L	-Live-in caretaker	N	-None of the above

Race: Enter each household member's race by using one of the following coded definitions: 1 –White; 2 – Black/African American; 3 –American Indian/Alaska Native 4 – Asian; 5 –Native Hawaiian/Other Pacific Islander; 6 –Other; or 8 –tenant did not respond.

Ethnicity: Enter each household member's ethnicity by using one of the following coded definitions: 1 –Hispanic or Latino; 2 –not Hispanic or Latino; or 3 –tenant did not respond.

Disabled: Check yes ("Y"=yes; "N"=no"; or "NR"=Tenant did not respond if any member of the household is disabled according to the Fair Housing definition for handicap (disability) found at: http://www.fairhousing.com/index.cfm?method=page.display&pagename=regs_fhr_100-201

Date of Birth: Enter each household member's date of birth.

Tenant Income Certification Instructions

S.S. Number For each tenant over 18 years of age, enter the last four digits of the social security number or the last four digits of the alien registration number. If tenant does not have an SSN or alien registration number, enter "0000".

If more than seven household members will reside in the unit, use the Tenant Income Certification Addendum.

Part III. Annual Income

See HUD Handbook 4350.3 for complete instructions on verifying and calculating income, including acceptable forms of verification.

From the third-party verification forms obtained from each income source, enter the gross amount anticipated to be received for the 12 months from the effective date of the (re)certification. Complete a separate line for each income-earning member. List the respective household member number from Part II.

- Column (A) Enter the annual amount of wages, salaries, tips, commissions, bonuses, and other income from employment; distributed profits and/or net income from a business.
- Column (B) Enter the annual amount of Social Security, Supplemental Security Income, pensions, military retirement, etc.
- Column (C) Enter the annual amount of income received from public assistance (i.e., TANF, general assistance, disability, etc.).
- Column (D) Enter the annual amount of alimony, child support, unemployment benefits, or any other income regularly received by the household.
- Line (E) Add the totals from columns (A) through (D), above. Enter this amount.

Part IV. Income from Assets

See HUD Handbook 4350.3 for complete instructions on verifying and calculating income from assets, including acceptable forms of verification.

From the third-party verification forms obtained from each asset source, list the gross amount anticipated to be received during the 12 months from the effective date of the certification. List the respective household member number from Part II and complete a separate line for each member.

- Column (F) List the type of asset (i.e., checking account, savings account, etc.).
- Column (G) Enter C (for current, if the family currently owns or holds the asset) or I (for imputed, if the family has disposed of the asset for less than fair market value within two years of the effective date of (re)certification).
- Column (H) Enter the cash value of the respective asset.
- Column (I) Enter the anticipated annual income from the asset (i.e., savings account balance multiplied by the annual interest rate).
- TOTALS Add the total of Column (H) and Column (I), respectively.

*If the total in Column (H) is greater than \$5,000, you must do an imputed calculation of asset income.
Enter the Total Cash Value, multiply by 2% and enter the amount in (J), Imputed Income.*

- Box (K) Enter the greater of the total in Column (I) or (J).
- Box (L) Total Annual Household Income from All Sources. Add (E) and (K) and enter the total.

Household Certification and Signatures

After all verifications of income and/or assets have been received and calculated, each household member age 18 or older must sign and date the Tenant Income Certification (and Addendum, if necessary). For move-in, it is recommended that the Tenant Income Certification be signed no earlier than five (5) days prior to the effective date of the certification.

Part V. Determination of Income Eligibility

Total Annual Household Income from All Sources	Enter the number from item (L).
Current Income Limit per Family Size	Enter the Current Move-in Income Limit for the household size at the designated income limit for that unit.
Household Income at Move-In	For recertifications only. Enter the household income from the move-in certification.
Household Size at Move-In	For recertifications only. Enter the number of household members from the move-in certification.
Household Meets Income Restriction	Check the appropriate box for the income restriction that the household meets according to what is required by the minimum set-aside(s) for the project, including the specific unit designation for Average Income Test developments.
Current Income Limit x 140%	For recertifications only. Multiply the Current Maximum Move-in Income Limit by 140% and enter the total. Below, indicate whether the household income exceeds that total. If the Gross Annual Income at recertification is greater than 140% of the current income limit, then the available unit rule must be followed. For units designated at 50 percent or below in Average Income Test developments, use 60% limit for Current Income Limit.

Part VI. Rent

Tenant Paid Rent	Enter the amount the tenant pays toward rent (not including rent assistance payments such as Section 8).
Rental Assistance	Enter the amount of rent assistance, if any.
Rental Assistance Type	Enter the type (source) of rent assistance, if any.
Utility Allowance	Enter the utility allowance. If the owner pays all utilities, enter zero.
Other Non-Optional Charges	Enter the amount of non-optional charges, such as mandatory garage rent, storage lockers, charges for services provided by the development, etc.
Gross Rent for Unit	Enter the total of tenant paid rent plus utility allowance and other non-optional charges.
Maximum Rent Limit for This Unit	Enter the maximum allowable gross rent for the unit.
Unit Meets Rent Restriction at	Check the appropriate rent restriction that the unit meets according to what is required by the minimum set-aside(s) for the project, including the specific unit designation for Average Income Test developments.

Under \$5,000 Asset Certification*

For households who combined NET assets DO NOT exceed \$5,000.
 Complete one form per household; include assets from children of the household
 *May not be used for HOME/National Housing Trust Fund Full Recertification Requirements

Property Name:	IFA Project #:
Household Name:	BIN & Unit #:

1. My/our assets include:

(A) Cash Value**	(B) Int. Rate	(AxB) Annual Income	Source		(A) Cash Value**	(B) Int. Rate	(AxB) Annual Income	Source
			Savings Account					Checking Account
			Cash on Hand					Safety Deposit Box
			Certificates of Deposit					Money Market Funds
			Stocks					Bonds
			IRA Accounts					401K Accounts
			Keogh Accounts					Trust Funds
			Equity in Real Estate					Land Contracts
			Lump Sum Receipts					Capital Investments

(Name of Asset)

			Whole Life Insurance Policies				
			Other Retirement/Pension Funds				
			Personal Property held as an investment***				
			Any account only accessed through a debit card [#]				
			Other (Attach list if necessary)				

PLEASE NOTE: Certain Funds (e.g., Retirement, Pension, Trust) may or may not be (fully) accessible to you. Include only those amounts which are:

** Cash value is defined as market value minus the cost of converting the asset to cash, such as broker's fees, settlement costs, outstanding loans, early withdrawal penalties, etc.

*** Personal property held as an investment may include, but is not limited to, gems or coin collections, art, antique cars, etc. DO NOT include necessary personal property such as, but not necessarily limited to, household furniture, daily use of autos, clothing, assets of an active business, or special equipment for use of the disabled.

Do not count food stamp accounts or checking accounts already listed. Example: Payroll, Social Security or Welfare Accounts

2. Disposed Assets

(YES) (NO) I/We have disposed of assets for less than fair market value in the last 2 years. Examples would include such items as charitable donations or giving/selling assets (such as real estate) to family.

3. No Assets

(YES) I/We DO NOT have any assets at this time.

The Net Family Assets (as defined in CRF 813.102) above do not exceed \$5,000 AND the Annual Income from the Net Family asset is: \$ _____. This amount is included in the total Gross Annual Income.

LEASE ADDENDUM

VIOLENCE AGAINST WOMEN AND JUSTICE DEPARTMENT REAUTHORIZATION ACT OF 2005

TENANT	LANDLORD	UNIT NO. & ADDRESS
--------	----------	--------------------

This lease addendum adds the following paragraphs to the Lease between the above referenced Tenant and Landlord.

Purpose of the Addendum

The lease for the above referenced unit is being amended to include the provisions of the Violence Against Women and Justice Department Reauthorization Act of 2005 (VAWA).

Conflicts with Other Provisions of the Lease

In case of any conflict between the provisions of this Addendum and other sections of the Lease, the provisions of this Addendum shall prevail.

Term of the Lease Addendum

The effective date of this Lease Addendum is _____. This Lease Addendum shall continue to be in effect until the Lease is terminated.

VAWA Protections

1. The Landlord may not consider incidents of domestic violence, dating violence or stalking as serious or repeated violations of the lease or other “good cause” for termination of assistance, tenancy or occupancy rights of the victim of abuse.
2. The Landlord may not consider criminal activity directly relating to abuse, engaged in by a member of a tenant’s household or any guest or other person under the tenant’s control, cause for termination of assistance, tenancy, or occupancy rights if the tenant or an immediate member of the tenant’s family is the victim or threatened victim of that abuse.
3. The Landlord may request in writing that the victim, or a family member on the victim’s behalf, certify that the individual is a victim of abuse and that the Certification of Domestic Violence, Dating Violence or Stalking, Form HUD-91066, or other documentation as noted on the certification form, be completed and submitted within 14 business days, or an agreed upon extension date, to receive protection under the VAWA. Failure to provide the certification or other supporting documentation within the specified timeframe may result in eviction.

ZERO INCOME CERTIFICATION

Must complete one form per adult household member reporting zero income during the Application Process

Property Name:	IFA Project #:
Household Name:	BIN & Unit #:

1. I hereby certify that I **do not** receive income from any of the following sources. (Check each box as you review each statement):

a.	Wages from employment (including commissions, tips, bonuses, fees, etc.)	<input type="checkbox"/>
b.	Income from the operation of a business	<input type="checkbox"/>
c.	Rental income from real or personal property	<input type="checkbox"/>
d.	Interest or dividends from assets	<input type="checkbox"/>
e.	Social Security payments, annuities, insurance policies, retirement funds, pensions, or death benefits	<input type="checkbox"/>
f.	Unemployment or disability payments	<input type="checkbox"/>
g.	Public assistance payments	<input type="checkbox"/>
h.	Periodic allowances such as alimony, child support, or gifts received from persons not living in my household	<input type="checkbox"/>
i.	Sales from self-employed resources (Avon, Mary Kay, Shaklee, etc.);	<input type="checkbox"/>
j.	Any other source not named above	<input type="checkbox"/>

2. Which of the following descriptions best describes your current situation? (Select only one response)

a.	I currently have no income of any kind and no change in my financial status or employment status is likely to occur during the next 12-month period. OR	<input type="checkbox"/>
b.	I currently am actively looking for employment, although I have no source of employment at this time	<input type="checkbox"/>

*Below, please provide information on the sources of funds to be used to pay for rent and other necessities while residing in the unit. **If it is not filled out in its entirety, the form will be considered incomplete, and the unit considered out of compliance.** For example, the answer "rental assistance" explains how rent will be paid, but not how other necessities will be paid and is not a complete answer.*

Under penalty of perjury, I certify that the information presented in this certification is true and accurate to the best of my knowledge. The undersigned further understands that providing false information herein constitutes an act of fraud. False, misleading, or incomplete information may result in the termination of a Lease Agreement.

MULTIPLE PROGRAMS GUIDE

A SIDE-BY-SIDE SUMMARY OF SPECIFIC HOUSING PROVISIONS

Tax Credits | HUD | Rural Development | HOME | Tax Exempt Bonds
NOW INCLUDES UPDATED National Housing Trust Fund PROVISIONS

Multiple Program Guide 2022

Combining Multiple Housing Programs

Researching the Issues

When determining how to comply with multiple housing programs that fund a community, the first step is to understand comparable rules for each program. Federal and state guidance documents and individual regulatory agreements for a community should be gathered and read carefully. Once this is done, analysis can be conducted to establish which interaction is appropriate to maintain compliance with all programs.

Monitor requirements

When reconciling program requirements, it is very important to understand the difference between federal requirements and those imposed by the regulatory agency, such as the tax credit state Housing Finance Agency (HFA) or the HOME Participating Jurisdiction (PJ). More restrictive income and rent set-asides or specific conservative calculation methodologies are examples. The agency in these cases may have discretion in what they require and may be willing to negotiate their requirement to assist in complying with other program requirements.

MULTI-PROGRAM INTERACTION SUMMARY

Result of Rule Comparison	Action to Take	EXAMPLES
A. One program has a requirement that the other does not.	Apply the requirement.	HUD – Citizenship, criminal background, and numerous specific forms. RD – Complex waitlist requirements. HUD, RD, or HOME – Conduct an affirmative marketing plan.
B. Both programs have similar requirements and:		
a. The rules have built-in reconciliation provisions.	Apply the reconciled rule.	LIHTC with HUD or RD – Use HUD or RD utility allowances. LIHTC with HOME – Do not use income-based rent for over-income households.
b. One requirement is more restrictive.	Apply the more restrictive rule.	LIHTC with HUD, RD, or HOME – Use the lowest applicable Income limits. LIHTC with HUD or RD – Conduct annual income certifications at 100% LIHTC properties. LIHTC with HUD or RD – Apply minimum 1-year lease term. LIHTC with HUD – Do not charge application fees.
c. The requirements are different and don't reconcile.	Apply both rules.	LIHTC with HUD, RD, or HOME – Apply both student rules.
d. The requirements conflict.	Contact key persons to discuss risks and decide on an approach. - Owners - Investors - State HFA & other agencies.	LIHTC with RD or HUD – Displacing over-income households per RD rules or per LIHTC rules for existing households at a HUD acquisition/rehab. HUD or RD with LIHTC – Use of conservative calculations to determine eligibility (highest-in-range or year-to-date, for example).

STUDENT ELIGIBILITY

TAX CREDIT	HUD	RD	HOME	BOND
<p>In general, households made up of full-time students of any age do not qualify. There are five exceptions to this general rule. They are for students who are:</p> <ol style="list-style-type: none"> 1) Married and entitled to file a joint tax return* 2) Single parents with dependent child(ren) 3) Title IV welfare recipients (TANF or similar program) 4) Former foster care recipients 5) Participants in a Job Training Partnership Act (JTPA) or similar program** <p>* Same-sex couples qualify for "married and entitled to file" if legally married under any state law. **The "Workforce Investment Act" has replaced JTPA.</p>	<p>HUD Section 8 Rule: Any individual who attends an institute of higher learning (full OR part-time) must be one of the following:</p> <ol style="list-style-type: none"> 1) A dependent of the household living with a parent 2) Over age 23 3) A veteran 4) Married 5) A parent with a dependent child in the unit 6) A disabled individual who was receiving assistance prior to 11/30/2005 or 7) Be independent from parents or have parents who are income eligible. <p>Certain vulnerable youths also count as independent under HUD and DOE rules.</p> <p>Non-Section 8 programs: Each student at an institute of higher learning must meet ALL of the following requirements</p> <ol style="list-style-type: none"> 1) Be of legal contract age under state law 2) Have established a separate household from parents for at least a year OR meet the U.S. Dept. of Education definition of an independent student 3) Not be claimed on a parent's tax return 4) Must disclose if they get financial assistance from parents. 	<p>Same as HUD Section 8 Rule</p>	<p>Same as HUD Section 8 Rule (regardless of commitment date).</p> <p>The NHTF statute and regulation have no student restrictions.</p>	<p>Same as tax credit. In general, households made up of full-time students of any age do not qualify. Prior to HERA, the only exception that qualified a full-time student household was 'married, entitled to file a joint tax return'. Per HERA, the same five student exceptions that apply for LIHTC apply to bond qualification.</p>
<p>§42 (i)(3)(D) & 8823 Guide 17-1 & 2 & Exhibit 17-1; 4350.3 Exhibit 5-1 Rev. Rul. 2013-17</p>	<p>4350.3 3-13</p>	<p>Unnumbered letter dated 1/11/2007</p>	<p>HOME Reg §92.2 (2013)</p>	<p>§42 (i)(3)(D) §142 (d)(2)(C)</p>

Multiple Program Guide 2022

INCOME ELIGIBILITY DETERMINATIONS

TAX CREDIT	HUD	RD	HOME (NHTF)	BOND
Income eligibility is determined using the Section 8 method for determining gross annual income found in the HUD Handbook 4350.3 Chapter 5. No deductions to annual income apply to the tax credit program.	Follow the HUD Handbook 4350.3. Allowances and Deductions apply.	Follow the RD HB-2-3560 chapter 6. These rules are based on HUD regulations.	HUD allows PJs to choose from two methods for determining income, these will be stated in the HOME regulatory agreement and may include: 1) 1040 tax return definition 2) Section 8 method from the 4350.3 Chapter 5* 3) The 2013 regulation change eliminated the Census Long Form as an option. *The most widely used and the only option available to tax credit properties. <u>NHTF allows for the same two options as post-2013 HOME.</u>	Income eligibility is determined using the Section 8 method for determining annual income found in the HUD Handbook 4350.3 Chapter 5. The LURA will determine what method is used to verify income (see verification).
IRS Notice 88-80, Treas. Reg. 1.42-5(b)(1)(vii), 8823 Guide Chapter 4	4350.3 chapter 5 and Exhibits 5-1 & 5-2	HB-2-3560 chapter 6	HOME Guide 3.2 D Home Reg § 92.203(b)(2) (2013) NHTF 24 CFR 93.151 (b)	§ 142 (d)(2)(B)

CHILDREN – ADOPTED OR UNBORN

TAX CREDIT	HUD	RD	HOME	BOND
Children in the process of adoption and unborn children are included when counting household members. (pregnancy verified by self-affidavit by mother)	Children in the process of adoption and unborn children are included when counting household members. (pregnancy verified by self-affidavit by mother)	Children in the process of adoption and unborn children are included when counting household members.	Older guidance indicated that children in the process of adoption and unborn children were not included when counting household members. This guidance is no longer available and appears to have been rescinded. It is HIGHLY recommended that the property's PJ be consulted to determine if they still employ this policy. Many PJs use the widely accepted policy for other HUD programs to include these children.	Children in the process of adoption and unborn children are included when counting household members.

Multiple Program Guide 2022

INCOME LIMITS

TAX CREDIT	HUD	RD	HOME (NHTF)	BOND
<p>HUD-published Multifamily Tax Subsidy Program (MTSP) income limits are used. 20-80% MTSP limits apply, depending on the minimum set-aside selected for a project. Income limits are property-specific and HERA designates a “hold harmless provision” for a specific property, a provision that allows the income limits to never go below the highest limit that has applied to the area since the project was placed in service. Households must qualify based on gross annual income.</p>	<p>Income limits based on area median income (AMI) are used and vary based on which HUD program and the county location or MSA. Limits may go up or down any given year. Households must qualify based on gross annual income. For Section 8: the very-low 50% AMI limits generally apply, but 40% of new move-ins must be at the extremely low (30% AMI) limits.</p>	<p>RD program income limits based on area median income (AMI) are used based on which RD program and the county location or MSA. Limits may go up or down any given year. Applicants are given priority based on whether they are very low (50% AMI), low (80%), or moderate (low limit + \$5,500) income. Households must qualify based on adjusted income.</p>	<p>HUD HOME income limits based on area median income (AMI) are used. HOME limits are county or MSA-specific and may go up or down any given year. The HUD very low (50% AMI) limits apply to Low HOME units. High HOME limits are the HUD low income (80%) limits.</p> <p style="color: #4F81BD;">NHTF income limits are HUD’s extremely low limits, which are the higher of the 30% limits or the poverty level for an area. Unlike Section 8 ELI, the NHTF limits are NOT capped at the very low (50%) limits.</p>	<p>HUD-published Multifamily Tax Subsidy Program (MTSP) income limits are used. 50 or 60% MTSP limits apply, depending on the minimum set-aside selected for a project. Income limits are property-specific and HERA designates a “hold harmless provision” for a specific property, a provision that allows the income limits to never go below the highest limit that has applied to the area since the project was placed in service. Households must qualify based on gross annual income.</p>

Multiple Program Guide 2022

ZERO-INCOME HOUSEHOLDS / UNSECURED INCOME

TAX CREDIT	HUD	RD	HOME	BOND
<p>HUD allows zero-income households but makes provisions for interim certifications when income changes. The tax credit certification must establish a household's income for the next 12-month period with no interim certifications. This difference in program regulations creates a “grey” area that is open to interpretation between the programs, state agencies, and project owners. Some agencies require that future, unsecured income be counted based on the household’s income history. While some require that only imminent and verifiable income be counted. The 8823 Guide opts for using a 12-month history for zero or sporadic-income households and thus unknown and unverifiable income is not included on the certification. Check with your state HFA.</p>	<p>HUD allows zero-income households and unsecured income is not counted. Changes to this status must be reported immediately and an interim certification conducted.</p>	<p>RD does not consider zero-income households to qualify. Basic expenses that the household must meet are verified and counted as income. A Zero Income Checklist must be completed to determine cash and non-cash contributions to the household that will be used to meet the expenses.</p>	<p>HOME guidance allows zero-income households but does require that the past 12-month average income (if any) be included on the certification.</p>	<p>The bond regulations do not speak to this issue. Typically, it is handled per the tax credit program approach.</p>
8823 Guide 4-33	4350.3 5-5 A, Appendix 3, page 22	HB-2-3560 6.9 A 4, Attachment 6B	HOME GUIDE 6.2 E	

Multiple Program Guide 2022

EMPLOYMENT INCOME VERIFICATIONS WITH A RANGE OF HOURS, WAGES ETC.

TAX CREDIT	HUD	RD	HOME	BOND
HUD uses "average hours" when determining employment income. (e.g. 35 hours for 30-40 hours listed on a verification) By regulation, we count tax credit income as does the Section 8 program. However, it has generally been accepted as best practice by most state HFAs that the tax credit program should use the more conservative approach of using the HIGHEST in a range (i.e. 40 for the 36-40 hours). Some states apply the HUD method, however. The IRS has not addressed this issue.	HUD uses "average hours" when determining employment income (e.g. 35 hours for 30-40 hours listed on a verification)	RD does not directly address this issue. Typically, the HUD approach is used. (e.g. 35 hours for 30-40 hours listed on a verification)	HOME uses the HUD method to calculate employment income (i.e. "average hours") (e.g. 38 hours for 36-40 hours listed on a verification)	Bond technically uses the HUD "average hours" calculation for employment income. Typically, the best practices accepted by many bond issuers implement the more conservative approach of using the HIGHEST amount listed as a range on the employment verification. (e.g. 40 hours used for 36-40 hours listed on a verification)
	4350.3 Appendix 6-C		HOME Technical Guide page 6	

VERIFICATION OF ASSETS / IMPUTING INCOME FROM ASSETS

TAX CREDIT	HUD	RD	HOME (NHTF)	BOND
If the household's assets are \$5,000 or less, assets may be verified via self-affidavit. Household assets more than \$5,000 must be 3 rd -party verified. Imputed income from assets using the Hud passbook rate is calculated if assets exceed \$5,000.	Assets are 3 rd -party verified at move-in and every third year thereafter. Intervening years may use a self-affidavit from the household if assets do not exceed \$5,000. Imputed income from assets using the Hud passbook rate is calculated.	Assets are 3 rd -party verified. Imputed income from assets using the Hud passbook rate is calculated.	Assets are 3 rd -party verified or "source documents" used for initial program entry and then every 6th year of the affordability period. Income self-certification or verification from an RA voucher provider can be used for years 2-5. Imputed income from assets using the Hud passbook rate is calculated. NHTF allows the same verification methodology and cycle as HOME.	The bond regulations do not specifically address asset verification requirements. The project LURA may have specific requirements or allow self-affidavits to be used when household assets are \$5,000 or less. This is not specifically allowed on a federal level like it is for the tax credit program.

Multiple Program Guide 2022

VERIFICATION METHODS (GENERAL)

TAX CREDIT	HUD	RD	HOME (NHTF)	BOND
<p>The regulation requires a review of income documentation, such as w-2s or tax returns. Further informal IRS guidance provides more detailed verification rules. The below verification options are generally applied to tax credit properties, in the order of preference:</p> <ol style="list-style-type: none"> 3rd-party verification directly from the party. Documentation provided by the household. Household self-certification. <p>Note: options 1 and 2 are equally acceptable to many states and are both considered “third party” (following HUD’s model). Verifications are good for 120 days from receipt (or a state may apply HUDs 120 + 120-day standard).</p>	<p>There are 4 basic types of verification available for HUD in order of preference:</p> <ol style="list-style-type: none"> UIV – Upfront Income Verification with the mandatory use of EIV after move-in and optional use of UIV non-EIV verification Third-party verification from the source (written) Third-party verification from the source (oral) Family certification by household written statement <p>Verifications are good for 120 days from receipt and must be no more than 120 days old at the time of receipt. Fixed income sources must be verified every 3 years. COLAs can be applied in other years.</p>	<p>The below verification options are generally applied to tax credit properties:</p> <ol style="list-style-type: none"> A 3rd-party verification form. Documentation provided by the household Household self-certification <p>Verifications are good for 90 days from receipt and can be extended an additional 90 days with verbal clarification.</p>	<p>At move-in and every 6th year of the HOME affordability period, “source documents” must be used. These are written documents generated by a 3rd party, that verifies the income sources that the applicant reports. At least 2 months of history must be covered by the documentation. For other years, self-certification or verification from other sources, such as local PHAs is acceptable.</p> <p>Verifications are good for 6 months</p> <p style="color: #4F81BD;">NHTF allows the same verification methods and cycles as HOME.</p>	<p>The bond regulations do not specifically address verification requirements . The project LURA may have specific requirements and verification lifespans.</p>

HOUSEHOLD FILE RECORD RETENTION

TAX CREDIT	HUD	RD	HOME	BOND
Files for households that qualified units in the 1 st year of the credit period are vitally important for the audit of any year's records. They must be retained for a total minimum of 21 years after the first-year credits are claimed. Files for households qualified in years 2-15 must be kept for a minimum of 6 years beyond the deadline for filing the tax returns for a year.	Applications must be kept for 3 years after denial. EIV reports and other forms and verifications that go into tenant files must be retained in the tenant file for the term of tenancy plus three years. EIV Master Binders keep 3 years of information.	Tenant certification forms and supporting documentation must be retained in the tenant file for the longer of 3 years or until the next Agency monitoring visit or compliance review.	Individual tenant income, rent, and inspection information must be kept for the most recent 5 years throughout the period of affordability, until 5 years after the end of the affordability period.	Records should generally be kept for as long as the bonds are outstanding, plus 3 years after the final redemption date of the bonds.

Multiple Program Guide 2022

ADDING HOUSEHOLD MEMBERS TO AN EXISTING HOUSEHOLD / INTERIM INCOME INCREASES

TAX CREDIT	HUD	RD	HOME	BOND
<p>No Interim Certifications are required. Individuals added to an existing household during a certification year are income-certified individually and their income is added to the most recent TIC. The total household income is then checked to determine eligibility. This may trigger the AUR rule. The household is considered the same household so long as one original member remains. Some HFAs do not allow additional household members to be added during the Initial Certification year. *See “Increase in Income and Determining Eligibility” for more information.</p>	<p>Adding household members triggers an interim certification. Increases of income do not require a household to move out.</p>	<p>Adding household members triggers a new certification. If this increases the household’s income to more than the moderate-income limit, (low (80% AMI) limit + \$5,500) the household may be required to move out.</p>	<p>No Interim Certifications are required. Increases of income do not require a household to move out. *See “Increase in Income and Determining Eligibility” for more information.</p>	<p>No Interim Certifications are required. The regulations do not discuss adding household members. The regulatory agreement may discuss this. Increases of income do not require a household to move out. *See “Increase in Income and Determining Eligibility” for more information.</p>

Multiple Program Guide 2022

RECERTIFICATION

TAX CREDIT	HUD	RD	HOME (NHTF)	BOND
<p>Projects that are less than 100% tax credit must recertify each household's income and student status annually. 100% tax credit projects must recertify student status annually. Typically, recertifications are due on the original certification anniversary date. A few states require one full income recertification.</p>	<p>Recertifications are due on the certification anniversary date. Interim certifications must be conducted when household income increases by \$200 a month or decreases by an amount that would change the TTP. It is only required that household composition or income items that have changed since the annual certification must be re-verified. Fixed-source income must be verified at least every 3 years.</p>	<p>Recertifications are due on the certification anniversary date. If certain income and household changes occur (including increases of \$100 per month or decreases of \$50), a new certification is done, and all items are 3rd-party verified. Recertification must then be completed no later than a year from the anniversary of the new certification.</p>	<p>HOME households must be certified at move-in and every 6th year of the affordability period, with some annual recertification requirements in years 2-5. The HOME program does not mandate dates for the annual cycle, allowing all recertifications to be conducted at once for a year. There are no provisions for interim certifications.</p> <p style="color: #4F81BD;">NHTF applies the same recertification standards as HOME.</p>	<p>Projects that are less than 100% bond must recertify each household's income and student status annually. Like the tax credit program, 100% projects need to recertify student status each year.</p>

DEDUCTIONS AND ALLOWANCES

TAX CREDIT	HUD	RD	HOME	BOND
Deductions and allowances are not used. Rent is not based on income.	<p>HUD has 5 types of deductions and allowances used to determine adjusted income and rent. Open to all applicable households are:</p> <ol style="list-style-type: none"> 1) Dependent deduction (\$480 per dependent per year) 2) Childcare expenses and 3) Disability assistance expenses <p>Available to households where the head or co-head is elderly or disabled are:</p> <ol style="list-style-type: none"> 1) Medical expenses and 2) Elderly household deduction (\$400 per household per year) 	RD uses the 5 HUD deductions and allowances.	HOME uses HUD's 5 deductions and allowances for those over-income households paying rent based on their income.	Deductions and allowances are not used. Rent is not based on income.
	4350.3 Chapter 5 section 2	HB-2 3560 5.9 C	HOME Guide Attachment 3-4	

EFFECTIVE DATES OF CERTIFICATIONS

TAX CREDIT	HUD	RD	HOME	BOND
<p>The effective date for move-in is the actual date of move-in.</p> <p>The effective date for in-place residents at Acq/Rehab properties is the date of acquisition (for households certified within 120 days of the acquisition date). After the 120-day period, the effective date is the date of the last signature on the certification.</p> <p>The effective date of recertification is the anniversary of the effective date of the original tenant income certification (for less than 100% LIHTC projects where recertification is required).</p>	<p>The move-in date is the date of move-in.</p> <p>The effective date of the initial certification where an in-place resident gets rental assistance is the date that subsidy is assigned to the tenant.</p> <p>Interim Certifications with a rent increase reported in a timely manner is the first of the month after the end of a 30-day notice.</p> <p>The effective date of interim certifications with rent decreases or when increases of income are not reported timely is the 1st of the month after the income is verified.</p> <p>The annual recertification effective date is the first of the month on the anniversary of the original move-in certification. HUD may approve alternative anniversary dates.</p>	<p>The effective date of all RD certifications will always be the 1st of the month. The effective date of a move-in cert is the 1st of the month. If the tenant did not move in on the 1st, the effective date is the 1st of the next month after move-in. The effective date of recertification is the anniversary date of the last certification.</p>	<p>Effective dates are not discussed.</p> <p>Initial income certification must be completed 6 months prior to move-in.</p> <p>Annual recertification is necessary but does not have to be on the anniversary date of the last certification.</p>	<p>Effective dates are not discussed. Typically, the Tax credit rules are followed.</p>

Multiple Program Guide 2022

INCREASES OF INCOME AND DETERMINING ELIGIBILITY

TAX CREDIT	HUD	RD	HOME (NHTF)	BOND
<p>For less than 100% tax credit properties, household income that is over 140% of the current income limit at recertification is "over-income". Over-income households continue to qualify as Tax Credit households if the next available unit of the same or smaller size <i>IN THE BUILDING</i> is rented to a qualified tax credit household. This continues until the applicable fraction is restored not counting the over-income households. Once the applicable fraction is restored, the household may be raised to market rent, but cannot be required to vacate the unit. This is often called either:</p> <ul style="list-style-type: none"> • the AUR "Available Unit Rule"; • the NAUR "Next Available Unit Rule"; or • the "140% rule" 	<p>Rent increases up to the maximum rent. Households that are at the maximum rent and not receiving RA are NOT required to move out of the unit.</p>	<p>Rents increase up to the maximum rents. Households that exceed the moderate-income limits must vacate the unit. Overage (the amount of the tenant's rent that exceeds Basic Rent up to Note Rent) must be paid to RD.</p>	<p>Income and subsequent rent increases may result in re-classification from LOW to HIGH HOME rents. Rents switch to 30% of adjusted income once the household's income exceeds the 80% limit. LOW HOME households that exceed the HOME 50% limits and HIGH HOME households that exceed the HOME 80% limits are "over-income". Resulting actions are then determined by the program and depend on whether the project is "fixed" or "floating" HOME. Households at the maximum rent are not required to move out of the unit. For projects that have tax credit funding also, rent for over-income households is not based on adjusted income but may be raised to tax credit limits.</p> <p style="color: #4F81BD;">NHTF units that exceed the NHTF limits are in temporary non-compliance and the next available comparable unit must be rented to an NHTF-eligible tenant for floating NHTF units. If fixed NHTF, the unit(s) will need to be re-occupied with an NHTF-eligible household once the over-income household chooses to vacate.</p>	<p>For less than 100% bond properties, household income that is over 140% of the current income limit at recertification is "over-income". Over-income households continue to qualify as bond households if the next available unit of the same or smaller size <i>IN THE PROJECT</i> is rented to a bond household. NOTE: For bond/tax credit projects, this rule becomes a BUILDING rule to conform to the tax credit regulations.</p>
<p>§42(g)(2)(D)(ii), Treas. Reg. §1.42-15, 8823 Guide Chapter 14</p>	<p>4350.3 chapter 8</p>	<p>HB-2-3560 6.30</p>	<p>HOME Guide 3.5 & 6, Attachment 3-4 & Attachment 3-5 §92.25 3 (c) (2013) NHTF 24 CFR 93.302 (f)</p>	<p>§142(d)(3)(B) & (C)</p>

Multiple Program Guide 2022

TRANSFERRING HOUSEHOLDS

TAX CREDIT	HUD	RD	HOME	BOND
<p>For less than 100% tax credit properties, households with income above the 140% limit at recertification may only transfer to units in the same building. At 100% tax credit properties and for households with income below the 140% limit, transfers can take place between buildings in the project without the household qualifying under current income limits. See IRS form 8609 to determine which buildings are in a project. Transfers between units cause the units to switch status, especially for purposes of initial tax credit rent up.</p>	<p>Transfers are allowed between buildings within a project. Households that overcrowd or under occupy a unit may be required to move to an appropriately sized unit (if that unit is available) or stay and pay contract rent. The effective date of the household's recertification after the transfer is the anniversary date of their original move-in date to the property.</p>	<p>Transfers are allowed between buildings in a project. Households that overcrowd or under occupy a unit may be required to move to an appropriately sized unit (if that unit is available). If an appropriate unit is not available, Tenancy may be terminated. Recertification is completed at transfer, and the transfer date becomes the new anniversary date.</p>	<p>HUD guidance does not discuss unit transfers for HOME. Generally, households must re-qualify at transfer for the new unit. "Floating" HOME units can switch their designation. "Fixed" HOME units do not switch.</p>	<p>Bond rules do not discuss unit transfers.</p>

Multiple Program Guide 2022

SUBSIDY AND RENT LIMITS

TAX CREDIT	HUD	RD	HOME (NHTF)	BOND
Section 8 RA and RA from similar programs are exempt when determining household income. Household rent may exceed the tax credit max rents for households receiving assistance and whose income has increased. Tenant rents may also exceed the tax credit limit for households receiving RD assistance for which RD "overage" is paid.	N/A	Rental assistance, if available at a property, pays rent up to basic rent. When tenant rent exceeds basic rent, overage is paid to RD equal to the difference between the tenant rent for a unit and the basic rent.	<p>Include any subsidy when determining compliance with HOME rent requirements. There is an exception for project-based subsidy in LOW HOME units where tenants pay 30% of their income toward rent. For these units, the full subsidy program rents may be collected.</p> <hr style="width: 50%; margin-left: 0;"/> <p style="color: #4F81BD;">For NHTF units with PROJECT-based federal or state subsidy, maximum rents are the rents allowable under the subsidy program.</p>	The bond program does not impose rent requirements. The bond agreement may have some project-specific requirements.
§42(g)(2)(B)(i) & (iv), 8823 Guide 11-5 & 6		HB-2 7.4 C, 7.11 A-C	HOME Guide 3.3 C NHTF CFR 24 93.302 (b)(ii)(2)	

Multiple Program Guide 2022

UTILITY ALLOWANCES

TAX CREDIT	HUD	RD	HOME (NHTF)	BOND
<p>Projects with RD or HUD funding use the UA for those programs. There are 5 additional choices for other properties:</p> <ol style="list-style-type: none"> 1) Local PHA-published UAs 2) Estimate from a Utility Company 3) Estimate from an HFA 4) HUD Utility Schedule Model (HUSM) 5) Engineer Model <p>For non-RD/HUD-regulated buildings, the UA for voucher-holding households is the PHA-published UA that their rent calculation is based on.</p> <p>Note: many, but not all, states consider HOME to be a HUD-regulated program.</p>	<p>UA for a property is calculated based on actual consumption at a property every 3rd year and adjusted by a HUD-published rate the other years.</p>	<p>UA for a property is calculated based on RD policy. If there is more than a 15% rate increase, owners should collect a “significant sampling” of tenant data. If any increase is 15% or less, “a sampling” is required. Each state Agency may set further policies.</p>	<p>The PJ establishes a UA. Since the 2013 change in HOME regulations, UAs provided by Public Housing Authorities are no longer acceptable. UAs must now be:</p> <ol style="list-style-type: none"> 1) Calculated based on actual project consumption; or 2) Use the HUD Utility Schedule Model (HUSM) <p>NOTE: This is only applicable to HOME projects committed funds after 8/23/2013. The method for HUD projects is also acceptable. Tax credit options are also acceptable except for PHA estimates.</p> <hr style="width: 50%; margin-left: 0;"/> <p style="color: #4F81BD;">For the NHTF, the grantee must establish UAs each year.</p>	<p>The bond program does not impose rent limits; thus, a UA is irrelevant. The bond agreement may impose further rent restrictions.</p>

Multiple Program Guide 2022

RENT LIMITS

TAX CREDIT	HUD	RD	HOME (NHTF)	BOND
Rent limits are calculated based on income limits. There is a gross rent “floor,” established at the date of allocation or placed in service date so that the rents do not have to fall below the “floor” for a project, even if the HUD published Income Limits go down from year to year. Rent limits are calculated imputing 1.5 persons per bedroom.	Market (or contract) rents are calculated for a specific property and will be spelled out in regulatory and HAP agreements.	Basic and market rents are calculated for a specific property and will be spelled out in regulatory and other agreements.	<p>HUD publishes the HOME high and low rent limits. Rents do not decrease below the originally approved HOME rents. 2013 HOME regulation requires that PJs approve all rents annually at each HOME project that they monitor</p> <hr style="width: 50%; margin-left: 0;"/> <p style="color: #4F81BD;">For the NHTF the grantee must approve rents each year.</p>	The bond program does not have rent limits. Specific bond agreements may impose limits.

Multiple Program Guide 2022

MINIMUM SET-ASIDE AND REQUIRED NUMBER OF UNITS IN THE PROGRAM

TAX CREDIT	HUD	RD	HOME	BOND
<p>Historically, properties had a 20-50 or 40-60 minimum set-aside. The first number designates the minimum percentage of units at the property that must be designated “tax credit” units. The second number represents the MTSP income and rent limit for those units. Tax credits are claimed based on the actual percentage of tax credit units to all the units in a building; this is called the “applicable fraction.”</p> <p>Starting for new set-aside elections starting in 2018, the 40-60 set-aside option includes an “Average Income Test” (AIT) version where units may be set aside at 20 to 80% MTSP set-asides (in whole 10% increments), as long as these average 60%.</p> <p>NOTE: New York City adds minimum set-aside options of 25-60 and 25-60 (AIT). State agencies can determine additional set-asides, but federal tax credits are not at-risk if these set asides are noncompliant.</p>	<p>This is based on the HUD program type and the regulatory agreement in place for the property.</p>	<p>This is based on the RD program type and the regulatory agreement in place for the property.</p>	<p>The HOME units in a property are determined by the amount of HOME Funds given to the property in proportion to the cost to build. These are designated “low” and “high” HOME units. Typically, 20% of units must be “low” HOME units with a 50% income and rent limit. The remainder of the HOME units are “high” HOME with an 80% rent and income limit.</p>	<p>Typically, properties have a 20-50 or 40-60 minimum set-aside. The first number designates the minimum percentage of units at the property that must be designated “bond” units. The second number represents the MTSP income and rent limit for those units. The bond units must meet the minimum set-aside at the property, but do not need to exceed the minimum. During lease-up once a property reaches 10% occupancy the minimum set-aside must be maintained among the occupied units. This may cause a hold on leasing to non-bond households until the bond minimum set-aside is reached.</p> <p>NOTE: New York City adds a third minimum set-aside of 25-60. State agencies can determine additional set-asides.</p>
<p>§42(g)(1), 8823 Guide chapter 10, IRS form 8609(s) line 10C shows the designation</p>			<p>HOME Guide 1.8</p>	<p>§142(d)(1) Rev. Proc. 04-39</p>

Multiple Program Guide 2022

INITIAL LEASE AND LEASE TERM

TAX CREDIT	HUD	RD	HOME (NHTF)	BOND
<p>Other than in SRO or transitional housing projects, households must not be “transient.” This generally means that the initial lease term must be at least 6-months. Termination or non-renewal must be for good cause under state law.</p>	<p>The initial lease term must be 12 months. The HUD lease must be used. Termination or non-renewal must be for good cause.</p>	<p>The initial lease term must be 12 months or the end of the HAP contract, if sooner. The lease is developed by the owner and must be certified by the owner’s attorney and approved by RD. Termination or non-renewal must be for good cause.</p>	<p>The initial lease term is typically 12 months unless a lesser term is agreed upon, which can’t be less than 30-days, except in cases of threat to the tenants, employees, or property. The lease is developed by the owner avoiding 9 prohibited clauses. The lease must be approved by the PJ. Termination or non-renewal must be for good cause.</p> <hr style="width: 50%; margin-left: 0;"/> <p style="color: #4F81BD;">NHTF has the same initial term and prohibited lease terms as apply to HOME. Termination of tenancy must be for cause and in a timeframe dictated by local law.</p>	<p>The bond program leaves the lease and initial lease term up to other program funding unless the bond agreement mandates some lease requirements. The minimum term is generally at least 31 days.</p>

Multiple Program Guide 2022

APPLICATION, SCREENING, AND MONTHLY FEES

TAX CREDIT	HUD	RD	HOME	BOND
Applicants can be charged a fee for the actual average out-of-pocket costs to run the checks. Non-optional monthly fees must be added when determining gross rent compliance.	Applicants must NOT be charged for the costs of screening. Monthly fees must be approved by HUD.	Fees to applicants are discouraged but allowed and limited to the actual cost of the screening. Monthly fees must be approved by RD.	<p>Application, screening, and other fees must be approved by the Participating Jurisdiction (PJ). Any allowed monthly fees must be deducted from the HOME rent limit to determine the maximum rent charged for a unit.</p> <hr style="width: 50%; margin-left: 0;"/> <p>Fees that are not customary in rental housing are prohibited. Reasonable application fees may be charged or fees for services or meals, as long as the services are voluntary.</p>	Application fees and costs to screen applicants are not addressed.

CRIMINAL BACKGROUND CHECKS

TAX CREDIT	HUD	RD	HOME	BOND
Owners may screen for criminal background.	Owners are required to screen for criminal and drug-related criminal activity. Applicants must be screened for lifetime sex offender registration and those registered are prohibited entry.	Owners may screen for criminal background. Owners may deny admission for criminal activity. If rejected for occupancy, the letter must outline the reason.	Owners may screen for criminal background. Applicants rejected must receive a written explanation.	Criminal background checks are not addressed.

RELEASE OF INFORMATION FORMS

TAX CREDIT	HUD	RD	HOME	BOND
No specific form is required.	HUD uses forms 9887 and 9887-A. These are signed at initial and annual recertification.	The owner is required to develop a Release of Information form. No specific form is required.	No specific form is required.	No specific form is required.
	4350.3 3-11	HB-2-3560 6.11 2		

CITIZENSHIP REQUIREMENTS

TAX CREDIT	HUD	RD	HOME	BOND
The Internal Revenue Service (IRS) does not establish citizenship requirements. The HFA or the owner may establish non-citizen restrictions.	Only U.S. citizens or eligible non-citizens may receive assistance. Non-citizens must provide documentation that is verified through the Department of Homeland Security (DHS) U.S. Citizenship and Immigration Services' SAVE system. Households that consist of non-eligible and eligible members will have their assistance pro-rated.	Only U.S. citizens or eligible non-citizens may receive benefits. RD guidance on how to establish this is still pending.	The multi-family HOME program does not have established citizenship requirements.	The bond program does not have established citizenship requirements.
8823 Guide 13-2	4350.3 3-5 F, 3-12, Exhibit 3-5	§3560.152 (a)(1)		

Multiple Program Guide 2022

RACE / ETHNICITY REPORTING REQUIREMENTS

TAX CREDIT	HUD	RD	HOME (NHTF)	BOND
Race and ethnicity data collection and reporting procedures are established by the State Housing Finance Agency (HFA). The HFA is required to report this data to HUD.	Applicants have the option to report their race and ethnicity using the form HUD-27061-H, though this is NOT a required form. Management must NOT complete the form on the applicant's behalf. Race and ethnicity data is NOT placed on the waiting list.	Application forms and waiting lists must include race and ethnicity data. If the applicant will not supply the data, management is required to complete the race and ethnicity information based on observation.	The PJ must establish race and ethnicity data collection and reporting procedures. The PJ must review the data collected each year. <i>As affirmative marketing rules apply, NHTF would require monitoring of race and ethnicity.</i>	The bond program does not have race and ethnicity data collection or reporting procedures.
The Housing and Economic Recovery Act of 2008 (HERA) section 2835	4350.3 2-11 A, 4-14 A 4, Exhibit 4- 3, 4-16 D 4	HB-2-3560 6.18 A, Exhibit 6-5	HOME Guide 4.2 B 5 NHTF 24 CFR 93.350	

AFFIRMATIVE FAIR HOUSING MARKETING

TAX CREDIT	HUD	RD	HOME (NHTF)	BOND
The Internal Revenue Service (IRS) does not address affirmative marketing.	HUD requires an Affirmative Fair Housing Marketing Plan (AFHMP) on HUD form 935.2A. This is updated by the owner/manager at least every 5 years and must be approved by HUD or the Contract Administrator (CA).	RD requires an Affirmative Fair Housing Marketing Plan (AFHMP) on HUD form 935.2A. This must be approved by RD and updated every 5 years.	The PJ must establish affirmative marketing procedures. The PJ is responsible to make sure that the established affirmative marketing plan is followed by the site. <i>Grantees must establish and monitor affirmative marketing plans for NHTF properties.</i>	The Internal Revenue Service (IRS) does not address affirmative marketing.

Multiple Program Guide 2022

ONLINE SYSTEM USED BY PROGRAM

TAX CREDIT	HUD	RD	HOME	BOND
The Internal Revenue Service (IRS) does not have an online system. Individual State Housing Finance Agencies (HFAs) may have a unique online system.	HUD has Tenant Rental Assistance Certification (TRACS) and Enterprise Income Verification (EIV).	Management Agent Interactive Network (MINC).	The Participating Jurisdiction (PJ) uses the Integrated Disbursement and Information System (IDIS) to report to HUD.	The IRS does not have an online system.

ADMINISTERING AGENCY

TAX CREDIT	HUD	RD	HOME (NHTF)	BOND
The Internal Revenue Service (IRS) and State Housing Finance Agencies (HFAs). NOTE: Each state has an HFA; however, they are not all specifically called Housing Finance Agencies.	Housing and Urban Development (HUD) Multi-family Division and Contract Administrators (CAs) which are 'contracted' by HUD.	Rural Development (RD) / Rural Housing Services (RHS) under the United States Department of Agriculture (USDA).	Housing and Urban Development (HUD) under the Office of Community Planning and Development (CPD). CPD appoints Participating Jurisdictions (PJs) that commit the HOME funds to owners and monitor compliance. <u>HUD CPD. CPD appoints state Grantees that commit the NHTF funds to owners and monitor compliance.</u>	The Internal Revenue Service (IRS) and bond issuers.

Multiple Program Guide 2022

INSPECTIONS – FILE REVIEW AND PHYSICAL

TAX CREDIT	HUD	RD	HOME (NHTF)	BOND
<p>Inspections are done on a minimum 3-year cycle. At least one aspect of ALL buildings is inspected (such as the building exterior or HVAC). The number of files and units inspected is the lower of 20% or the number listed on a chart published in IRS regs (based on HUD REAC standards). UPCS (Uniform Physical Condition Standards) or local standards are used for the Physical Review. NOTE: Section 504 is not applicable to tax credit funding where other federal funding is not involved. Fair Housing standards apply.</p>	<p>MORs (Management Occupancy Reviews) are performed on a risked-based cycle of 1-3 years. REAC Physical inspections use UPCS and are conducted on a 1 to 3-year schedule based on the previous REAC score: >89 = 3-year schedule 80-89 = 2-year schedule <80 = 1-year schedule Some HUD programs use the HQS (Housing Quality Standards) Protocol, but most use UPCS (Uniform Physical Condition Standards). Section 504 and fair housing standards apply for a review of accessibility.</p>	<p>Annual Physical Inspections: 5% of occupied units (minimum of 2) and 5% of vacant units (minimum of 2). Tri-annual Supervisory Visits review units based on size: 1-5 units = all units inspected 6-30 units = 6 inspected 31-74 units = 10 inspected >74 units = 15 inspected Vacant units = 5% inspected (minimum of 2 units) RD 3560-11 is the form used for Physical reviews. Section 504 and fair housing standards apply for a review of accessibility.</p>	<p>Reviews are based on the total number of units in a property, NOT just the HOME units, with a 3-year inspection cycle. The inspector selects a “Reasonable Sample.” The PJ must choose between local and state codes or UPCS or HQS* for the physical reviews. Section 504 and fair housing standards apply for a review of accessibility. *UPCS replaced HQS with the 2013 HOME regulations. Further guidance is forthcoming.</p> <hr style="width: 50%; margin-left: 0;"/> <p>NHTF tri-annual inspections are based on a sample as set forth by HUD notice. For projects with 1-4 NHTF units, all of the NHTF units are inspected. NHTF properties must meet the HUD UPCS standard and Section 504.</p>	<p>No inspection schedule is required by code. NOTE: Section 504 does not apply to bond funding. Fair Housing standards apply.</p>
<p>Treas. Reg. §1.42-5(c)(1)(vi) & (2) 8823 Guide 6-1 & Exhibit 6-1</p>	<p>4350.1 chapter 5, see also www.hud.gov for further REAC, UPCS, and HQS information. Multiple Program Guide 2022

REPORTING REQUIREMENTS

TAX CREDIT	HUD	RD	HOME	BOND
IRS form 8609 must be filed with the IRS after the first year of the credit period. Form 8609A is filed in the other years of the compliance period. An annual owner certification of program compliance must be submitted to the state HFA.	Reporting and HAP processing are submitted monthly through TRACS.	Reporting and RA processing are submitted to RD monthly through MINC by the 10 th of the month.	Annual occupancy and other reports are submitted to the PJ.	Form 8703 must be filed with the IRA annually.

VIOLENCE AGAINST WOMEN ACT (VAWA)

TAX CREDIT	HUD	RD	HOME (NHTF)	BOND
VAWA applies to tax credit properties since 2013. The IRS is unlikely to issue guidance. HUD guidance may be used as a model and state HFAs often issue guidance based on the HUD model.	Applies since 2005 to Section 8 and since 2013 for most other HUD programs. HUD has issued sample notice of rights (Form HUD-5380), victim cert. (5382), model emergency transfer plan (5381), model emergency transfer request (5383). A lease addendum (91067) is required.	The VAWA statute covered RD in 2013. In 2017 RD applied the HUD 2016 VAWA Rule. The 2023 VAWA reauthorization covered RD vouchers.	HUD 2016 guidance applies to HOME. The HUD 2016 guidance applies to NHTF. The VAWA statute explicitly includes NHTF starting with the 2022 VAWA reauthorization.	VAWA does not apply.
